Microsoft 365: Product transitions to the cloud.microsoft domain

Microsoft products are now available at the cloud.microsoft domain, which provides added security against spoofing.

- Some of the products transitioned or transitioning are:
 - Microsoft 365 Copilot Chat
 - Microsoft 365 Apps for Web
 - Microsoft Forms

Ensure connections to *.cloud.microsoft are allowed and consider updating any references to the old URLs to avoid confusion.

For reference only: cloud.microsoft domain for Microsoft 365 Copilot Chat

Microsoft 365: Dynamic rules for Microsoft 365 Backup to simplify backup management at scale

Microsoft 365 Backup now supports **dynamic rules for backup policies** based on distribution lists and security groups, ensuring automatic updates and minimized manual efforts.

Review your distribution lists and security groups to ensure accurate backup coverage.

The screenshot shows the Microsoft 365 Admin Center interface. On the left, there's a navigation sidebar with various admin center links like Home, Users, Devices, Groups, Roles, Resources, Billing, Support, Data, Apps & services, Settings, and Admin centers. Under Admin centers, Security and Compliance are listed. The main content area is titled "Microsoft 365 Backup" and describes backing up content from SharePoint, Exchange, and OneDrive. It has tabs for "Backup policies" (which is selected) and "Restorations". Under "Backup policies", there are sections for "SharePoint", "Exchange", and "OneDrive". Each section has a status indicator ("Not set up") and a "Set up policy" button. The "Exchange" section is highlighted with a yellow box.

Microsoft Places: Changes to Places Core service plan

The Places Core service plan will be **renamed** to **RETIRED-Places Core**. This change will not impact current users or their access to features.

The screenshot shows the Microsoft 365 admin center interface. The user is navigating through the 'Licenses' section under 'License details'. A specific license for 'Microsoft 365 E5 (no Tel)' is selected. On the right side, a detailed view of the assigned licenses for user 'Adele Vance' is shown. The list includes various Microsoft services, with one entry highlighted: 'RETIRED - Places Core'. This entry is enclosed in a yellow box, indicating it is the renamed version of the previous 'Places Core' service plan. Other visible licensed services include Power BI Pro, Power Virtual Agents for Office 365, Premium Encryption in Office 365, Project for Office (Plan E5), Purview Discovery, Retired - Commercial data protection for Microsoft Copilot, Retired - Microsoft Communications Compliance, Retired - Microsoft Data Investigations, SharePoint (Plan 2), Skype for Business Online (Plan 2), Sway, To-Do (Plan 3), and Universal Print.

Microsoft Edge: Introducing the Edge for Business security connector framework

The **new Microsoft Edge for Business security connector** framework enables integration with authentication, data loss prevention, and reporting solutions, enhancing security without extra cost.

Admins can configure connectors in the Microsoft 365 Admin Center; ensure Microsoft Edge version 135 is installed.

The screenshot shows the Microsoft 365 Admin Center interface. On the left, there's a navigation sidebar with various options like Home, Copilot, Users, Teams & groups, Marketplace, Billing, Settings, Domains, Search & intelligence, Org settings, Microsoft 365 Backup, Integrated apps, Viva, Desktop environments, and Microsoft Edge. The Microsoft Edge option is highlighted with a yellow box. The main content area is titled 'Microsoft Edge' and has tabs for Overview, Configuration profiles, Site lists, and Connectors. The 'Connectors' tab is also highlighted with a yellow box. Below this, there's a section titled 'Enhance your browser insights with Connectors' which says 'Edge Connectors let third-party services authenticate, analyze, and report on browser events and usage data, providing valuable insights and smarter decision-making.' It features cards for Cisco Duo, CrowdStrike, Device (In preview), HYPR (In preview), Omnissa (In preview), Ping Identity, RSA (In preview), Splunk, and Symantec (In preview), each with 'Set up' and 'Learn more' buttons. The entire screenshot is framed by a yellow border.

Microsoft 365 Admin Center: Microsoft 365 Copilot service plan diagnostic tool

The self-help diagnostic tool is designed to troubleshoot issues related to missing Copilot functionality by determining if the problem is linked to a missing service plan.

Follow the outlined steps to ensure that Copilot features are fully operational.

The screenshot shows the Microsoft 365 Admin Center interface. On the left, there's a navigation sidebar with options like Home, Copilot, Users, Devices, Marketplace, Billing, Setup, and more. The main dashboard has sections for 'Finish setting up M...', 'Microsoft 365 Copilot' (showing 3 of 25 licenses available), and 'Microsoft Teams'. A large yellow box highlights the 'Run diagnostics' section on the right, which contains a summary of service plans assigned to a user, a list of troubleshooting steps (Graph Connectors in Microsoft 365 Copilot, Microsoft Copilot with Graph-grounded chat, etc.), and a 'View insights' section with tips for finding the Copilot button in Microsoft 365 apps.

Microsoft 365 Admin Center: Admins can use Billing Policies to manage Copilot Pay-as-you-go services for their enterprise users

Microsoft 365 Copilot introduces Pay-as-you-go Billing Policies, allowing administrators to manage departmental usage and costs for efficient financial oversight.

Admins need to create billing policies to allocate Azure subscriptions and user scopes for Copilot usage.

The screenshot shows the Microsoft 365 Admin Center interface. The left sidebar has a navigation menu with items: Home, Copilot, Overview, Discover, Agents & connectors, Prompts, Billing & usage (which is selected and highlighted in blue), and Settings. The main content area is titled "Billing & usage". At the top right of the content area, there is a breadcrumb navigation: Home > Billing > UI Diagnostic. Below the title, there is a sub-header: "Set up pay-as-you-go billing by connecting apps and services to billing policies. Manage license assignment for license-based subscriptions. Learn more about pay-as-you-go billing". There are two tabs at the bottom of the content area: "Billing policies" (which is underlined in blue, indicating it is selected) and "Pay-as-you-go services". At the bottom of the content area, there is a button labeled "+ Add a billing policy".

Microsoft 365 Admin Center: Copilot Admins can use MAC to pin Agents for their entire tenant or specific users or groups.

Admins can now **pin Copilot agents for users or groups**, enhancing their discoverability and engagement.

Admins should familiarize themselves with this feature and plan which agents to pin for different users or groups.

The screenshot shows the Microsoft 365 Admin Center interface. On the left, there's a navigation sidebar with various sections like Home, Agents & connectors, Requests, Billing & usage, Settings, and more. The main area is titled "Agents & connectors". It displays a summary of 18 agents and 2,350 connectors. Below this, there are sections for "Get agents", "Upload custom agents", "Import & Deploy", and "Manage pinned agents". A table lists several agents, including "Conversational AI", "Visual creator", "Forest guide", "Smartsheet", "Presentation AI", "Agent name: Agent description", and "Agent name: Agent description". To the right, a separate window titled "Pinned agents" shows a list of pinned agents for a user, with a blue arrow pointing to the "Pinned" column. The pinned agents listed are "Presentation AI" (Priority: Medium), "Sales coach" (Priority: Medium), "Learning coach" (Priority: Low), and "Visual studio" (Priority: Medium).

Microsoft 365 Copilot Interaction Export API

The new Microsoft 365 Copilot Interaction Export API enable customers and ISVs to export Copilot interaction data for processing in their security and compliance (S+C) applications.

- This new Interaction Export API captures the user prompts and Copilot responses in the Copilot private interactions and provide insights into the resources Copilot has accessed to generate the response.

The initial set of Copilot APIs was unveiled at Build 2025; each API is designed to address real enterprise needs and can be used on its own or together with others. These APIs operate within the identity, access, and governance controls that organizations already rely on, and include the following:

- Interactions Export API
- Change Notifications API
- Meeting Insights API
- Retrieval API
- Chat API

These APIs are only available for Microsoft 365 Copilot licensed users.

Microsoft Viva Insights | Copilot Analytics: Unified experience for Copilot Dashboard and Insights analyst workbench

Microsoft Viva Insights will integrate Copilot Analytics into a unified experience through the Viva Insights web app, enhancing capabilities for users and analysts.

No action is required by admins, as existing tenant settings and user preferences will be preserved.

The screenshot shows the Microsoft Viva Insights web application interface. At the top, there are two header sections: 'Microsoft Viva Insights' and 'Copilot Analytics'. Below these, a navigation bar includes links for 'Copilot Dashboard' and 'Reports'. The main content area is titled 'Reports' and displays a list of reports. Two reports are visible: 'Copilot Studio agents' (updated 4 days ago) and 'Copilot for sales adoption' (updated 5 days ago). Each report card includes a 'View report' button and a '...' button. At the bottom of the page, there is a progress bar labeled 'Copilot licensed employees' with a value of '2,207' and a 'Explore adoption' button.

Copilot Extensibility: Graph connectors are now available in Copilot tab with new connector gallery look

Microsoft Graph connectors can now index third-party enterprise content for use in Microsoft 365 Copilot and **have moved to the Copilot Control System** for streamlined management.

The screenshot shows the Microsoft 365 Admin Center interface. The top navigation bar includes Home, Search & intelligence, Data sources, Customizations, and Configurations. The main content area is titled "Search & intelligence" and has a sub-section titled "Connections". It provides instructions for building and customizing connections managed by the organization, mentioning support for 50 million items of index quota. A message indicates that the tenant now supports 50 million items of index quota at no additional cost. Below this, there is a table for managing connections:

Connection Name	Display Name	Required actions	Staged Rollout	Connection ID
MSSearch	Other Sites	Add description for Copilot	Add staging	MSSearch
CSV1	CSV	-	-	CSV1

Previous location of Microsoft Graph connectors in the Microsoft 365 Admin Center (MAC)

The screenshot shows the Copilot Control System interface. The top navigation bar includes Home, Copilot, Overview, Agents & connectors, Billing & usage, Settings, Users, Active users, Contacts, Guest users, Deleted users, Devices, Active devices, and Autopilot. The main content area is titled "Agents & connectors". It describes agents as AI assistants for answering questions, creating content, and automating tasks. It also mentions the ability to create connections to organization knowledge sources. Below this, there is a table for managing agent inventory:

M365 Admin Center: New Service Plan – “People Skills – Foundation”

Microsoft 365 **introduces new agents like Skill Discovery, Interpreter, Facilitator, and Project Manager** in public preview, enhancing task automation and collaborative functions.

- Users will need a Microsoft 365 Copilot license for access, and admins can manage agent settings and permissions via PowerShell and admin controls.

People Skills will not be enabled automatically for any tenants.

- To get started, admins will need to deploy skills before the benefits of the service will be active on the tenant and before users have access to it, regardless of which license they have.

The screenshot shows the Microsoft 365 Admin Center interface. On the left, there's a navigation sidebar with links like Home, Copilot, Users, Devices, Teams & groups, Roles, Resources, Billing, Support, Settings, Setup, Reports, and Health. Under Admin centers, there are Security, Compliance, Endpoint Management, Identity, and Exchange. The main content area is titled "Copilot Control System" and includes a sub-header "Manage everything related to Copilot. View insights about how people are using and learning about Copilot, assign licenses, find training, change settings, and more." Below this, there are four tabs: Overview, Health, Discover, and Settings, with Settings selected. A table lists various Copilot-related items with columns for Name, Description, and Applies to. Some items are marked with a red X. At the bottom right of the main content area, there are "See also" links for Microsoft privacy statement and Profile cards in Microsoft 365, along with "Cancel" and "Save changes" buttons.

Copilot Agents: Status Report with Project Manager Agent in Planner

The Project Manager agent now automates the creation of status reports for more efficient progress tracking and sharing.

The screenshot shows the Microsoft Planner interface. On the left, there's a sidebar with icons for Activity, Chat, Calendar, Calls, OneDrive, Copilot, and Apps. Under 'Copilot', the 'Planner' icon is highlighted. Below the sidebar, there's a 'Pinned' section with several items: 'Marketing plan' (Van Arsdel > General), 'Website Redesign' (Design Team > General), 'Monaco' (Product Team > General), 'Simple plan' (Design Team > General), 'Manager 1:1 topics', 'Career plan', and 'Weekly design sync' (Meeting). At the bottom of the sidebar is a button labeled '+ New Plan'. The main area shows a 'My plans' navigation bar with 'Marketing plan' selected. Below it are buttons for 'Grid', 'Board', 'Timeline', and 'Reports'. A callout box says 'Share a status report with your team. Let Project Manager draft it for you in minutes.' with a 'Generate' button. A list titled 'Recent reports: 5 items' shows five entries: 'Weekly Marketing Status Report 11/21/2024' (Nov 14 - 21), 'Engineering updates 11/18/2024' (Nov 1 - 18), 'Design team sync' (Oct 15 - 31), 'Status report 9/30/2024' (Sep 1 - 30), and 'Status report 8/31/2024' (Aug 16 - 31).

Microsoft 365 Copilot in mobile apps: Advanced Data Analysis in Copilot Chat

Advanced Data Analysis (Code Interpreter)

is an advanced tool designed to solve complex tasks through the generation and execution of Python code.

- It leverages the reasoning model to write and execute code, providing users with the ability to solve complex math problems, analyze data, generate visualizations in Copilot Chat mobile apps.

The figure consists of three side-by-side screenshots of the Microsoft 365 Copilot Chat mobile application interface, all showing the time as 12:15 and a battery level of approximately 50%.

- Screenshot 1:** The user asks to "Evaluate the contour integral: \$|Z|=1 e^{zz^2+1} dz\$". The AI responds with the integral formula, explains the residue theorem, and provides the evaluated result: $\oint_{|z|=1} \frac{e^z}{z^2 + 1} dz = 2\pi i \sum \text{Res}(f, z_k)$.
- Screenshot 2:** The user asks to "Plot y=sin(x)". The AI generates a plot of the sine wave from x=0 to x=2π, showing oscillations between -1 and 1.
- Screenshot 3:** The user asks to "Generate a sample dataset to csv". The AI generates a sample dataset and saves it to a CSV file, providing a download link: [Download sample_dataset.csv](#). It also lists the columns of the dataset: Name, Age, City, and Salary.

Viva Goals: Optional in-product retirement announcement banner

Microsoft Viva Goals will retire, and an in-product banner can be enabled to inform users of its retirement.

Admins can activate the banner via General tenant admin settings in the Viva Goals portal.

The screenshot shows the Microsoft Viva Goals admin portal interface. On the left, there's a vertical sidebar with icons for Activity, Chat, Teams, Calendar, Calls, Files, and Viva Goals (which is currently selected). The main content area has a header 'Viva Goals' with 'Home' and 'About' tabs. Below the header, it says 'Join Organizations'. There are three cards: 'Create new organization' (with a plus sign icon), 'Arrow, Inc' (owned by Lisa Rheo, 3.2k members), and 'Ally' (owned by Leo Jordan, 3.2k members). A red box highlights the top right corner of the screen, which contains the text 'Viva Goals admin portal' and a small gear icon.

Viva Learning

Viva Learning: Academy auto-save and drafting functionality

Changes you make to new, draft, or published LPs are **now saved automatically in the background**.

In addition, your updates are **now saved in a draft state** while editing a published LP until you are ready to publish.

The screenshot shows the Viva Learning Admin interface. The left sidebar has a 'Manage academies' section highlighted. The main area displays the 'PM academy' details, including its title, description, logo, and permissions. It also shows a 'Featured set' (Product Management Journey) and a 'Profile card' (optional) which is currently enabled. The 'Academy structure' section lists four main sections: 'Career in product management', 'Starting Out', 'Developing Core Skills', and 'Developing Specialist Skills'. Each section has a 'Learn more' link and standard edit, delete, and refresh icons.

Viva Glint: Include missing survey takers

This feature enables a Glint Admin to **create surveys for participants who were not originally included in a live survey.**

- With this update, the admin can modify the distribution list within the survey program settings and generate surveys for the newly added participants.

The screenshot shows the 'Distribution Lists' page in the Viva Glint web interface. At the top, there's a navigation bar with links for 'Dashboard', 'Focus Areas', 'My Surveys', and 'Reports'. On the right side of the header are several small icons. Below the header, a search bar is labeled 'Search Distribution Lists' with a magnifying glass icon. To its right is a blue button with a plus sign and the text 'New Distribution List'. The main content area is titled 'Distribution Lists' and contains a table. The table has three columns: 'Name ↑', 'Members', and 'Membership Type'. There is one row in the table with the following data: 'Cost Centre' under 'Name', '453' under 'Members', and 'Manual' under 'Membership Type'. At the bottom of the table, it says 'Untitled Distribution List Aug 28 2023 01:58:42 pm' and '0' members.

Viva Engage: Organizers reply privately to individuals

Engage event organizers will soon be able to answer questions from specific attendees without displaying the reply to the other participants.

- This capability can be helpful for sensitive questions, personal inquiries, or follow-up discussions that are not intended to be broadcast to the entire audience.

The screenshot shows a Viva Engage interface for an "AMA" (Ask Me Anything) event. At the top, there's a banner with a photo of a woman and text indicating the event runs from Sept 18, 10:00 AM to Sept 19, 5:00 PM, and mentions "Viva reorg AMA". Below the banner, there are tabs for "In review", "Published" (which is selected), and "Dismissed". A search bar is at the top right. The main area displays a list of questions from attendees. The first question is from "Celeste Burton" (Apr 2), asking about work-life balance. The second question is from "Joshua Vanburen" (Apr 2), which is partially visible. Below each question, there are buttons for "Like", "Comment", "Share", and a "Reply to this question" button. A "View question to see 4 more comments" link is also present. The interface has a clean, modern design with a light blue header and a white background for the content area.

Teams Phone: New Queues app service plan for GCC-High and DoD

The Queues app for Microsoft Teams will be listed as a service plan under the Teams Premium license.

- Admins can enable or disable access to the Queues app via the new service plan.

This is to prepare for the GCC-High and DoD release of the new voice applications settings for authorized users. The new settings will allow admins to configure voice applications policies so that authorized users with Teams Premium licenses can do the following:

- Configure their call queues and auto attendants using Teams settings
- Opt in or opt out team members from a call queue to optimize for business needs

The screenshot shows the Microsoft Teams Admin Center interface. On the left, there's a navigation pane with 'Home', 'Licenses', and 'License details'. The main area is titled 'Microsoft Teams Premium' and shows 'You own at least 1 subscription for this product. Manage subscription details'. Below this, there's a section for 'Licenses' with a progress bar showing '4 / 25' assigned licenses. Under 'Users', there's a list of users: Alex Wilber (selected), Grady Archie, Megan Bowen, and MOD Administrator. To the right, there's a detailed view for 'Alex Wilber' with a blue profile picture. It includes a list of services with checkboxes: Microsoft Mesh, Microsoft Teams Premium Intelligent, Microsoft Teams Premium Personalized, Microsoft Teams Premium Secure, Microsoft Teams Premium Virtual Appointment, Microsoft Teams Premium Virtual Appointments, Microsoft Teams Premium Webinar, Microsoft eCDN (disabled), Places Enhanced (disabled), and Queues app for Microsoft Teams (selected). A yellow box highlights the 'Queues app for Microsoft Teams' checkbox.

Teams Devices: Android Open-Source Project (AOSP) Device Management auto updates

Microsoft Teams will **automatically update firmware to migrate Android devices to Intune AOSP Device Management.**

- The schedule for when devices will begin automatically updating can be found here: [Moving Teams Android Devices to AOSP Device Management](#)

These firmware updates cannot be paused after the end of May, and there will be no exceptions to delay the auto-updates further.

- Verify the completion of all prerequisites for AOSP migration to prevent devices from signing out during the process.

AI Assistant

What is the difference between using Autopilot and OTP for room deployment?

Both features are useful in enhancing security and speed of deploying Teams Rooms.

The primary differences are:

- Autopilot**
 - Purpose: Automates and secures the deployment and configuration of Teams Rooms consoles
 - Process: Uses Windows Autopilot and Teams Autologin to set up devices without manual intervention.
 - Benefits: Reduces on-site deployment time by eliminating interaction during initial setup.
- Microsoft Teams Rooms with OTP (One-Time Password)**
 - Purpose: Provides a secure method for initial device setup and authentication.
 - Process: A one-time password is generated in the Microsoft Teams Rooms Pro Management portal and used for a single sign-in session.
 - Benefits: Enhances security by avoiding the need to openly share resource account usernames and passwords, simplifying the initial setup process.

In essence, Autopilot focuses on streamlining and automating the deployment process, while OTP also provides secure, one-time authentication for initial setup. Autopilot is more complex to setup, but can be more efficient for large deployments and redeployment of devices. OTP is easier to setup and is ideal for small to medium deployments.

AI generated content may be incorrect.

What are the trends in this graph? What are my top 5 most unused rooms?

Show me how many rooms were enrolled in the last two weeks, broken down by manufacturer and locations.

Teams Devices: Call quality reports for Bring Your Own Device (BYOD) rooms in the Pro Management Portal

Admins can access detailed **call quality reports for BYOD rooms with associated peripherals** via the Pro Management portal, enhancing diagnostics for network, audio, and video issues.

The screenshot shows the Microsoft Teams Rooms Pro Management portal. The left sidebar has a 'Reports' section selected. The main area is titled 'Reports' and includes tabs for 'Overview', 'Health', and 'Usage'. Under 'Usage', there are several metrics: 80 ROOMS (80), 76 UNUSED ROOMS (76), 0% UTILIZATION (0%), 40 SCHEDULED MEETINGS (40), 100% ONLINE MEETINGS (100%), 39 CALLS (39), 77% CALL PERFORMANCE (77%), and 0 PROJECTIONS (0%). A date range filter 'Last 30 days' is shown. Below this is a table with columns: Display name, Hostname, Utilization, Booked Online, Scheduled Meetings, Total Calls, and Call performance. The table data is as follows:

Display name	Hostname	Utilization	Booked Online	Scheduled Meetings	Total Calls	Call performance
Dantooine Base - 2025 - SH	2025_SH2S	0%	0%	0	8	75%
Dantooine Base - 2025 - MTR	DESKTOP-G480IBI	3%	100%	10	7	85.71%

SharePoint Online

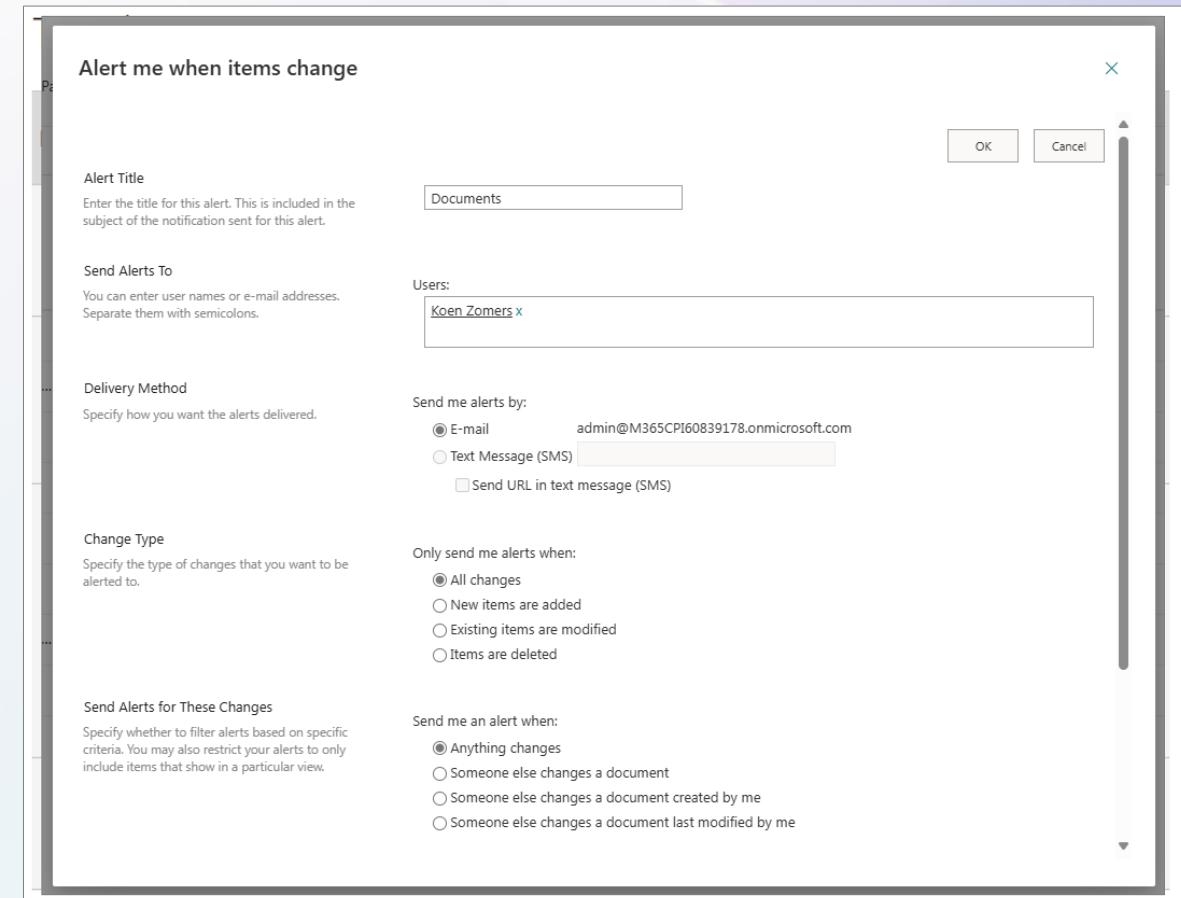

SharePoint Alerts retirement

Microsoft is **retiring the SharePoint Alerts feature** to enhance user notifications with Power Automate.

Organizations should transition their alerts to the Power Automate platform or create SharePoint Rules to ensure continued functionality.

Optical Character Recognition backfill for SharePoint Sites

Tenant admins can select existing SharePoint Online sites and **backfill OCR for documents already present in the library**. This means you no longer need to move all your documents to a new site to ensure they are OCRed and protected.

Only files without OCR will be processed, ensuring efficient use of resources and preventing double charges for unchanged documents. This update streamlines your workflow, making it easier to manage and protect your documents.

Enabling a new Public Content Delivery Network (CDN) domain

Microsoft **SharePoint Online will migrate to a new CDN service**, Microsoft Azure Front Door, introducing a new public CDN domain.

Ensure the new domain is added to your network allow list and avoid hardcoding CDN URLs for seamless integration.

Old domain

publiccdn.sharepointonline.com

New domain

Copilot for SharePoint Admins - General Availability

Copilot in the SharePoint admin center is simplifying administration with features like natural language interaction, contextual Q&A, and multi-variable site search.

Future enhancements include in-context bulk actions, context-aware guardrails, and review settings for smarter governance.

The screenshot shows the SharePoint Admin Center interface. On the left is a navigation pane with icons for Home, Site Collection, Site, App, and more. The main content area is titled "Active sites" and displays a table of site collections. The columns are: Site name, URL, Microsoft Teams, Channel sites, Primary admin, Date Created, and Last activity(UTC). The table lists various sites such as Adele Team, Admin, Apps, Aquisitions, AudienceTargeting, Benefits, Bring your kids to work day, Buildings, Campaign, Central, Communication site, Communications, Competitive analysis team, Conference, and Consumer Retail. To the right of the table is a sidebar titled "Copilot". It includes a search bar for "Find sites...", a "How do I..." link, and a note: "For more suggestions, open the prompt guide by selecting ⓘ". At the bottom of the sidebar is a callout box: "Find site that are potentially over-permissioned." with a gear icon and a checkmark icon.

Site name	URL	Microsoft Teams	Channel sites	Primary admin	Date Created	Last activity(UTC)
Adele Team	.../sites/AdeleTeam	-	-	Global Administrator	4/20/20, 10:25 PM	11/7/25

Power Platform: Enhancements to Power Platform Advisor

Microsoft 365 is upgrading Power Platform Advisor with:

- **New recommendations** for security, licensing, capacity optimization, copilot, performance, and reliability.
- **Contextual recommendations** across various Power Platform Admin Center pages like Security, Copilot, Monitor, Licensing, and Action center.
- The ability to dismiss non-applicable security recommendations.
- Option to **snooze non-security recommendations**.
- **Enhanced weekly email digests** with top recommended actions for admins.
- **Relevant recommendations** for Power Pages, Power Apps, and Power Automate makers in their respective portals.

The screenshot shows the Microsoft Edge browser with the URL <https://admin.powerplatform.microsoft.com/home>. The search bar contains 'advisor'. The main content area is titled 'Welcome, Koen' and features a green banner stating 'Welcome to the new Power Platform admin center' which includes everything from the original admin center plus new deployment and monitoring features. Below this is a sidebar with icons for Home, Actions, Manage, Security, Copilot, Monitor, Deployments, Licensing, Support, and Admin centers. The main content area has a yellow box highlighting the '6 recommendations' section. This section lists:

- 2 app(s) in the tenant do not have valid owners [View details](#)
- 252 app(s) have not been used in last 60 days [View details](#)
- Protect 1 high value app(s) with premium security and governance features [View details](#)
- 3 app(s) are shared with Everyone, including guest users [View details](#)
- Tenant isolation [View details](#)

Power Platform admin center: Set a default deployment pipeline for development environments

Admins can now instantly **associate development environments with a pipeline** in the Power Platform admin center for centralized governance. No action is required.

The screenshot shows the Microsoft Edge browser displaying the Power Platform Admin Center at <https://admin.powerplatform.microsoft.com/home>. The page features a dark header with the URL and a light-colored main area. On the left, a vertical sidebar lists navigation options: Home, Actions, Manage, Security, Copilot, Monitor, Deploym..., Licensing, Support, and Admin centers. The main content area is titled "Welcome, Koen" and "Welcome to the new Power Platform admin center". It includes a green banner stating: "It includes everything from the original, plus exclusive new deployment and monitoring features, enhanced search, and so much more." A "See what's new" button is visible. Below the banner, there are buttons for "Add cards" and "Share feedback". An "Advisor" section displays a message: "Recommendation may show for up to a week once acted on." A large search icon is present. At the bottom, a message says "There are no recommendations at this time". Navigation links for "Service health" and "Documentation" are at the bottom right, along with three dots.
