Microsoft 365 admin center: Teams app versions 1.12 and earlier will no longer appear in the Microsoft 365 admin center

Teams apps below version 1.12 will be removed from the Integrated apps view in the Microsoft 365 admin center but will remain manageable in the Teams admin center.

Consider updating these apps to version 1.12 or higher if your organization relies on the Microsoft 365 admin center for app visibility.

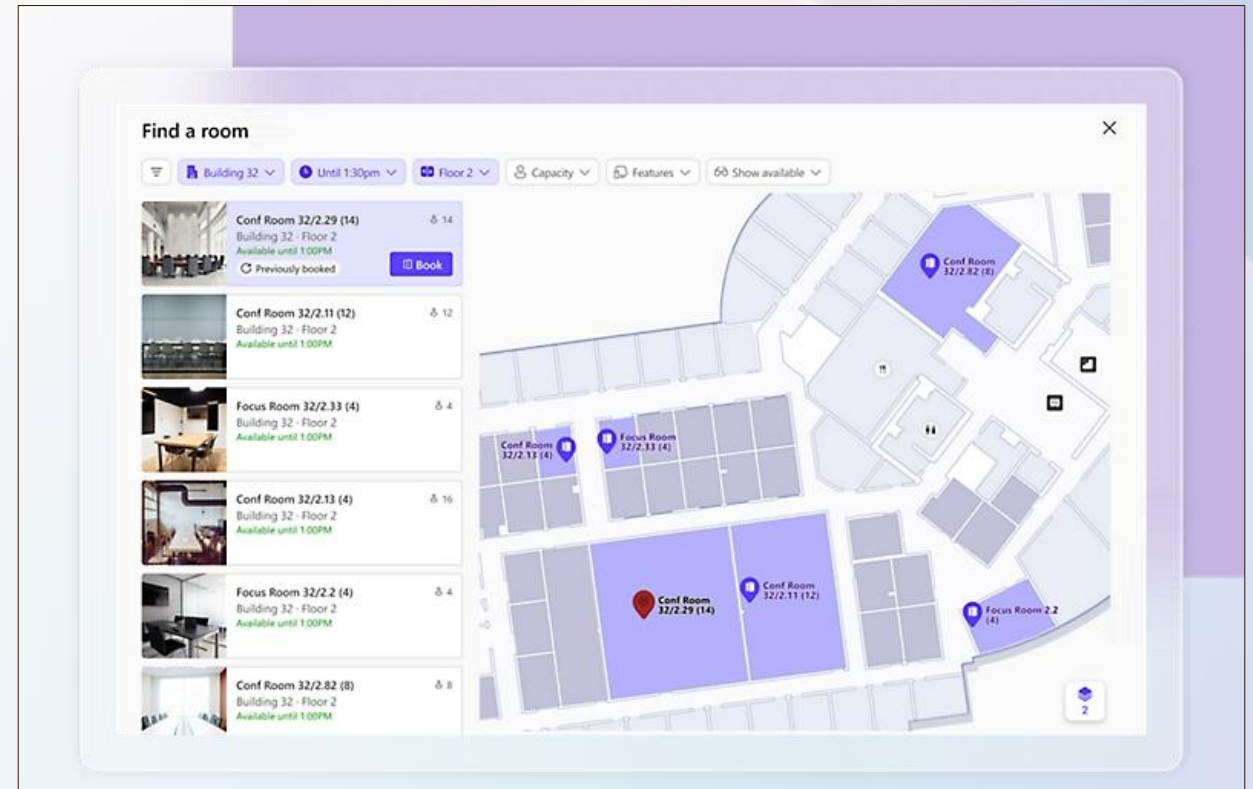

Microsoft Places: New map-based desk booking experience in Microsoft Places

Microsoft Places introduces a **map-based desk booking experience** enhancing usability with features like interactive floor maps, colleague proximity visibility, partial-day reservations, and executive assistant delegation.

To enhance the user experience, **administrators should consider uploading floor maps** and communicating the update to users.

For reference only: Map-based desk booking in Microsoft Places

Microsoft Edge: AI-powered History search now available

Microsoft Edge is enhancing **its History search with AI to assist users in finding previously visited sites** using synonyms, natural language, and minor typos locally on their device. **This setting will be on by default.**

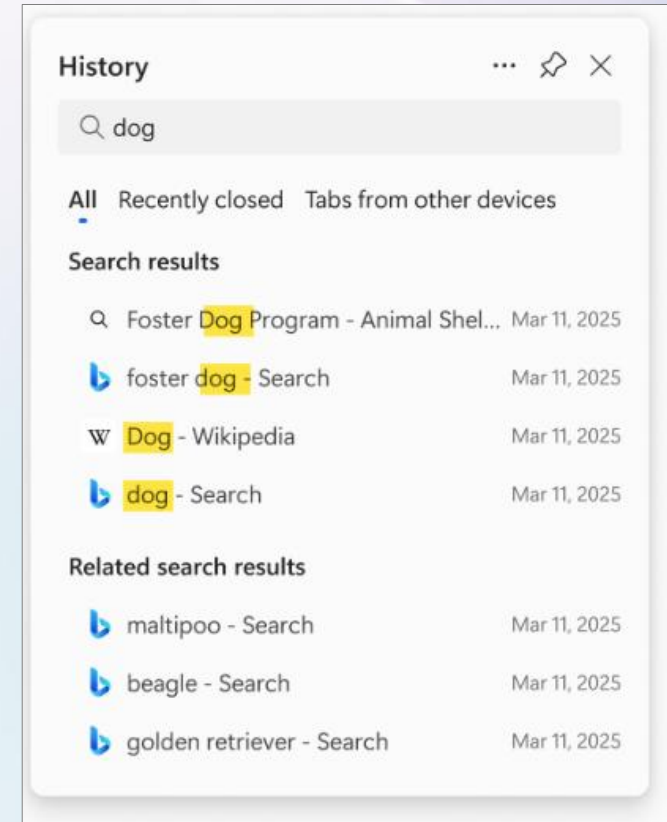

Admins should review Edge policy configurations to manage this feature using the **EdgeHistoryAISearchEnabled** policy.

AI-powered History search

We'll show AI-powered results whenever you search your browsing history.

"Enable history search assisted with AI" toggle in Microsoft Edge

New AI-powered History search experience in Microsoft Edge

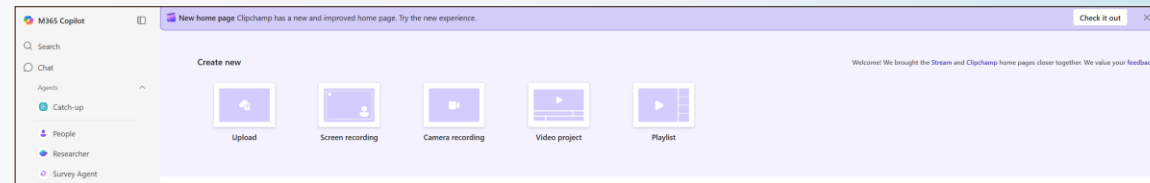

Microsoft Clipchamp: Video hub start page update

Microsoft is introducing a **streamlined Clipchamp video hub start page with AI-powered features** for video creation, discovery, and consumption.

No immediate action is required, but admins should review configurations and notify users about the changes.

Video hub start page update in Clipchamp

Launched

Microsoft Places: Graph API support
for directory objects

[MC1133514](#) |
[488101](#)

Microsoft Graph API now supports full CRUD operations for managing Microsoft Places directory objects, enabling seamless data management for locations. Organizations may consider using these APIs for efficient data onboarding and integration with third-party systems.

August 2025

Microsoft 365 admin center: Email notifications for service health issues available in multiple languages

[MC1091448](#)

Microsoft 365 will soon send service health email notifications in admins' preferred language, enhancing accessibility and understanding of critical issues. No action is required, but reviewing notification preferences may be beneficial.

August 2025

Microsoft Graph Metered API Update	MC1122144	Microsoft Graph is changing its billing for certain Teams APIs to eliminate metered charges. No action is required from customers, and billing changes will reflect in the normal billing schedule.	August 25, 2025
Microsoft 365 admin center: New Multi-admin notifications for Microsoft 365 Backup	MC1102791 464993	Microsoft 365 is introducing multi-admin notifications for Microsoft 365 Backup, enabling centralized alert configurations for key stakeholders regarding backup events and actions. Admins need to configure the notification list to activate email alerts for relevant backup activities.	August 2025
Information Barrier support in Planner	499077	Information Barrier (IB) support in Microsoft Planner will enable organizations to restrict access to plans and tasks based on user groups. IB will help prevent data leakage, enforce internal policies, and support regulatory mandates by limiting plan visibility and collaboration to authorized segments.	September 2025
Credential management requires additional MFA Prompt for enhanced security	MC1135479	A Data Privacy message is available in the Message Center for review by a Global Administrator or Message Center Privacy Reader. Sign in to the admin center to view the message details.	September 15, 2025
Updates to user and group assignment views on the Microsoft 365 admin center	MC1102762	Microsoft is updating the admin center to improve the clarity and performance of product licensing by distinguishing direct license assignments from group-based licenses. Review your internal documentation and processes to accommodate the new layout displaying license assignments separately in User and Groups tabs.	September 2025

Copilot Extensibility: Admins can manage ownerless Copilot agents with new lifecycle controls

Introducing a feature for admins to **identify and manage Copilot agents without valid owners**, enhancing security and governance.

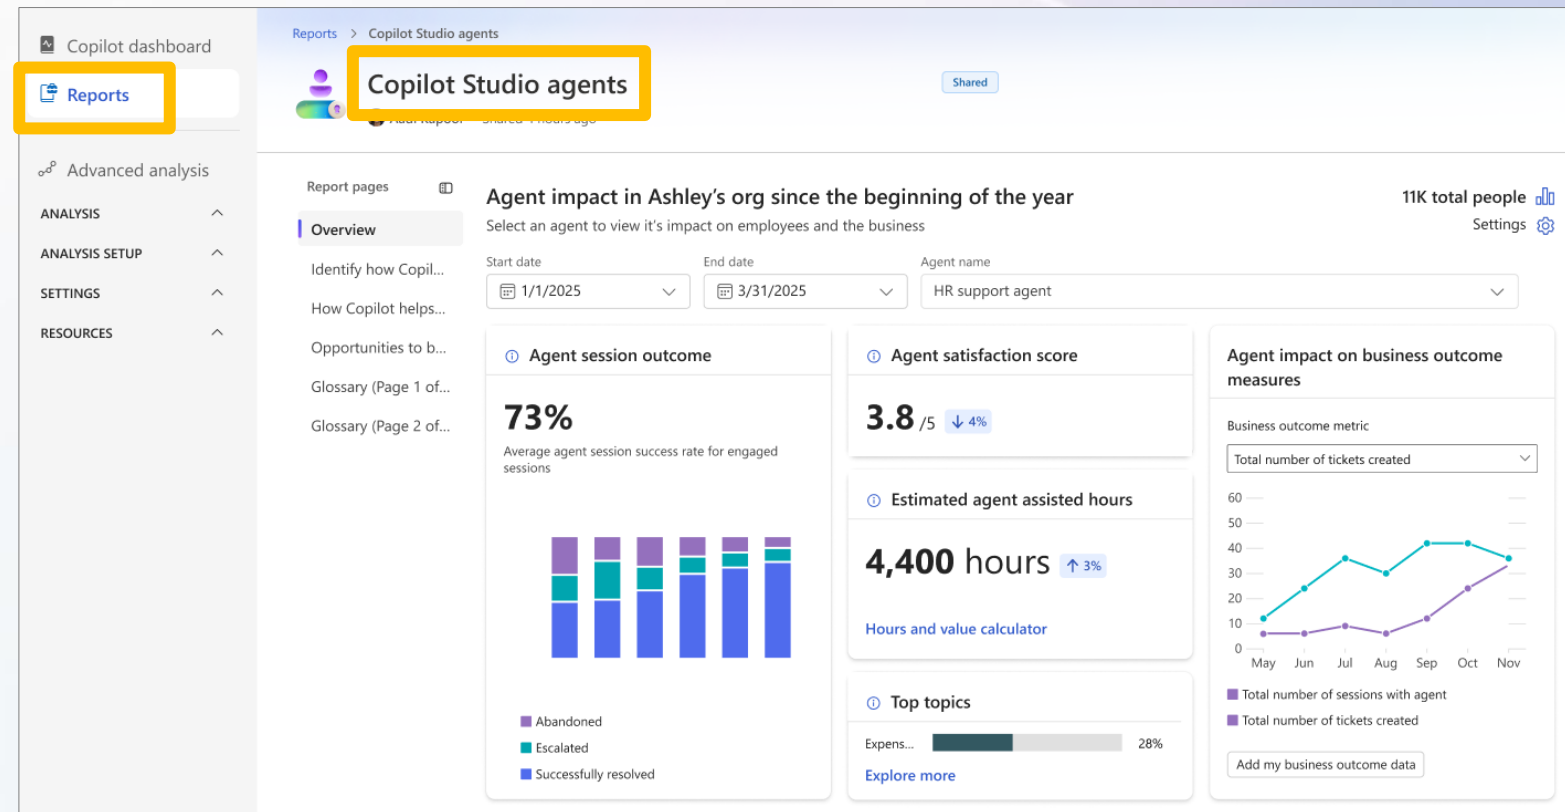

Copilot Dashboard in Viva Insights: Analyze business impact of Copilot studio agents

Microsoft 365 is introducing a feature in Viva Insights that **allows Insights Analysts to analyze the business impact of Copilot Studio agents** through aggregated reports.

Key metrics include:

- **Hours saved**
- **Usage analysis**
- **Resolution rate**
- **ROI indicators** like cost reduction and revenue increase

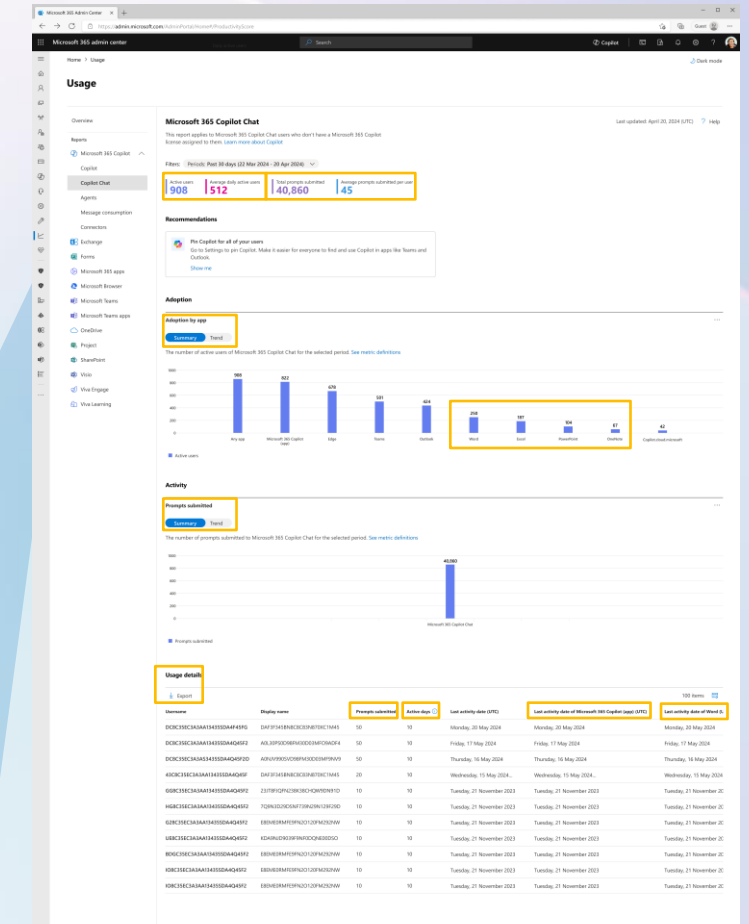

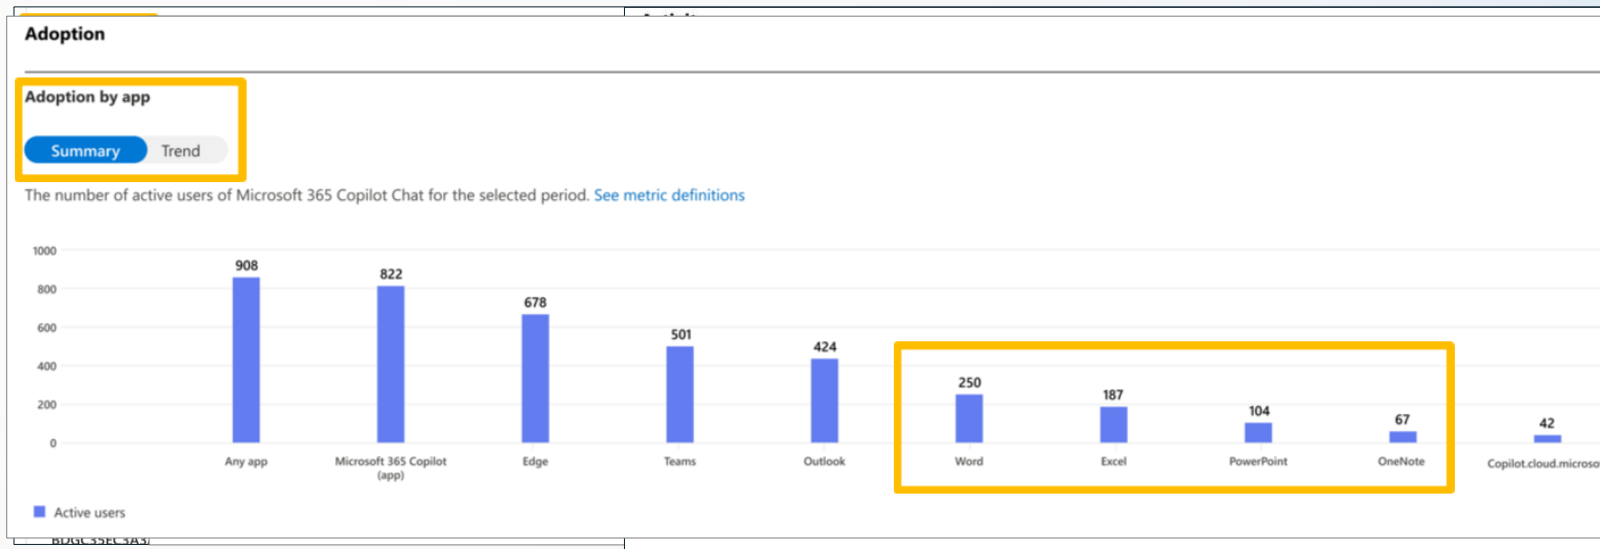

Copilot Analytics: Copilot Chat usage in Word, Excel, PowerPoint, and OneNote now included in Copilot Analytics

Copilot Analytics reports will now include usage data for Copilot Chat in Word, Excel, PowerPoint, and OneNote, offering a more complete view of usage across these apps.

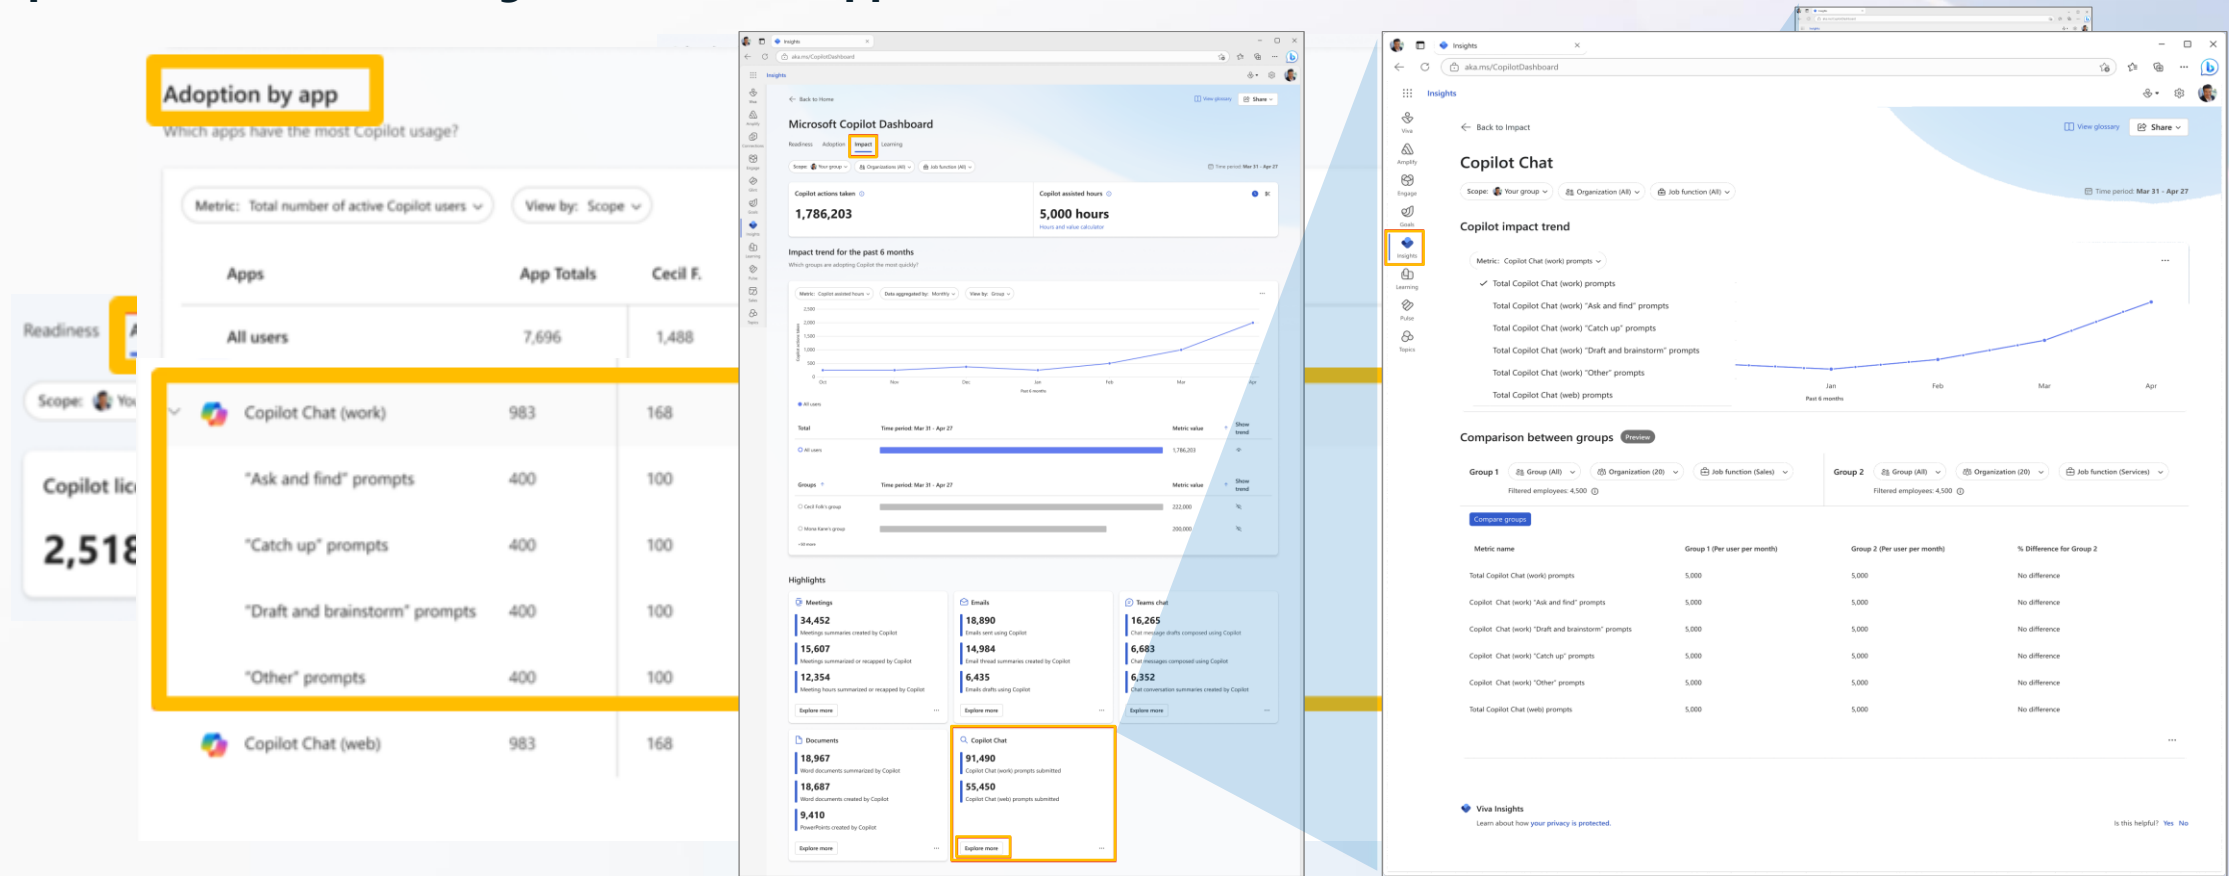

- These insights help organizations monitor adoption, identify usage hotspots, and inform licensing and enablement strategies for Copilot Chat.

Copilot Dashboard in Viva Insights: New prompt categories for Copilot Chat (Work)

The Microsoft Copilot Dashboard in Viva Insights will soon feature **prompt categories** to help admins understand key Copilot use cases, including metrics in the app.

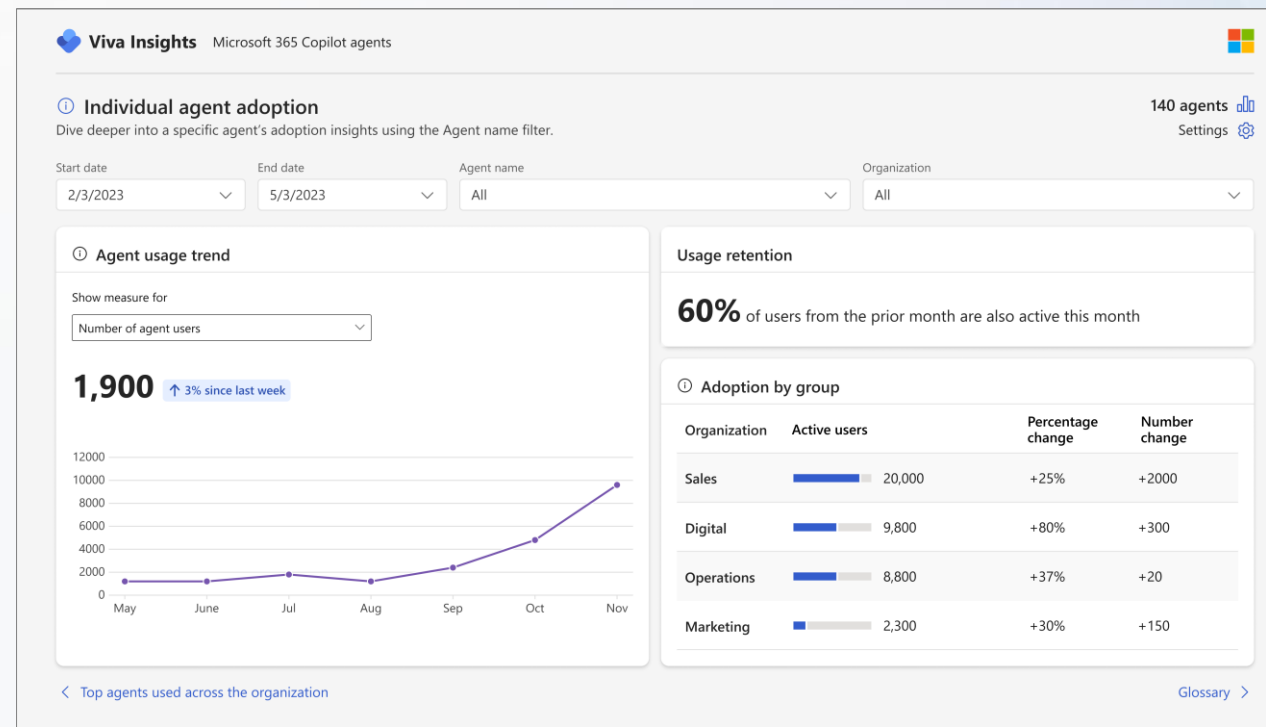

Copilot Dashboard in Viva Insights: New Power BI report for Microsoft 365 Copilot agent metrics

We're introducing the Microsoft 365 Copilot agents report, a **new Power BI report available in Microsoft Viva Insights**.

- This report provides **visibility into the usage of declarative agents (Agent Builder agents)**, which extend Microsoft 365 Copilot capabilities and **enables leaders and admins to understand adoption trends** across their organization and explore usage patterns for individual agents.

Copilot Agents: Project Manager Agent with SharePoint site grounding

Microsoft Planner's Project Manager agent can now **use encrypted SharePoint files for improved task management.**

The image displays two overlapping screenshots. The background screenshot shows the Microsoft Planner interface for 'Contoso Electronics'. The 'Project Manager Plan' is selected, showing a list of tasks for achieving a publishing process. The foreground screenshot shows the SharePoint interface for the same site. A yellow box highlights the 'Open SharePoint folder' button in the Planner's top bar, and another yellow box highlights the 'Documents > Microsoft Planner' path in the SharePoint left sidebar. The SharePoint main area shows a document list with a file named 'msxrm_org949c060a.crm.dynamics.com_f9079fdb-09fb-44b5-94ef-5c2e2e2783c7'.

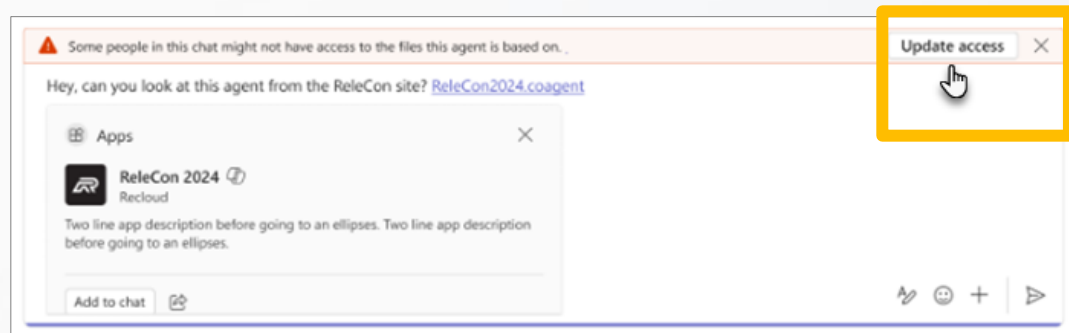

This enhancement enables the agent to utilize encrypted files from the SharePoint site associated with the Microsoft 365 group of the Plan for grounding

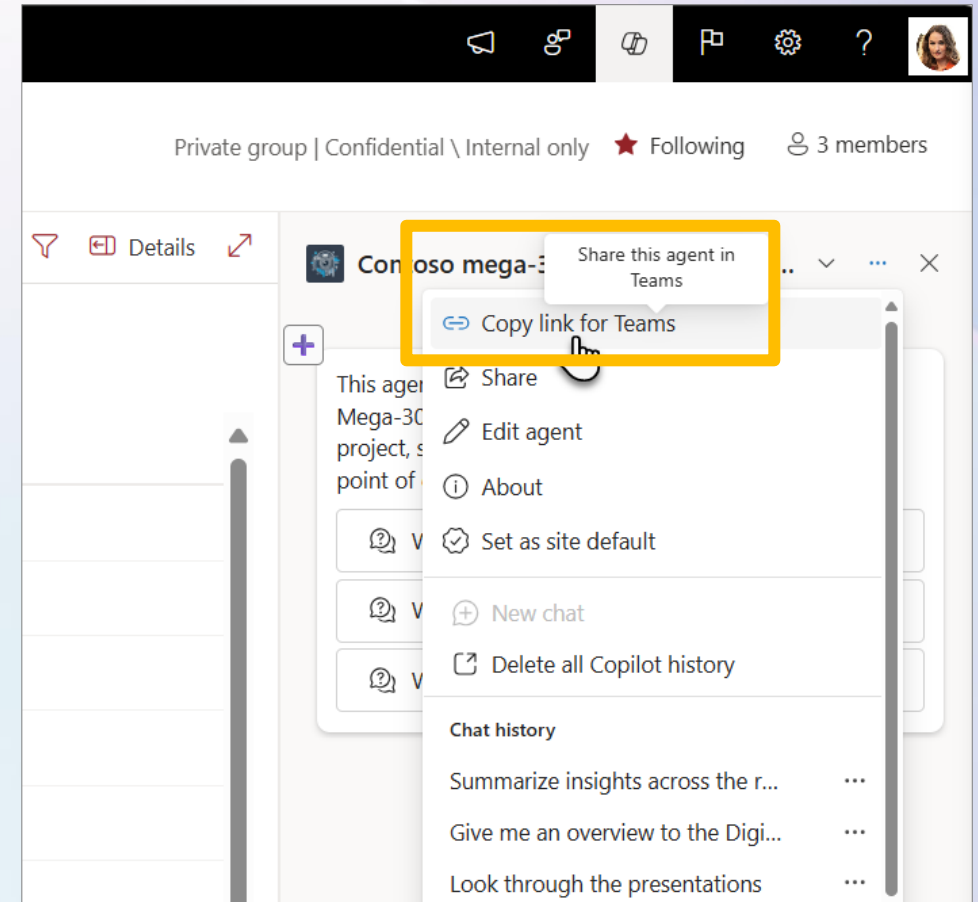

Copilot Agents: Interact with SharePoint content in Teams channels using agents

Microsoft Teams will **introduce SharePoint agents in Channels**, allowing users to interact with SharePoint content via @mentions for efficient summaries and file discovery.

You can select "Update access" to give users access to the files that the agent is based on

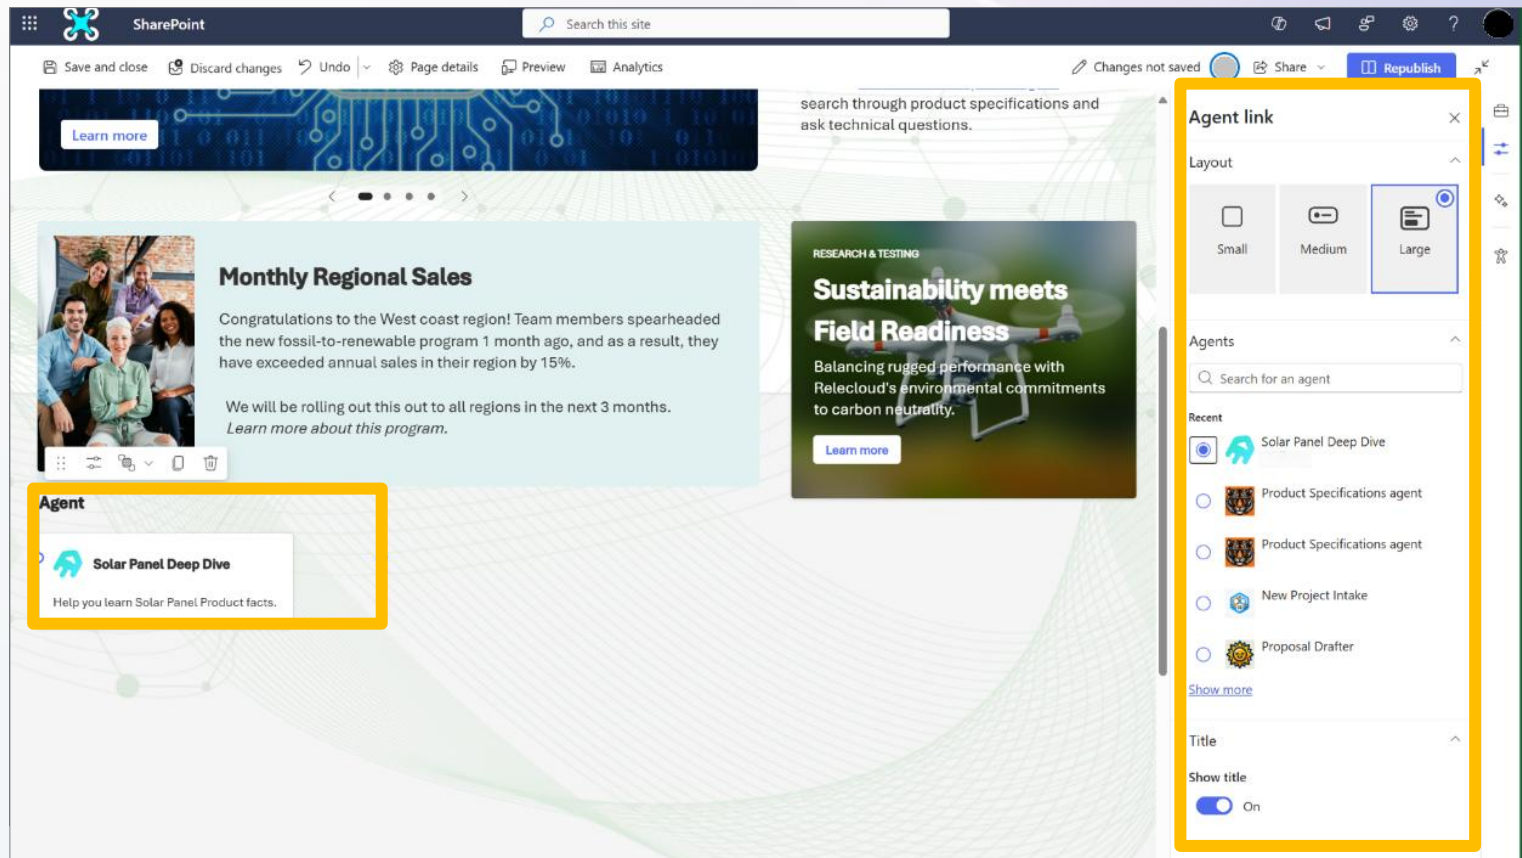

Showing the experience of sharing a SharePoint agent to Teams

Copilot Agents: New “Agent Link” web part in SharePoint

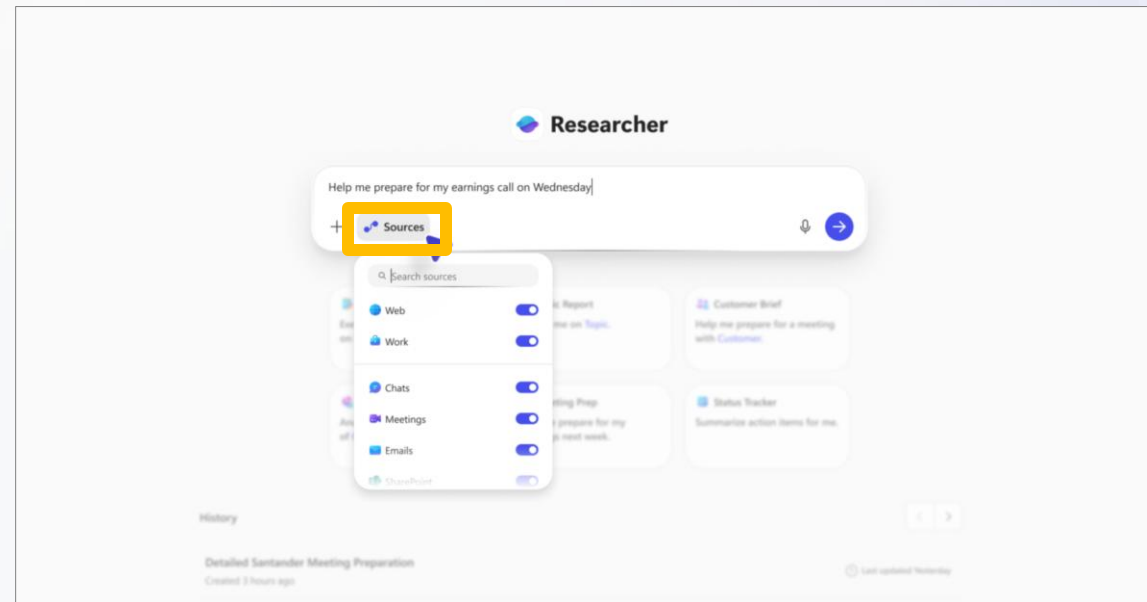

Introducing the **Agent Link web part for SharePoint**, enabling site owners to embed clickable links to AI agents for improved contextual assistance.

Copilot Agents: Source controls for Researcher Agent

Introducing **Source Controls for the Researcher Agent**, allowing users with Copilot licenses to **select specific sources for research**, enhancing user-level control over Web, Work, and Connector sources.

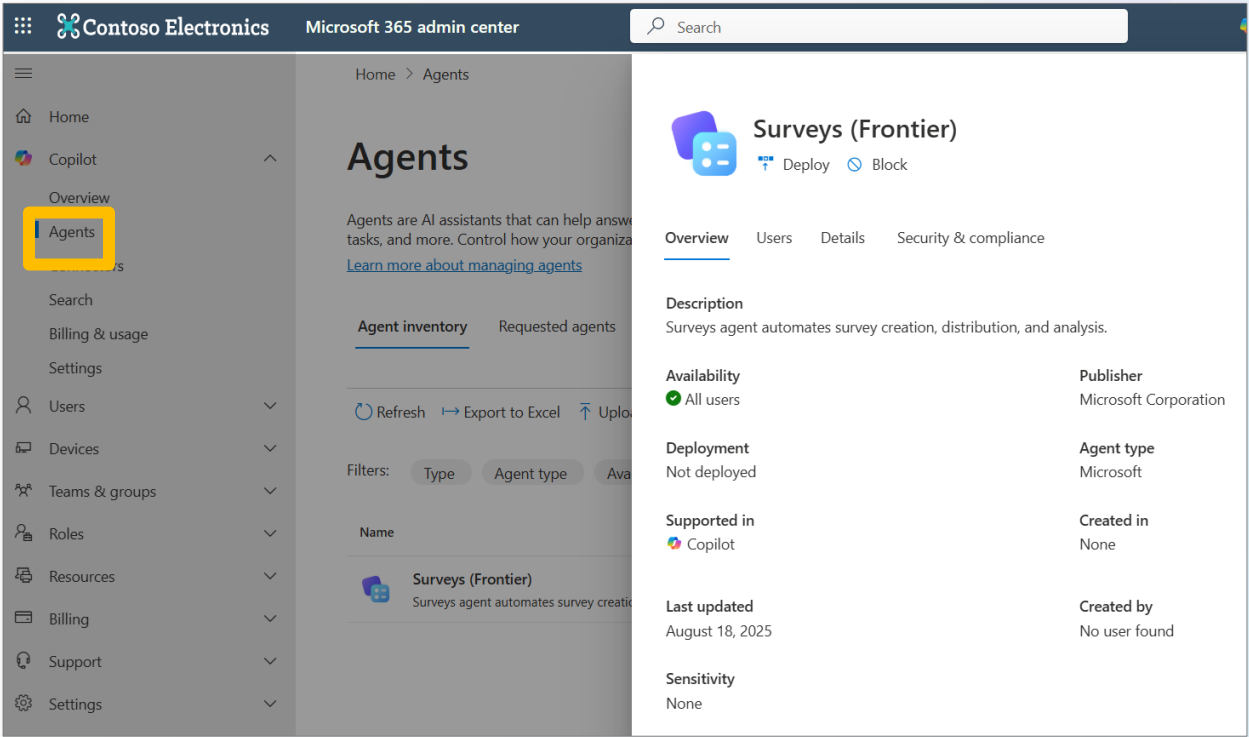

The Source Control will appear on the Prompt box as a button across the Microsoft 365 Copilot app, Teams, and Outlook entry points for Researcher

Copilot Agents: Build and analyze surveys with Surveys Agent in Microsoft 365 Copilot

Surveys Agent, a new Copilot agent in Microsoft 365, enables users to create, distribute, and analyze surveys seamlessly through chat, enhancing productivity by automating the survey process.

Copilot in Outlook: Chat now available to summarize emails for more users

Outlook introduces a new feature allowing users to **quickly summarize email threads using Copilot chat**, enhancing productivity by providing concise insights directly from the reading pane.

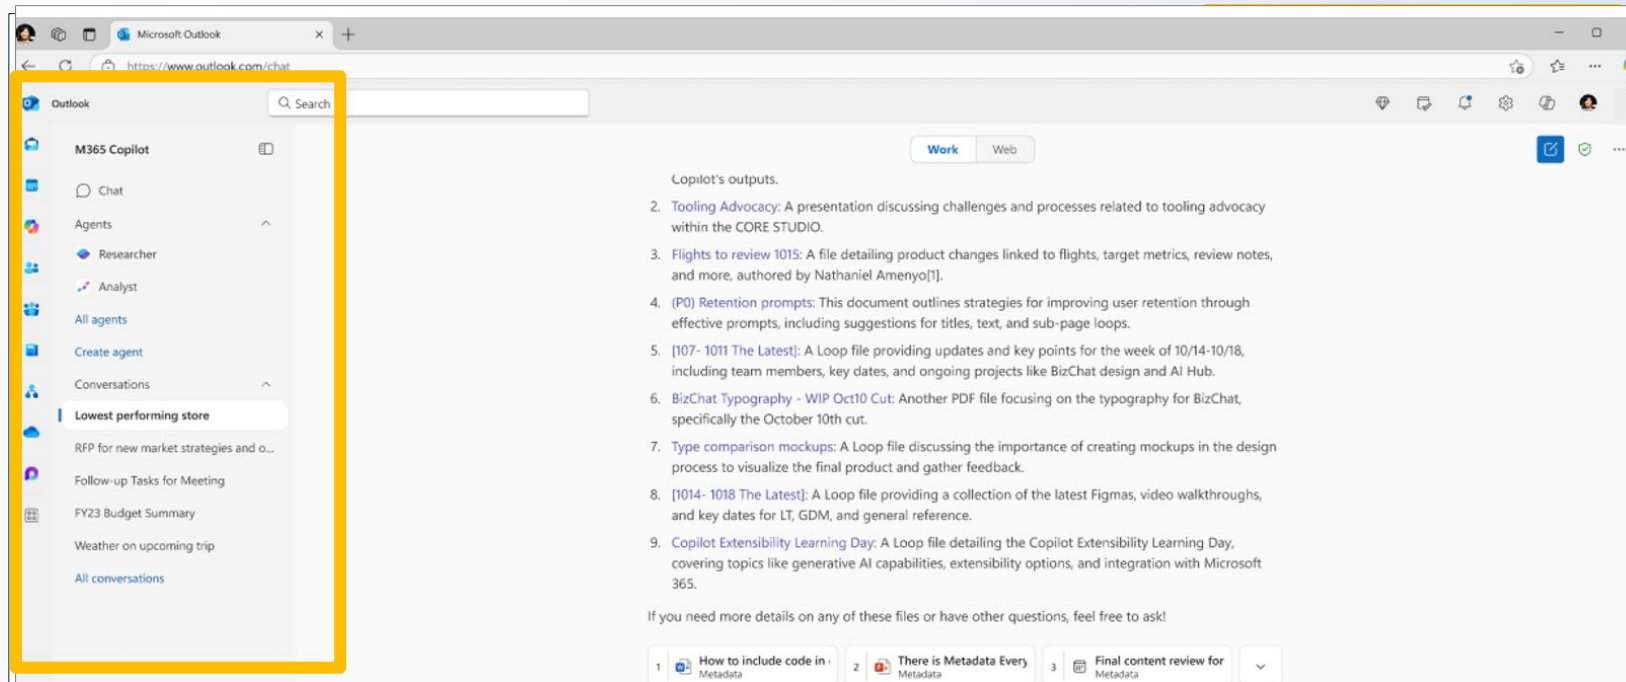

The screenshot displays the Outlook interface. The main pane shows an email thread titled "New Product Requirements" from John McClane to Jadzia Dax. The email body includes two attachments: "QualityAssuranceProcess.docx" and "Sample Vendor Contract.docx". The thread history shows a reply from Jadzia Dax asking for financial figures, followed by a response from John McClane. On the right, the Copilot chat sidebar is open, showing a prompt: "Can you please summarize this email thread for me?". Below the prompt, Copilot provides a summary of the email thread, noting that the content is protected and cannot be summarized directly. It offers two options: forward or copy the email content, or let Copilot guide the user through extracting key points. At the bottom of the sidebar, there is a "Message Copilot" input field and a disclaimer: "AI-generated content may be incorrect".

Copilot in Outlook: Updated Copilot Chat interface with new conversation view

The Outlook Copilot Chat interface is **updated with the navigation pane moved from right to left**, aligning with other Microsoft 365 apps. It includes access to agents, conversation history, and a new All Conversations page.

Copilot in Outlook: Enhanced search experience with Copilot across Web, Mac, and Mobile

Microsoft 365 is introducing Immersive Search in Outlook, which integrates AI-generated summaries through the Copilot side pane, enhancing productivity by summarizing emails, Teams messages, and documents.

No action is required, but informing users about this new feature is recommended to prevent confusion.

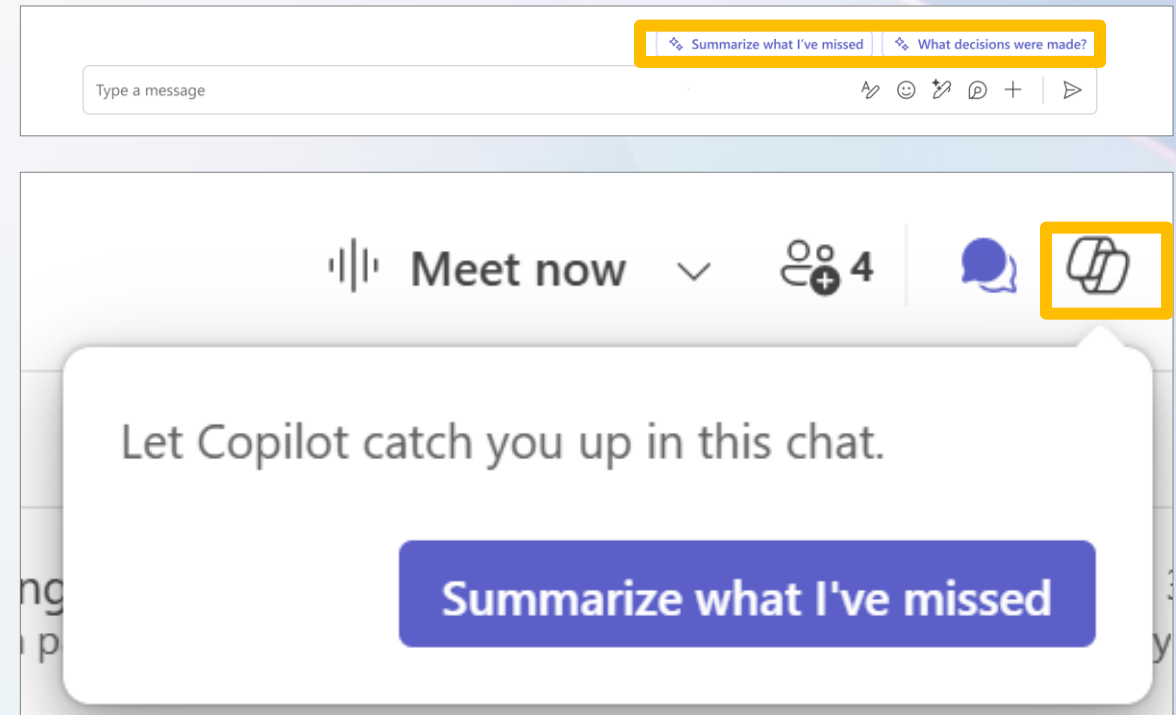

Copilot in Teams: Retirement of the Smart Actions and Group Chat Coachmark features

Microsoft Teams is **retiring several smart actions in Teams Chat Copilot and the Add to Group Chat Coachmark** to focus on new features for chat efficiency.

The following smart actions will be removed from Teams Chat Copilot:

- *Summarize what I missed*
- *What are the open items?*
- *What decisions were made?*

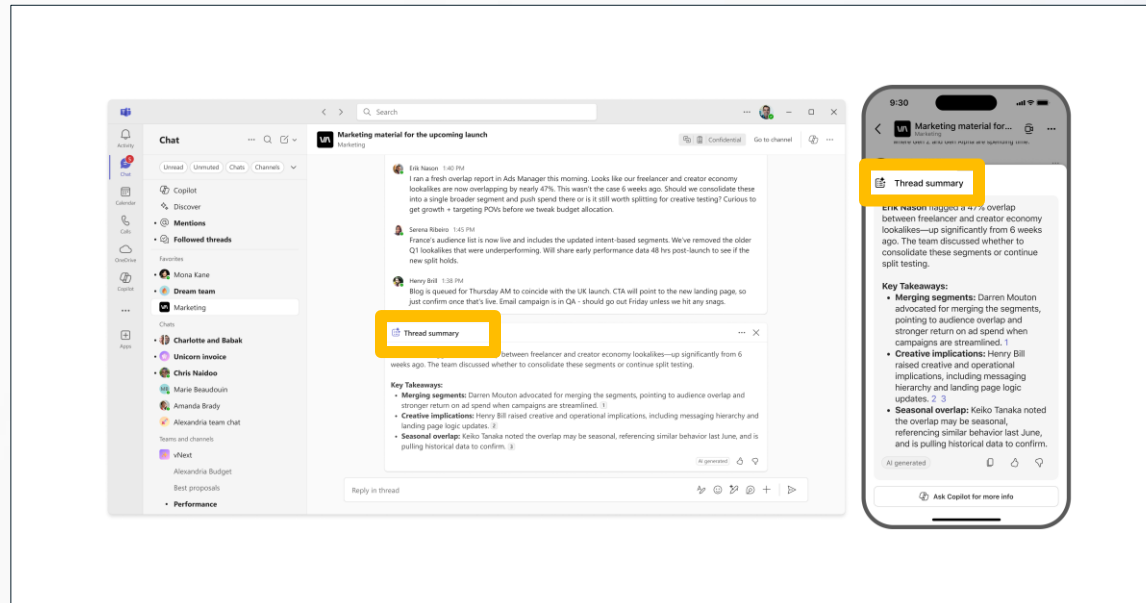

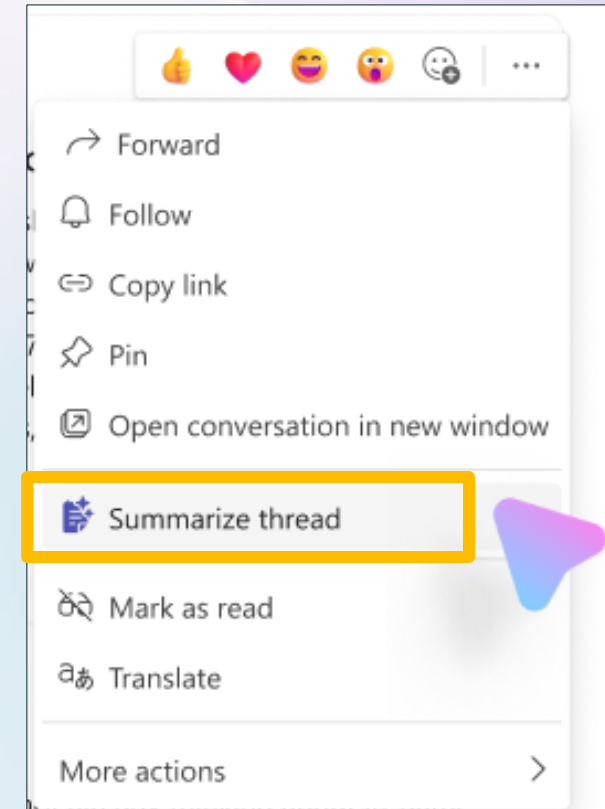

Copilot in Teams: “Summarize thread” replaces “Highlights from this conversation” in post/reply channels

The thread summarization feature in Microsoft 365 is being updated to replace "Highlights from this conversation" with "Summarize Thread."

- This update enhances the summarization process and offers a consistent experience across channel types.

Your summary shows up on both desktop and mobile

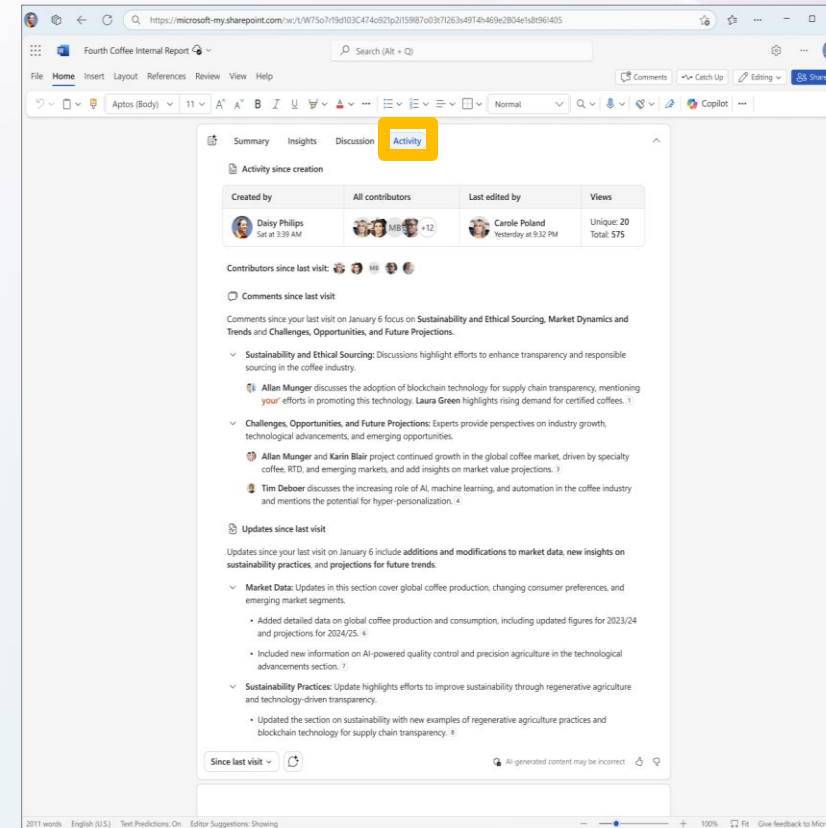

Find the Summarize Thread option in the More Options menu if there are a minimum of 1000 characters in a conversation

Copilot in Word: View recent activity in Word with Dynamic Document Snapshot

The new Activity tab in Word's Copilot summary offers a dynamic snapshot of recent comments and edits, enhancing document awareness and collaboration.

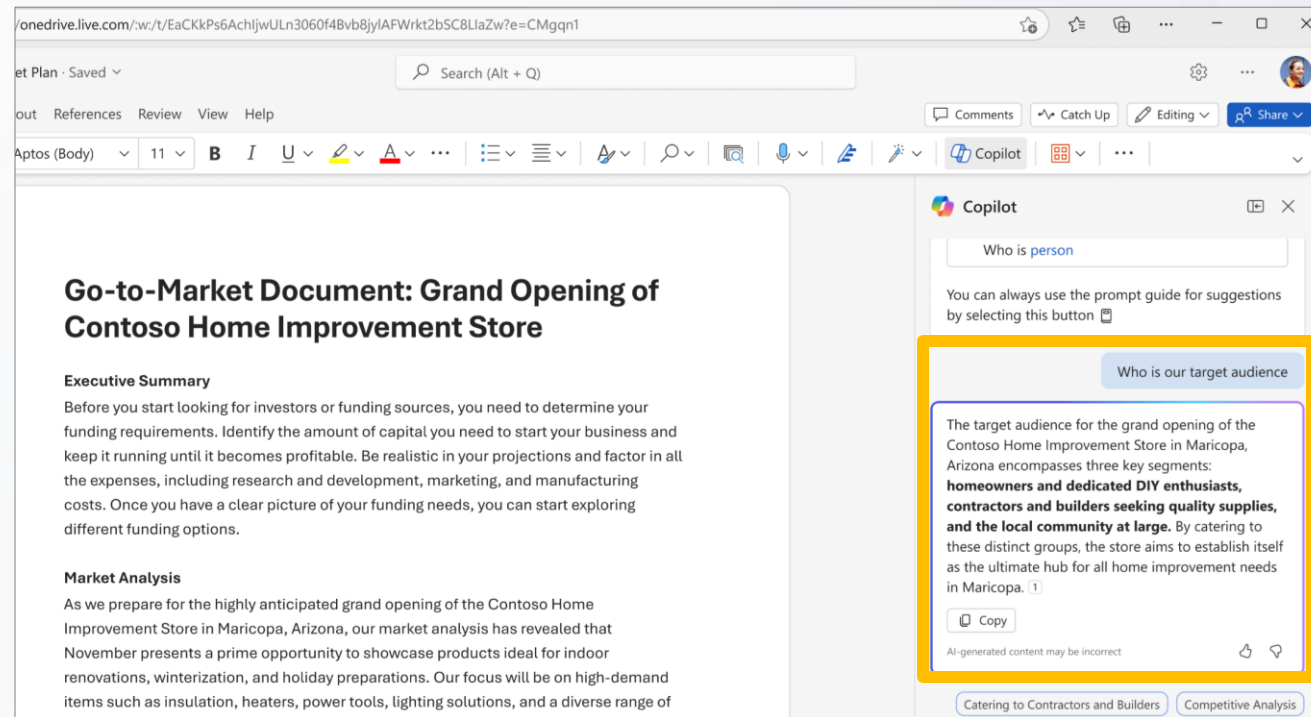

Showing a view of recent edits and comments in Word, available through the new Activity tab in the Copilot summary for quick document insights

Copilot in Word: Create, edit, and transform content directly from chat

We're introducing new capabilities in Microsoft 365 Copilot in Word that **enhance how users interact with Copilot to create and refine content**.

For reference only: The current Copilot Chat experience in Word does not allow users to interact with Word in the active document from the Copilot Chat pane

Copilot in PowerPoint: Enhanced presentation creation quality with Microsoft 365 Copilot

Microsoft 365 Copilot is enhancing presentation creation by **generating richer content, narrative flow, structure, and design, linked to OneDrive for easy access.**

- Cross-functional product launches

7. Conclusion

- Recap key takeaways
- Call to action: how your audience can apply these insights

Microsoft 365 Copilot Mobile App: Bottom tabs removal and default land to Chat

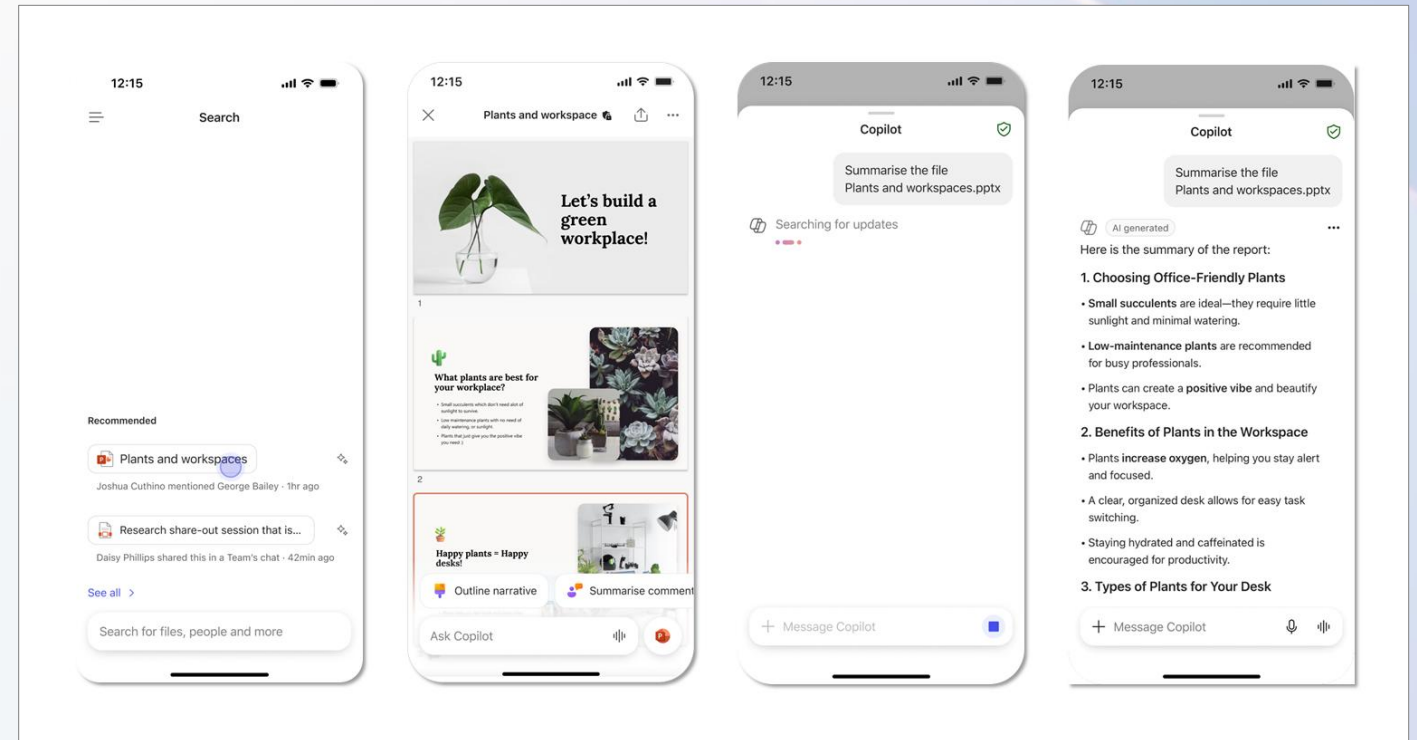

Microsoft 365 Copilot mobile app will remove bottom tab navigation, **making Copilot Chat the default experience for those with access**, while other app features will be accessible through the hamburger menu.

Microsoft 365 Copilot Mobile App: Streamlined file preview and Copilot Chat experience

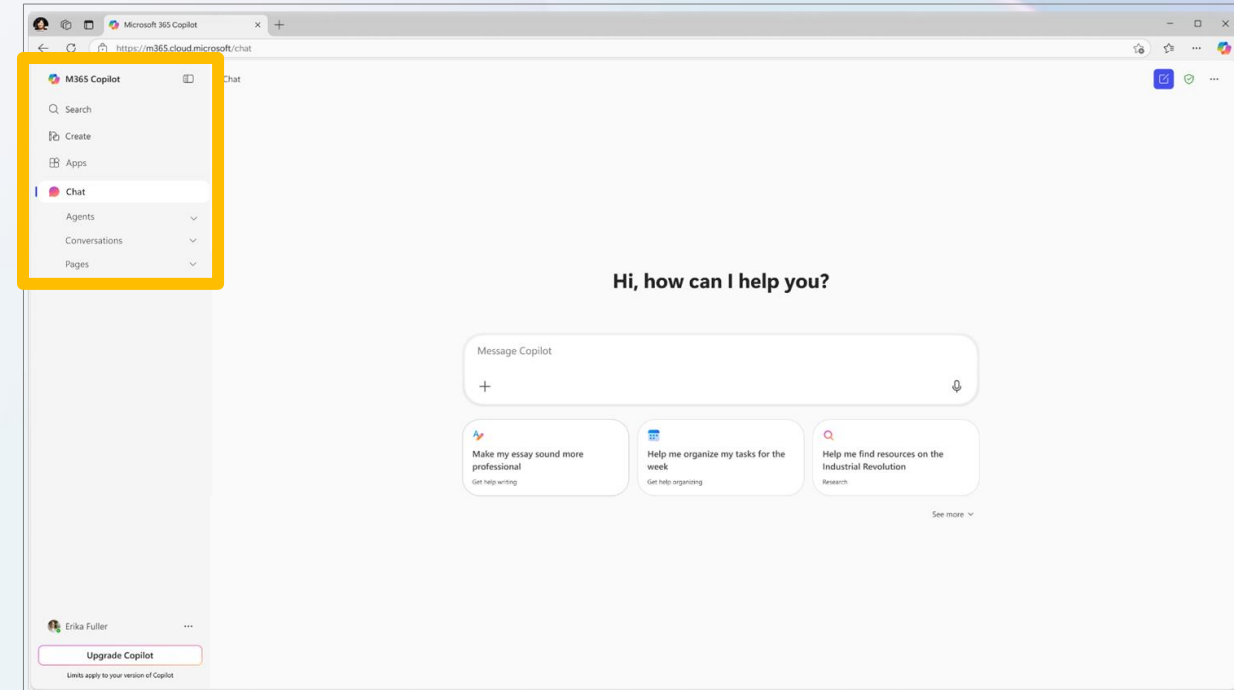

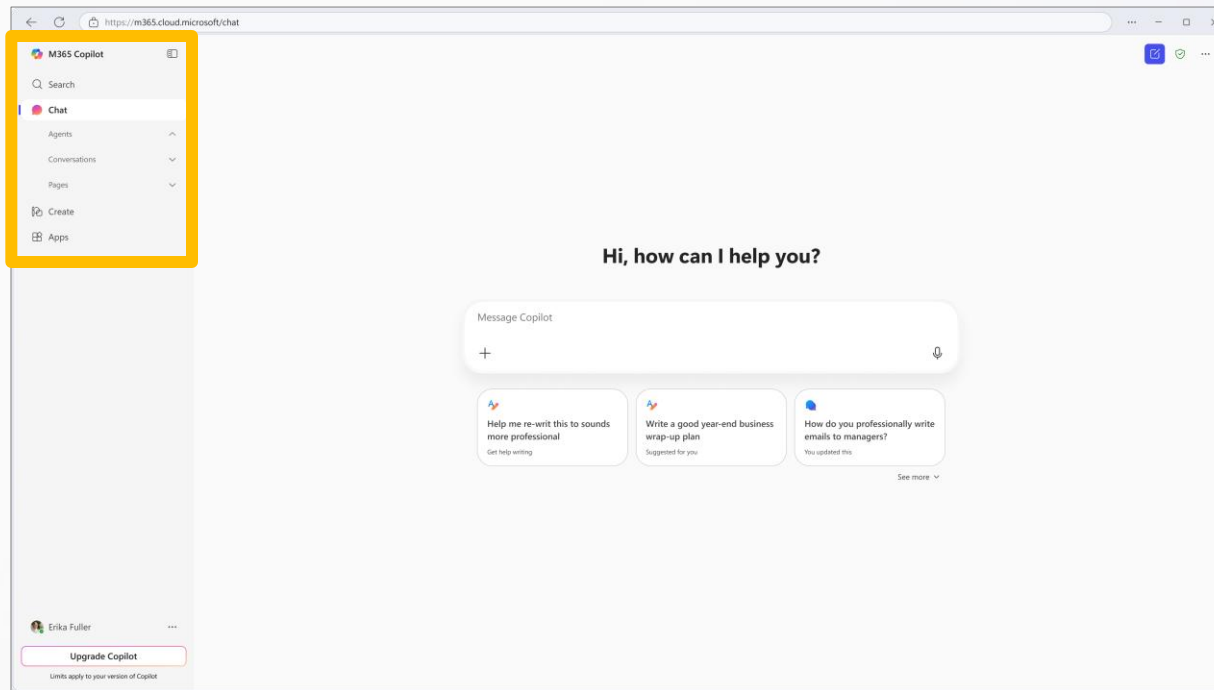

The **Microsoft 365 Copilot app on iOS** is updating to offer **file previews and Copilot Chat integration for Word, Excel, and PowerPoint files**, directing users to standalone apps for editing.

Microsoft 365 Copilot app: Simplifying web experiences

Microsoft 365 is **consolidating Copilot Chat access into the Microsoft 365 Copilot app** to simplify and unify user experience, **automatically redirecting users to a single entry point.**

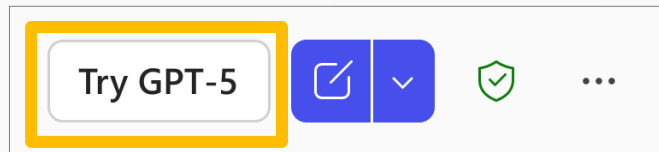

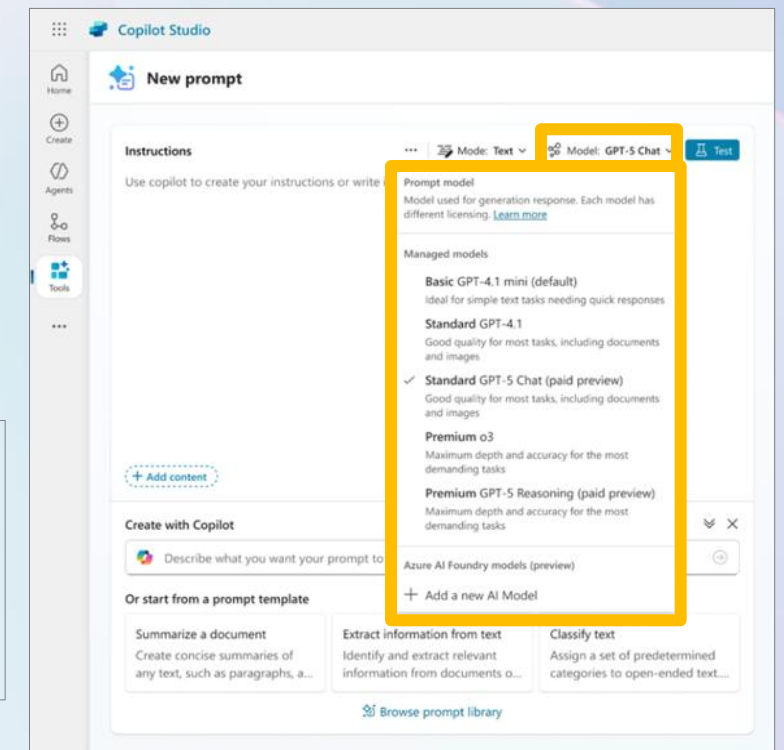

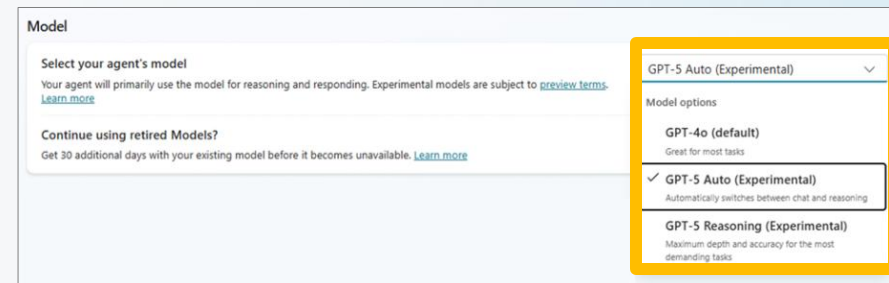

Microsoft 365 Copilot and Copilot Chat: GPT-5, OpenAI's latest generative-AI system

Microsoft 365 Copilot is now **integrating GPT-5 for enhanced capabilities in Copilot Chat and Copilot Studio**, offering different access levels based on user licenses.

Experience for M365 Copilot and Copilot Chat users

Experience for Copilot Studio users

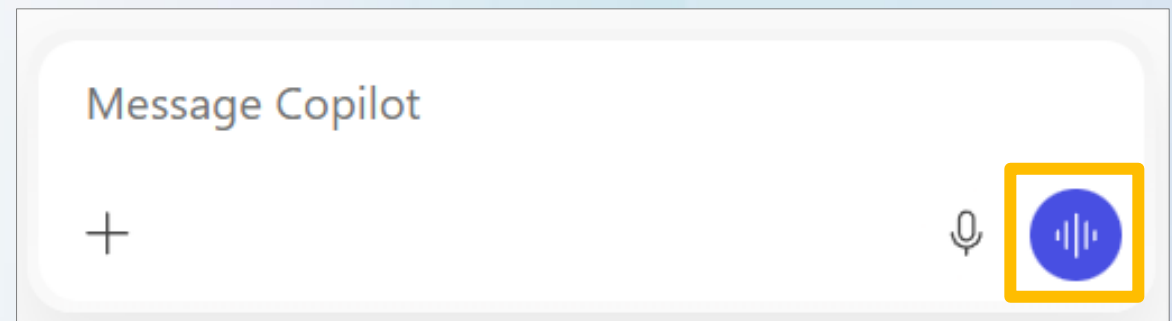

Microsoft 365 Copilot and Copilot Chat: Realtime voice is now available

Voice in M365 Copilot brings a natural, hands-free conversational experience to your desktop and mobile devices – enabling you to talk to Copilot like a colleague, unlocking a faster, more intuitive way to work.

- Speak directly to M365 Copilot to search for information, catch up between meetings, brainstorm out loud, and do it all in multiple languages.

Voice input icon in Copilot Chat on iOS / Android

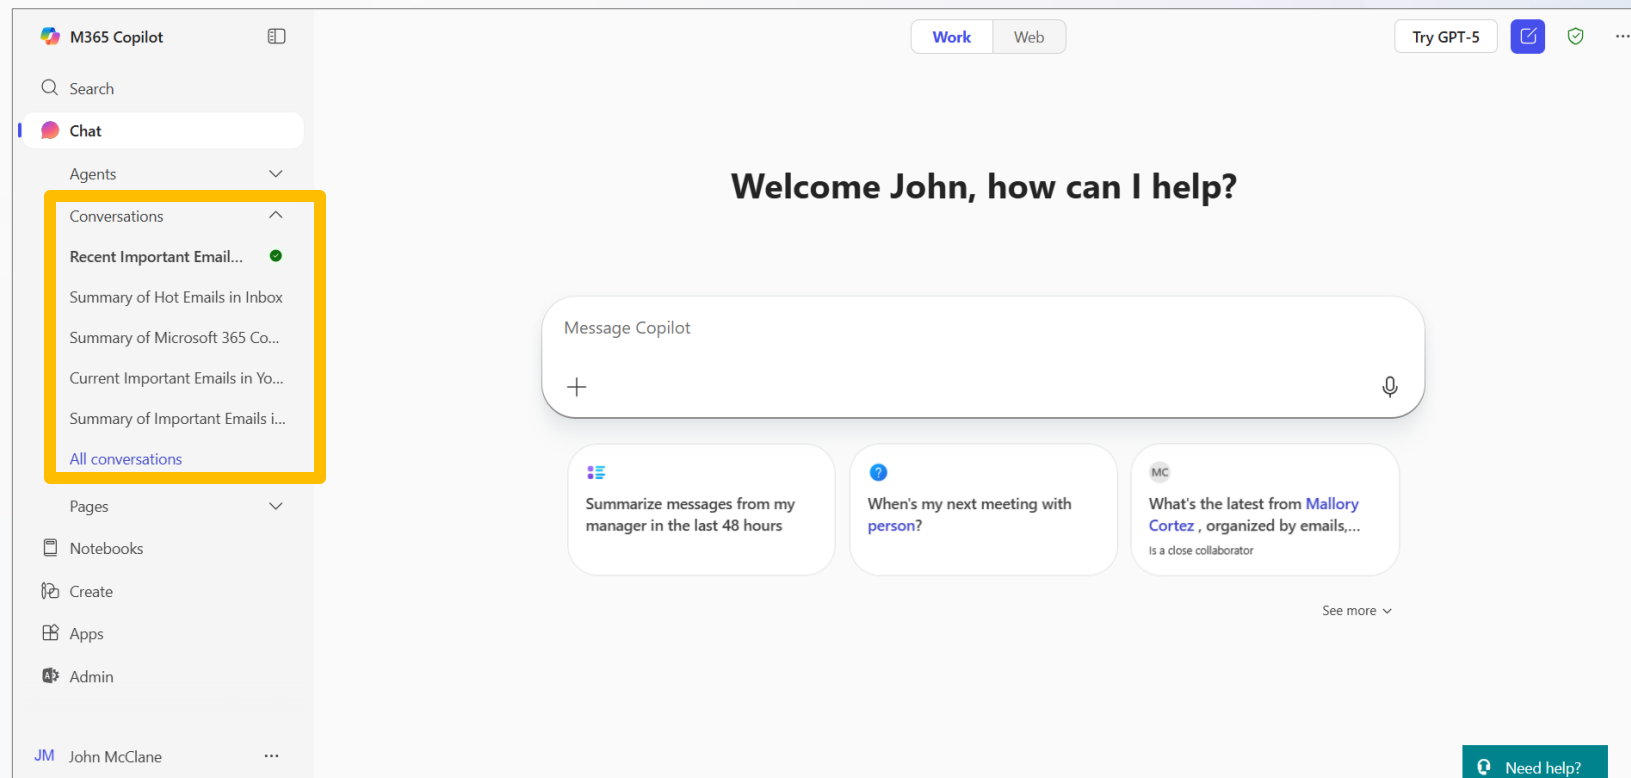

Voice input options in Copilot Chat on Windows / Mac / Web

Copilot Chat: Streamlined chat history view

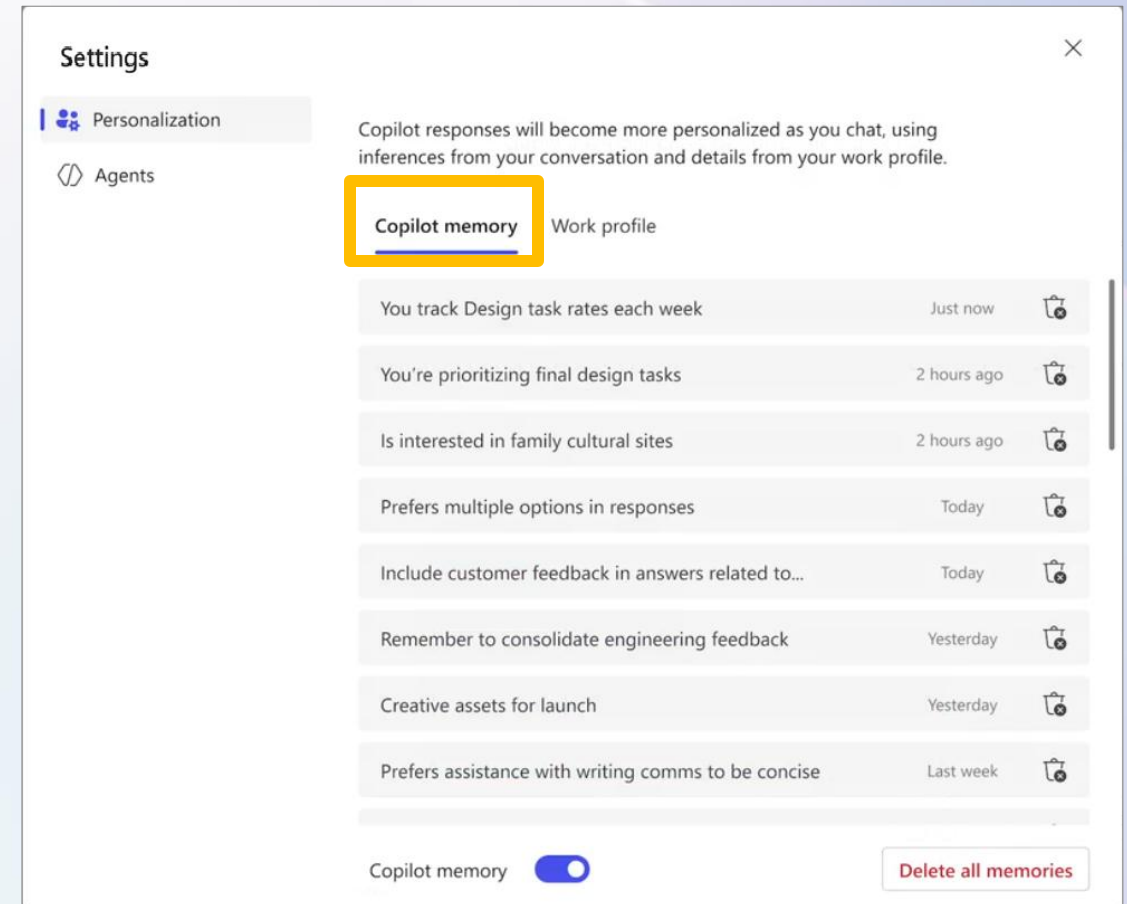

Microsoft 365 is introducing a **unified chat history, consolidating all user conversations into a single list** to enhance discoverability and continuity.

Copilot Chat: Enhanced Personalization via Communication Memory in Copilot

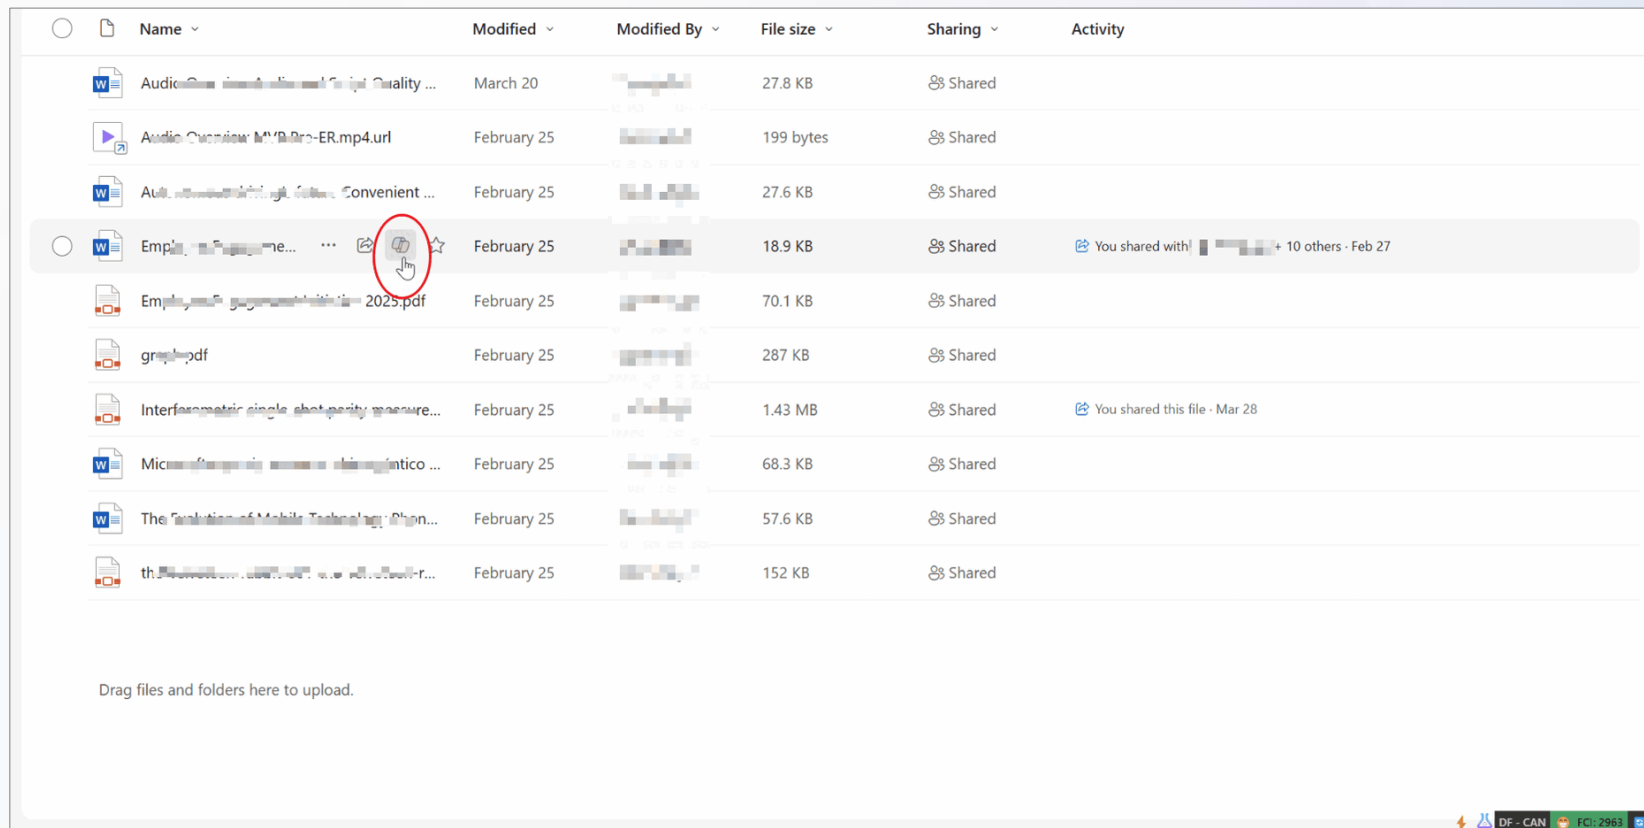

Microsoft 365 Copilot is introducing "communication memory" to enhance personalization by summarizing previous user communications for more context-aware responses.

Copilot Chat: Audio overviews now available for files

Microsoft 365 introduces **podcast-style audio overviews for PDFs, Word documents, and Notebooks** for enhanced accessibility and flexibility.

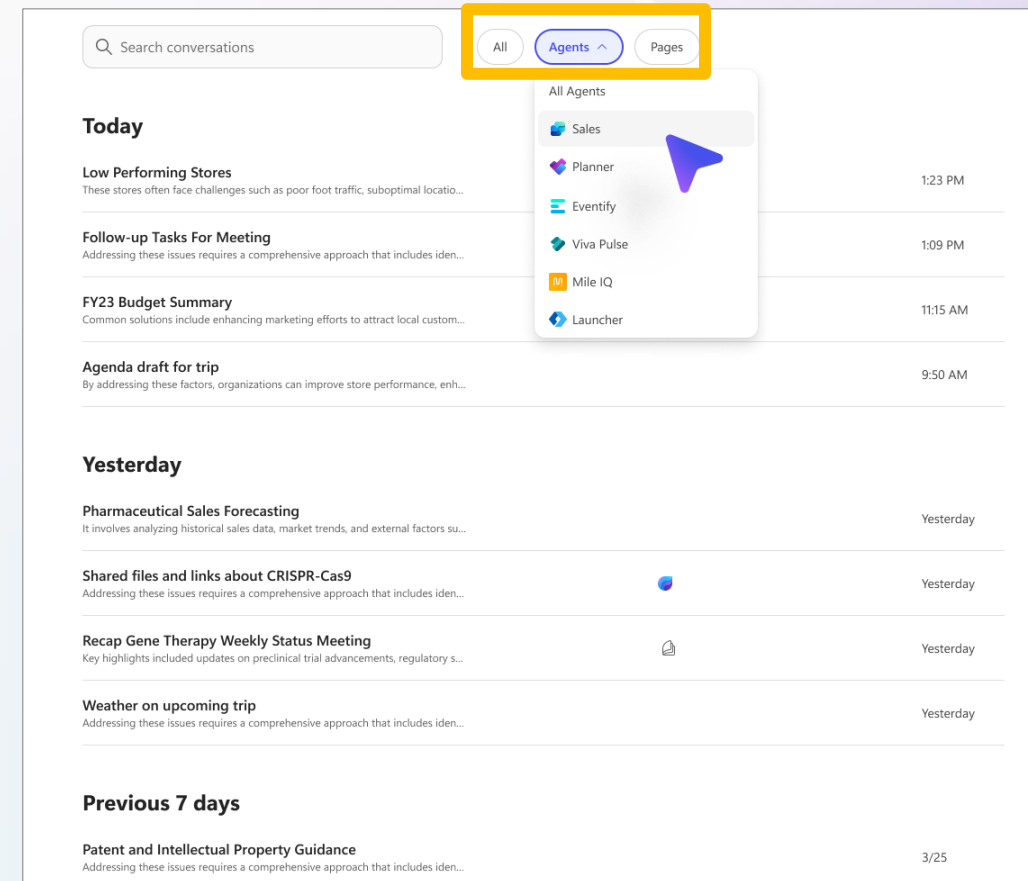

Copilot Chat: Filter chat history for easier context recall

We're adding a **new way to filter your chat history**, so you can easily focus on the conversations that matter most to your work.

- This makes it quicker to find the right chats and stay in the flow by bringing up the context you need, when you need it.
- Filter conversations by agents or by those where you create a page.

Copilot Chat: New Tools feature coming to the prompt box

A **new Tools feature** in the Copilot Chat prompt box will allow users to **easily access and discover task-specific Copilot capabilities** based on their license.

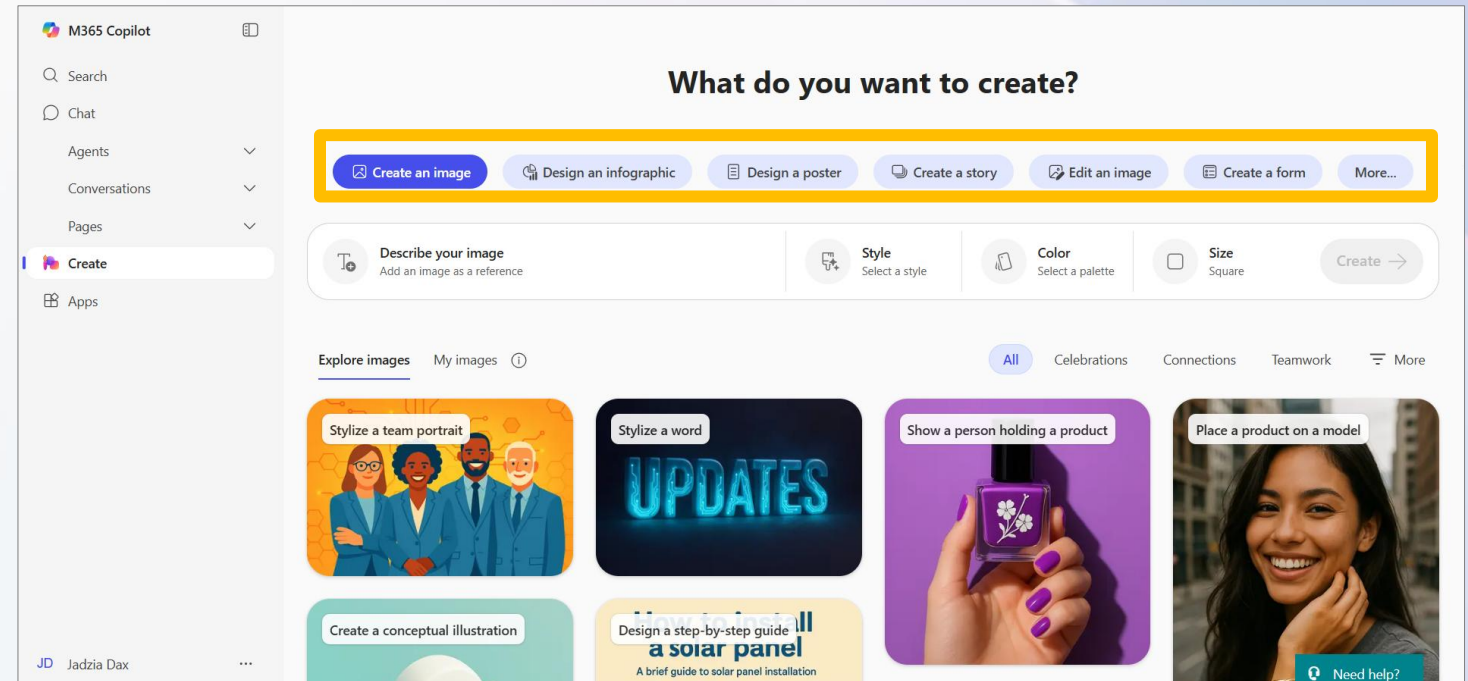

Copilot Chat: Gen AI capabilities in the Create module of Microsoft 365 Copilot app coming to all users

Microsoft 365 Copilot now allows **users without a Copilot license to generate and edit visual content using AI tools**, with standard access across your organization.

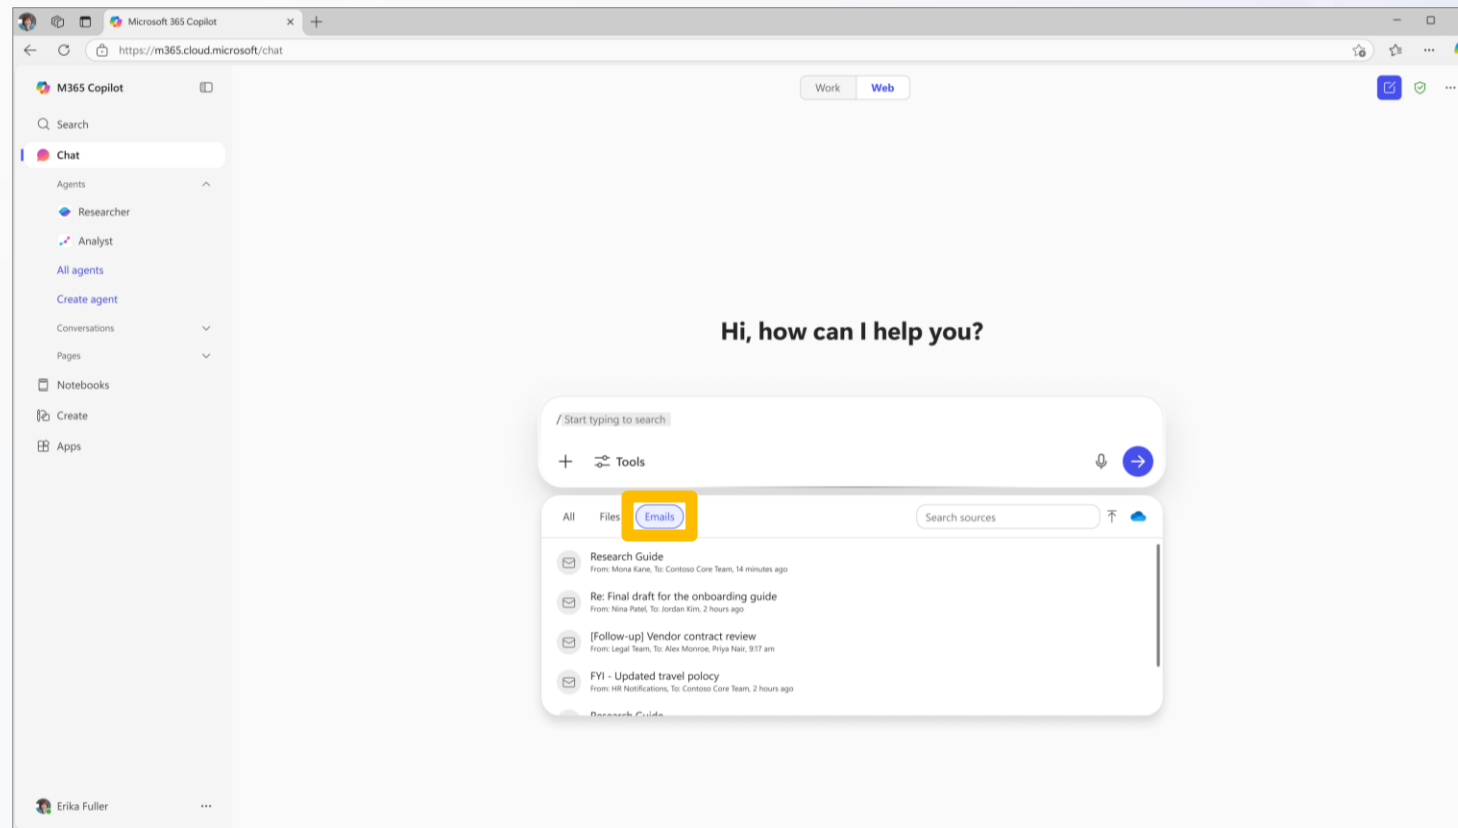

- This capability is already available for licensed Microsoft 365 Copilot users and is now coming to Copilot Chat users.

Copilot Chat: Support for emails in ContextIQ

Users can include an email in their prompt as a reference by typing '/' and selecting one from the ContextIQ menu. Copilot Chat will reference the included email as part of its response.

Microsoft Purview and Microsoft 365 Copilot: Restrict Microsoft 365 Copilot processing on content with sensitivity labels (GCC, DoD)

Microsoft Purview Data Loss Prevention is extended to Microsoft 365 Copilot for GCC and DoD customers.

- This feature will allow DLP policies to **provide detection of sensitivity labels in enterprise grounding data and restrict access** of the content in Microsoft 365 Copilot.

Microsoft Purview

Data loss prevention > Create policy

Choose where to apply the policy

We'll apply the policy to data that's stored in the locations you choose.

① If your role group permissions are restricted to a specific set of users or groups, you'll only be able to apply this policy to those users or groups. [Learn more about role group permissions](#)

② Protecting sensitive info in on-premises repositories (SharePoint sites and file shares) is now in preview. Note that there are prerequisite steps needed to support this new capability. [Learn more about the prerequisites](#)

③ Pay-as-you-go billing needs to be set up to configure policies for non-Microsoft 365 data sources. [Learn more about pay-as-you-go billing](#)

New policy to manage Copilot Chat button visibility in Edge for Business	MC1120157 496140	Admins can control visibility of the Copilot Chat button in Edge via a new policy.	August 2025

On-Canvas Copilot and Private Preview in Shared Pages	499025	After making changes to a shared page via chat or on-canvas Copilot, responses appear as private previews, showing content suggestions that you can edit and preview privately before applying them.	August 2025
Updated UI for the Copilot Chat Navigation Pane in Teams	499148	The navigation pane has been repositioned from the right side to the left, offering a more intuitive layout. Despite the shift, it continues to host agents and conversation history, ensuring continuity in user experience. This redesign introduces new features, including access to the "All Conversations" page, which provides a comprehensive view of chat history.	August 2025
Microsoft 365 Copilot Chat - General Availability for the DoD environment	494511	Microsoft 365 Copilot Chat Copilot is available at no additional cost for Microsoft 365 DOD users who sign in with their Microsoft Entra account (no Microsoft 365 Copilot license required). Microsoft 365 Copilot Chat offers enterprise data protection (EDP), and secure AI chat designed for work, powered by the latest large language models with optional web grounding.	August 2025
Add topic(s) through Copilot to your existing presentation	MC1105014 496138 MC1105015 496137 MC1105016 496136	Now, you will be able to add more content to your existing presentation using Copilot.	August 2025
Copilot in Outlook: Content Sources	MC1127230 496596	Microsoft 365 Copilot users can now improve Chat response accuracy by selecting specific content sources to scope responses, enhancing transparency and customization.	September 2025

Updated UI for Copilot Chat Navigation Pane in Outlook	499149	The navigation pane has been repositioned from the right side to the left, offering a more intuitive layout. Despite the shift, it continues to host agents and conversation history, ensuring continuity in user experience. This redesign introduces new features, including access to the "All Conversations" page, which provides a comprehensive view of chat history.	August 2025
Configure format, style, and duration of Audio Overviews in Copilot Notebooks	499151	Users can guide Copilot on the format (podcast-style with dual voices or a single voice), style, and duration while generating an Audio Overview of their Copilot Notebook.	August 2025
Save an audio overview from Copilot Notebooks to OneDrive	499152	Save the audio overview that you have generated within a Copilot Notebook to OneDrive so you can download or share with others.	August 2025
Generating PPT grounded on a Copilot Page	499425	Generating PPT grounded on a Copilot Page.	August 2025
[Copilot Chat] Email attachment summarization (Classic Attachments)	499656	Now users will be able to reason over attached content along with the body of the email in Copilot Chat. Supported file types are Word, Excel, PowerPoint, Pdf, Text, Json and Xml attached to the email (Classic Attachments).	August 2025

Update document sections from new sources	497939	Easily refresh parts of your document using content from other files—without copying and pasting. Copilot keeps your formatting intact while pulling in the latest updates from new sources.	September 2025
Agents usage report	497999	A new agents usage report will be available in the Microsoft 365 admin center. The report will be scoped to include agents in M365 Copilot and Copilot Chat with usage by both M365 Copilot licensed and unlicensed users.	September 2025
Copilot Extensibility: Customize icons and display names for custom Copilot connectors	498909	Add or customize icons for custom Copilot connectors using the Graph API or from the M365 admin center.	September 2025
Copilot Extensibility: Full refresh of custom connectors datasource	498910	Admins and developers can do a full refresh or sync of their data source for Custom Connectors using Graph APIs. This also ensures that any items deleted in the source are automatically deleted during this full sync and admins do not have to use separate delete APIs to do this.	September 2025
Copilot Extensibility: Schema Recommendations for Custom Connectors in the M365 admin center	498911	Accelerate your custom connector development with intelligent schema guidance directly in the Microsoft 365 admin center. This feature provides: • Proposed schema suggestions tailored to the connector you're building. • Real-time recommendations to identify gaps or errors in your schema design to help improve search and chat results in Copilot.	September 2025

Copilot Extensibility: Simplified People Resolution for Custom Copilot Connectors	498912	This feature enables connectors to resolve external identities—such as email addresses or user IDs from third-party data sources—to their corresponding Microsoft Entra ID (Azure AD) identities. By allowing flexible identity mapping, developers can simplify integration workflows without needing complex Graph API lookups and reduce setup friction by avoiding strict dependency on object IDs.	September 2025
Copilot Extensibility: Connector Metadata Enrichment for Custom Copilot Connectors	498918	We're introducing new options that allow admins and developers to enrich their custom Copilot connectors and its schema properties with descriptive metadata. With this update, you can now provide richer context about the connection and its schema properties to Copilot's LLM, enabling more accurate and relevant responses.	September 2025
Copilot Extensibility: Delete Schema Properties via Copilot Connector APIs	498919	We're adding support for property deletion in custom Copilot connectors, giving admins and developers more control over schema evolution. With this feature, you can use Copilot connector APIs to delete or drop individual schema properties that are no longer needed and keep your connector schema clean and up-to-date without requiring full re-ingestion.	September 2025
Ground Microsoft 365 Copilot Chat in Edge for Business in your open YouTube videos	499424	Get relevant answers and insights about your open YouTube videos in Copilot Chat in Edge.	September 2025
Copilot Dashboard: Team Views	497111	Scoped access enables managers to view Copilot insights specific to their own organizations both on the Copilot Dashboard and in additional Copilot reports on the Reports page. This allows leaders at different levels to monitor adoption and impact within their teams, while respecting organizational boundaries and privacy. Admins can configure access criteria and set minimum thresholds.	September 2025

Teams Channels in Context IQ	429645	Users will be able to search for and select Teams Channels in the Context IQ menu to help ground their prompts when using Copilot Chat.	September 2025
Scope prompts to specific Channels in Teams in Copilot Chat	497915	Users will be able to scope their prompts to specific Channels in Teams to get more focused responses when using Copilot Chat.	September 2025
Generate a formula with Copilot from the grid upon "="	496362	Type "=" anywhere on your grid or in the formula bar and let Copilot generate formulas from natural language, making complex calculations simpler and faster.	September 2025
Copilot Dashboard - M365 Copilot Chat adoption metrics	499899	Insights on M365 Copilot Chat adoption for users not licensed for M365 Copilot. Insights will include usage trends over time, adoption by group, retention, and app level breakdowns. Users can filter by organizational attributes to uncover adoption patterns. Admins can disable M365 Copilot Chat insights in the Microsoft 365 admin center.	September 2025
Facilitator agent for scheduled and ad-hoc meetings in Teams Rooms on Windows	499891	Users can now use the Facilitator agent in Teams Rooms on Windows for real-time notes and action items during both scheduled hybrid and impromptu in-person meetings using AI. In hybrid meetings, the agent appears in the notes panel. For in-person meetings, a participant can scan the QR code on the display in the room to invoke the agent as the group's assistant.	September 2025

Summarization, Translation, and Citation will soon be supported by Microsoft Copilot and Microsoft 365 Copilot Chat in our menus	497135	Menus in Edge where the user has highlighted content in the browser will soon support a summarization, translation, and citation with Microsoft Copilot and Microsoft 365 Copilot Chat.	September 2025
List email attachments in M365 Copilot	497909	Users will be able to list the file attachments that they received or sent over email in M365 Copilot.	September 2025
Access SharePoint agents in the Microsoft 365 Copilot app	MC1099692 482601	Users can access recently used SharePoint agents directly within the Copilot app.	September 2025
1-click to create a FAQ page based on content in Copilot Notebook	497133	The 1-click page generation feature helps you complete tasks quickly. With a single click, Copilot creates a FAQ page based on your notebook content—no prompt writing needed.	September 2025
1-click to create a Brief page based on content in Copilot Notebook	497134	The 1-click page generation feature helps you complete tasks quickly. With a single click, Copilot creates a Brief page based on your notebook content—no prompt writing needed.	September 2025

Preview and chat with Microsoft Word, Excel, and PowerPoint files in the Microsoft 365 Copilot app on iPhone	500631	When opening a Microsoft Word, Excel, or PowerPoint file in the Microsoft 365 Copilot app on iPhone, users will get a preview experience where they can use Copilot Chat to command and ask questions about the files directly in the preview. This enables immediate access to Copilot Chat in a user's file.	September 2025
Initiate Copilot Chat by sharing files to the Microsoft 365 Copilot app on iPhone	500633	When users on iPhone choose the action to share a Word, Excel, or PowerPoint file from a third party app (including Files) and choose Microsoft 365 Copilot as the target app, they will automatically be redirected to a Copilot Chat session in the Microsoft 365 Copilot app with the file summary populated.	September 2025
Copilot Chat - Session Persistence Enhancement	500638	This feature ensures that conversations are preserved even when users navigate away from a session. As soon as a prompt is submitted, an entry is immediately created in the navigation pane's session history. This allows users to leave the session and return later just as if they had never left. The update enhances continuity and reliability, making it easier to navigate without losing progress.	September 2025
Copilot Dashboard - Copilot Chat in Word, Excel, PowerPoint Metrics	498913	Copilot Analytics users can now view metrics that reflect Copilot Chat (Work and Web) activity across Word, Excel, and PowerPoint. These updates reflect the latest addition of Copilot Chat to these apps to help users transition seamlessly between workflows and will be displayed alongside existing app chat metrics for continuity.	September 2025
Copilot Analytics - Unified Exclusion list	500161	Unified Exclusion Lists in Copilot Analytics provide a single, streamlined way for admins to exclude users—both unlicensed and licensed—from all Viva Insights reports and Copilot Dashboard. This ensures consistent, privacy-compliant data control across the entire platform.	September 2025

Preview and chat with Microsoft Word, Excel, and PowerPoint files in the Microsoft 365 Copilot app on iPhone	500159	When opening a Microsoft Word, Excel, or PowerPoint file in the Microsoft 365 Copilot app on iPhone, users will get a preview experience where they can use Copilot Chat to command and ask questions about the files directly in the preview. This enables immediate access to Copilot Chat in a user's file.	September 2025
[Copilot Chat] Email attachment summarization (Modern Attachments, Item Attachments)	499657	Users will be able to reason over additional attachment content, along with the email body, in Copilot Chat. Support will be extended to Word, Excel, PowerPoint, Pdf, Text, Json and Xml files mentioned in the email as links (Modern Attachments). Additionally, other item attachments, such as email threads, will also be supported.	September 2025
Harmful Content Protection Controls in Microsoft 365 Copilot Chat	499809	We're introducing a new policy setting in Microsoft 365 Copilot Chat that gives administrators enhanced control over how users interact with harmful content protection. This feature is designed to support specialized roles—such as legal, investigative, or moderation teams—where exposure to sensitive content may be necessary.	September 2025
Ground Microsoft 365 Copilot Chat in Edge for Business in your open OneDrive and SharePoint documents	499423	Get relevant answers and insights about your open cloud documents in Copilot Chat in Edge.	September 2025
Audio Overview customization in Copilot Notebooks	499150	Guide the content of an Audio Overview created for a Copilot Notebook through natural language input.	September 2025

Microsoft Copilot in Teams: Visual Insight for intelligent recap	MC1115314 490052	Meeting recaps will include content shared on screen for richer summaries.	October 2025
Agent-Level Controls for Pay-as-you-go	496363	This feature introduces admin controls for managing AI agents on a consumption basis within Microsoft 365 Copilot. Administrators can specify which users can access particular agents through pay-as-you-go, control which agents are available for metered consumption, and establish billing policy for each agent.	October 2025
Copilot Analytics - Copilot Studio agent report in Insights enhanced with autonomous agents.	499422	Enhancement to Copilot studio agents report (Viva Insights) - 1. Inclusion of agents with "generative" orchestration 2. Autonomous agent adoption and impact (maker led time and cost saving).	October 2025
See a summary from Copilot of the latest changes and comments in the Word, Excel, and PowerPoint backstage view	489826	Use Copilot in the backstage view, accessible from the tile tab or start menu, to see a summary of the latest changes and comments made to your Word, Excel, and PowerPoint files before opening them.	October 2025
Data Lifecycle Management- Introduction of secure workflow to bypass retention holds and delete content on OneDrive and SharePoint Online	496151	We're introducing a new capability in Microsoft Purview Data Lifecycle Management to bypass retention policies and delete content from OneDrive and SharePoint Online before the hold or retention policy duration expires.	November 2025

[Available today: GPT-5 in Microsoft 365 Copilot](#)

Microsoft 365 Copilot now integrates GPT-5, enhancing the AI-powered assistance experience for users across Microsoft 365 applications.

[What's new in Microsoft 365 Copilot | July 2025](#)

Microsoft 365 Copilot has introduced new features enhancing collaboration, productivity, and integration with tools like Excel and Teams, along with improved AI responses and customization options for a more personalized user experience.

[ICYMI | Stand out in the marketplace with a Microsoft Copilot specialization](#)

Microsoft 365 Copilot introduces opportunities for partners to enhance customer experiences and innovation by integrating AI-powered solutions into their offerings.

[Announcing M365 Copilot Search General Availability: A new era of search with Copilot](#)

Microsoft 365 Copilot Search is now generally available, enhancing search capabilities in Microsoft 365 apps with AI-driven insights and contextually relevant results.

[5 Microsoft 365 Copilot features to unlock everyday productivity](#)

Microsoft 365 Copilot enhances productivity with automated tasks, streamlined document handling, efficient email management, optimized meetings, and improved workbook navigation using AI-driven features.

[Listen to an audio overview of a document with Microsoft 365 Copilot in Word](#)

Microsoft 365 now offers an audio overview feature that enables users to listen to a document's summary, enhancing accessibility and comprehension.

[Explain Formulas with Copilot—Now on the Grid](#)

The Excel blog post announces a new feature where Copilot can explain formulas directly on the grid, enhancing user understanding and productivity.

[Microsoft 365 Copilot Chat for Students 13+](#)

Microsoft 365 introduces Copilot Chat for Students, enhancing personalized learning and collaboration through advanced AI-powered chat capabilities.

[Understanding foundation model changes in Microsoft 365 Copilot](#)

Microsoft 365 Copilot is enhancing AI capabilities by transitioning to new foundation models, improving performance, security, compliance, and responsible usage within the platform.

[Nail back-to-school planning with Microsoft Copilot](#)

Microsoft Copilot assists in streamlining back-to-school planning for educators by offering AI-driven tools to optimize lesson plans and administrative tasks.

[How The Great Copilot Journey Helps Drive Copilot Usage](#)

The blog post discusses strategies for increasing Microsoft 365 Copilot usage, including user feedback loops, learning pathways, and community engagement to drive adoption and maximize the tool's benefits.

[Viva Engage Public Content is Now Available in Microsoft 365 Copilot](#)

Viva Engage now allows Microsoft 365 users to access public content to enhance community engagement and collaboration.

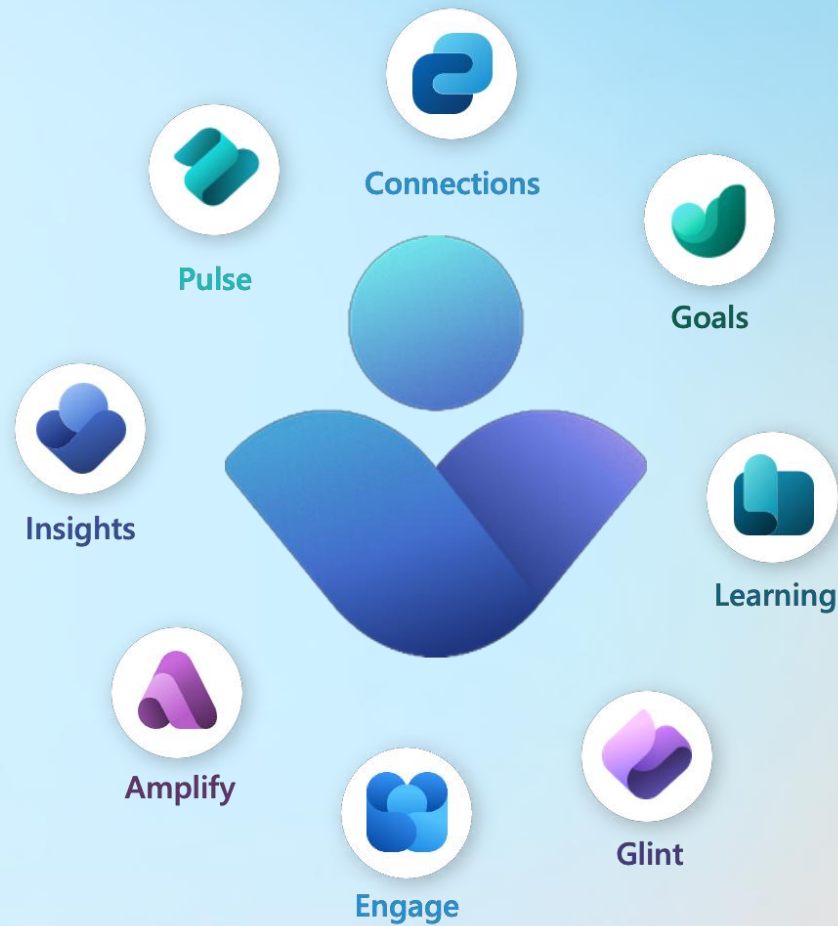

[How to get started with Copilot](#)

The blog post provides a guide to getting started with Copilot in Excel, highlighting its functionality to assist users in leveraging AI for enhanced data analysis and productivity within the spreadsheet software.

[Bring AI to your formulas with the COPILOT function in Excel](#)

Excel introduces the new Copilot function, powered by AI, to enhance formula creation by generating complex formulas from queries and integrating seamlessly with existing features.

Microsoft Viva

Microsoft Viva: New tenant-level service plan in Viva Suite SKU

Microsoft is introducing **a new tenant-level service plan, Insights by MyAnalytics Backend**, to align with security requirements, without affecting MyAnalytics user-level features.

Copilot Enhancements for smarter authoring	498546	We've made some exciting updates to Viva Amplify's authoring experience that will take your content creation experience to the next level. With our latest release, Copilot is now smarter and more helpful than ever, leveraging your files, like Word documents, and even meeting content, to generate high-quality communications with ease. Here's what's new: 1.	August 2025
Introducing Viva Engage Role Management APIs on Microsoft Graph	497131	We're excited to announce that Viva Engage Role Management APIs in Microsoft Graph are releasing soon. These new APIs enable IT admins to programmatically manage Viva Engage-specific roles, including Corporate Communicator, Network Administrator and Verified Administrator. With these APIs, one can automate role assignments, retrieve role data, and streamline admin workflows across organization.	September 2025
Viva Glint - Export Executive Summary report in Viva Glint to editable PowerPoint slides	499661	Managers will be able to export the default sections from the Executive Summary report in Viva Glint directly to editable PowerPoint slides. This enhancement allows for easier and quicker consumption of this report outside Viva Glint, compared to the previous export method which included static screenshots.	January 2026
Copilot in Pulse follow-ups for Glint surveys	498917	Empower managers and leaders to gather additional context and check in on team progress after an org-wide Glint survey by sending a personalized Pulse that uses M365 Copilot to tailor the Pulse to the team's needs based on the Glint survey results.	February 2026

[News to Know - Volume 2, Edition 5, July 2025](#)

The blog post covers updates and insights on employee engagement tools and features in Microsoft Viva Glint, focusing on enhancing team feedback and collaboration.

[What's new in Viva Insights](#)

The latest updates in Viva Insights enhance data-driven insights for workplace productivity and wellbeing, introducing more advanced visualization features and improved integration with Microsoft Teams.

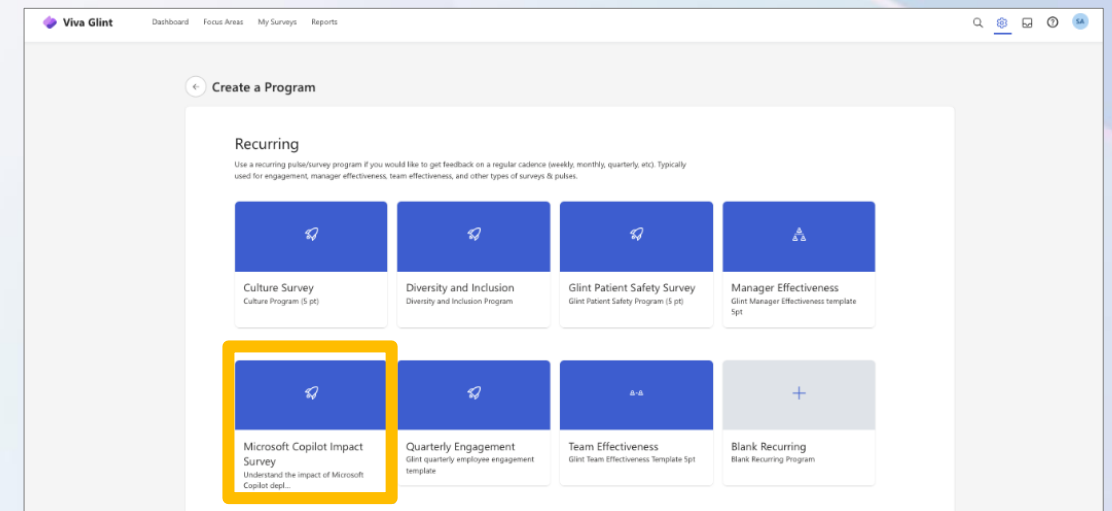

Viva Glint

Viva Glint: Copilot Employee Experience Outcomes Report

A new Power BI report in Viva Insights **highlights the relationships and impact of M365 Copilot usage on employee experience sentiment outcomes in Viva Glint.**

Viva Glint: Focus Area simplification and enhancements

Focus Area will have the below enhancements:

- Focus Areas will be associated with survey cycles and goal periods will be retired.
- Users will be able to select the same Focus Area across multiple cycles.
- The Focus Area Overview report will be filterable to groups of interest (e.g. managers only).
- Draft/deleted Focus Areas will no longer be included in Focus Area calculations.

Microsoft Teams: Teams meeting join URL validation

Microsoft Teams will **validate meeting join URLs to prevent altered or rewritten links from being used**, starting on the following dates:

- September 30, 2025 for Worldwide
- November 30, 2025 for GCC/DoD

Security products must avoid rewriting these URLs to prevent users from being blocked; this can be done by either whitelisting Teams URLs or disabling rewriting for Teams links.

Microsoft's advanced email security platform, including **Safe Links** (URL inspection / rewriting), will not be impacted by this update.

Microsoft Teams: Teams Discover Feed service migration

Microsoft Teams' Discover Feed is **transitioning** from the People Prediction Service to the Substrate Search Service Recommendations to **enhance scalability and integration**. Organizations should ensure devices meet specified minimum client versions for compatibility with the updated service.

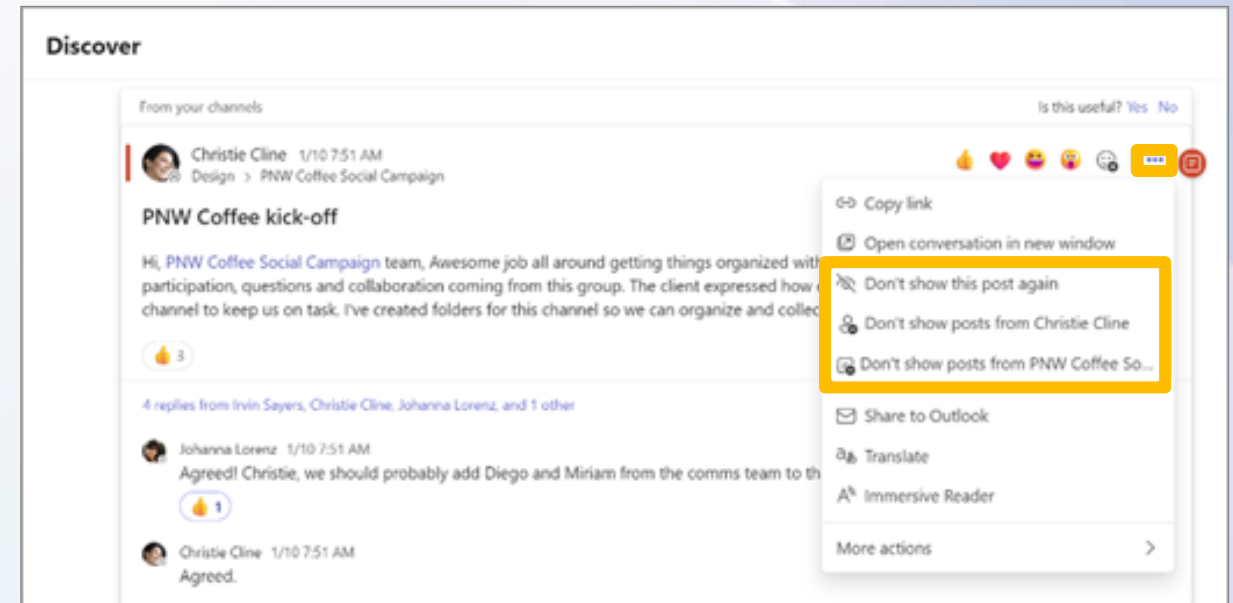

Windows Desktop: March 4 version i.e.:
25031.805.3440.529

Mac Desktop: March 4 version i.e.:
25044.2406.3471.4570

iOS: Version 7.03.02 (100772025033501)

Android: Version 1416/1.0.0.2025032402

Validate that your organization's devices meet these version requirements before August 2025.

For reference only: Users can help curate their Discover Feed on their own by using the "Don't show posts" options

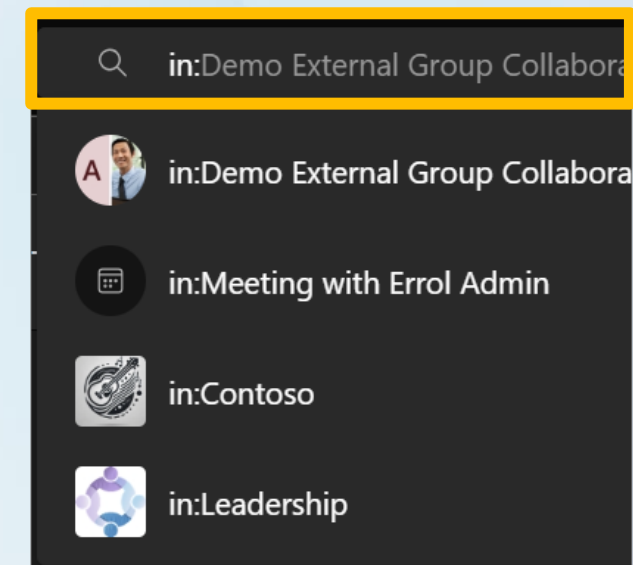

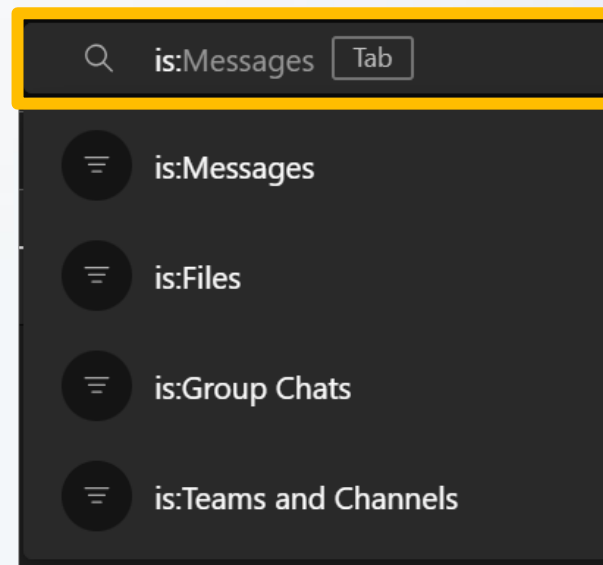

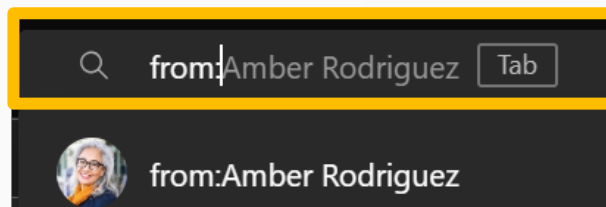

Microsoft Teams: Search with key query language

Microsoft Teams is introducing **SQL-like structured search queries** across Web, Desktop, and Mac platforms. This enhancement allows users to filter messages, files, and conversations more precisely using commands like **from:username**, **in:channel**, and **is:username** directly in the search bar. No admin action is required for activation.

Users can activate it by typing supported commands in the search bar.

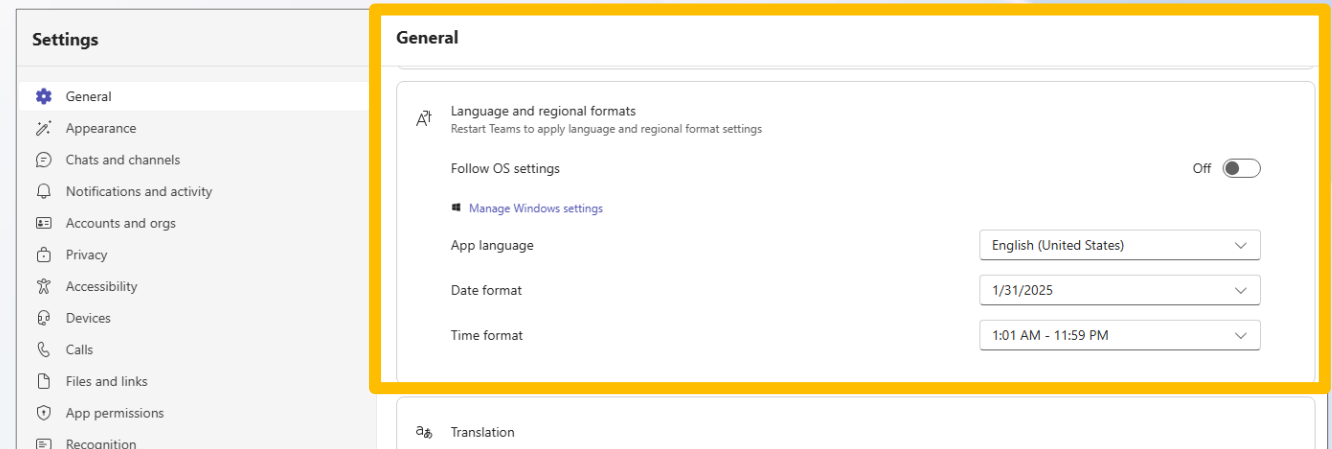

Microsoft Teams: Regional Settings Separation

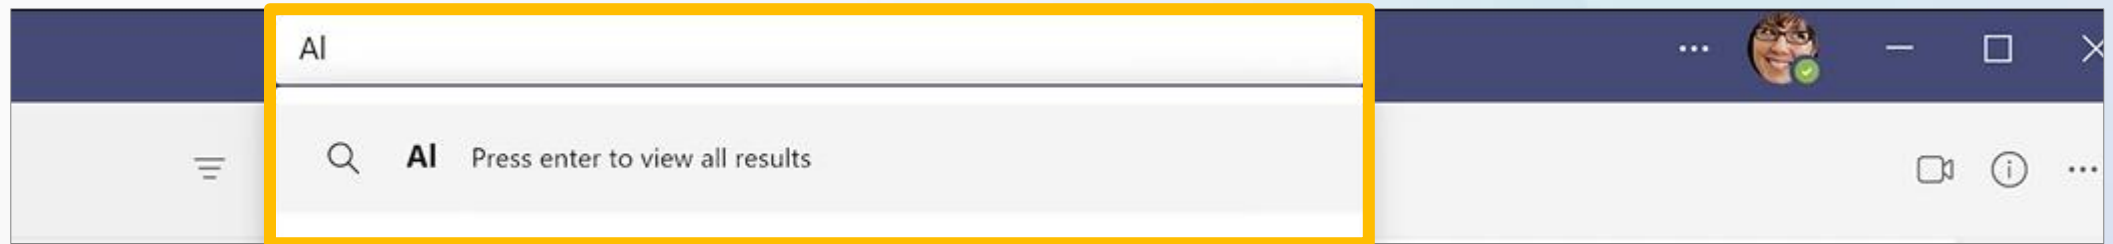

Regional Settings Separation in Microsoft Teams is designed to give users **full control over UI language, date, and time formats** - either **sync'd with their OS or set manually** - for a seamless, globally personalized experience that also addresses **common synchronization issues**.

To modify the date and time format settings directly in Teams, navigate to *Settings > General > Language and regional formats*.

Microsoft Teams: Meeting search improvements for Teams desktop clients

Microsoft Teams is **enhancing search capabilities for Windows and Mac desktop clients**, allowing users to search for meetings by name or participant and **perform actions** like **joining**, **viewing recaps**, **RSVPing**, and **accessing chats** directly from the search interface.

***For reference only:** Search in the Teams desktop client*

Microsoft Teams: Integration with Microsoft Defender for Office Tenant Allow / Block List for blocking domains

Microsoft Teams now **integrates with Microsoft Defender for Office 365** to allow security admins to **manage blocked external domains using the Tenant Allow/Block List**. Teams admins **must enable** the "Allow my security team to manage blocked domains" setting to use this feature.

View and manage blocked domains for Teams in the Microsoft Defender portal

To manage blocked domains from the Defender portal, Teams admins must enable security team access in the Teams admin center

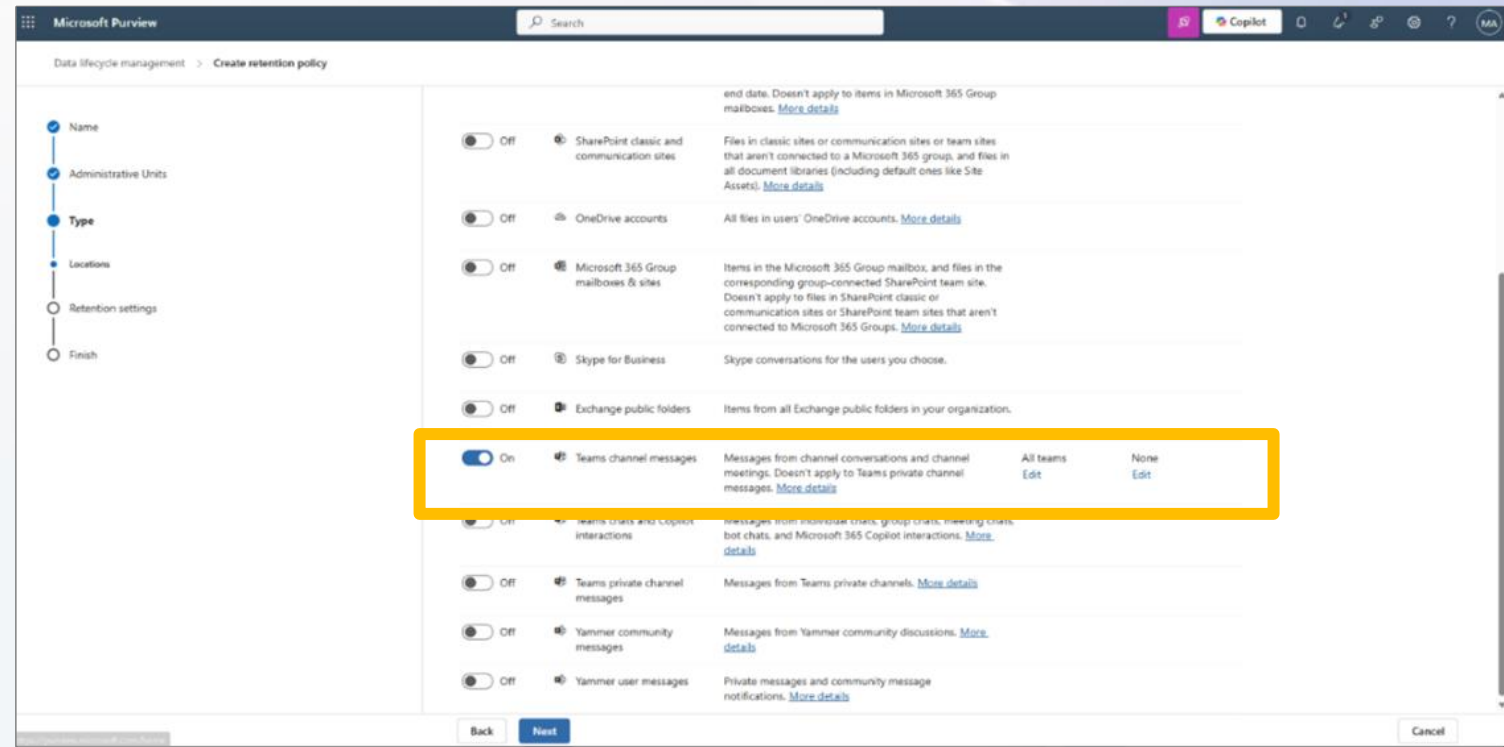

Microsoft Teams: Private channels increased limits and transition to group compliance

Microsoft Teams is enhancing private channels by using **group mailboxes**, increasing scalability, and improving compliance management.

Compliance managers and admins **must update policies** to the **team's group mailbox** to ensure **continuity of compliance features** like legal hold, eDiscovery, DLP, and retention policies.

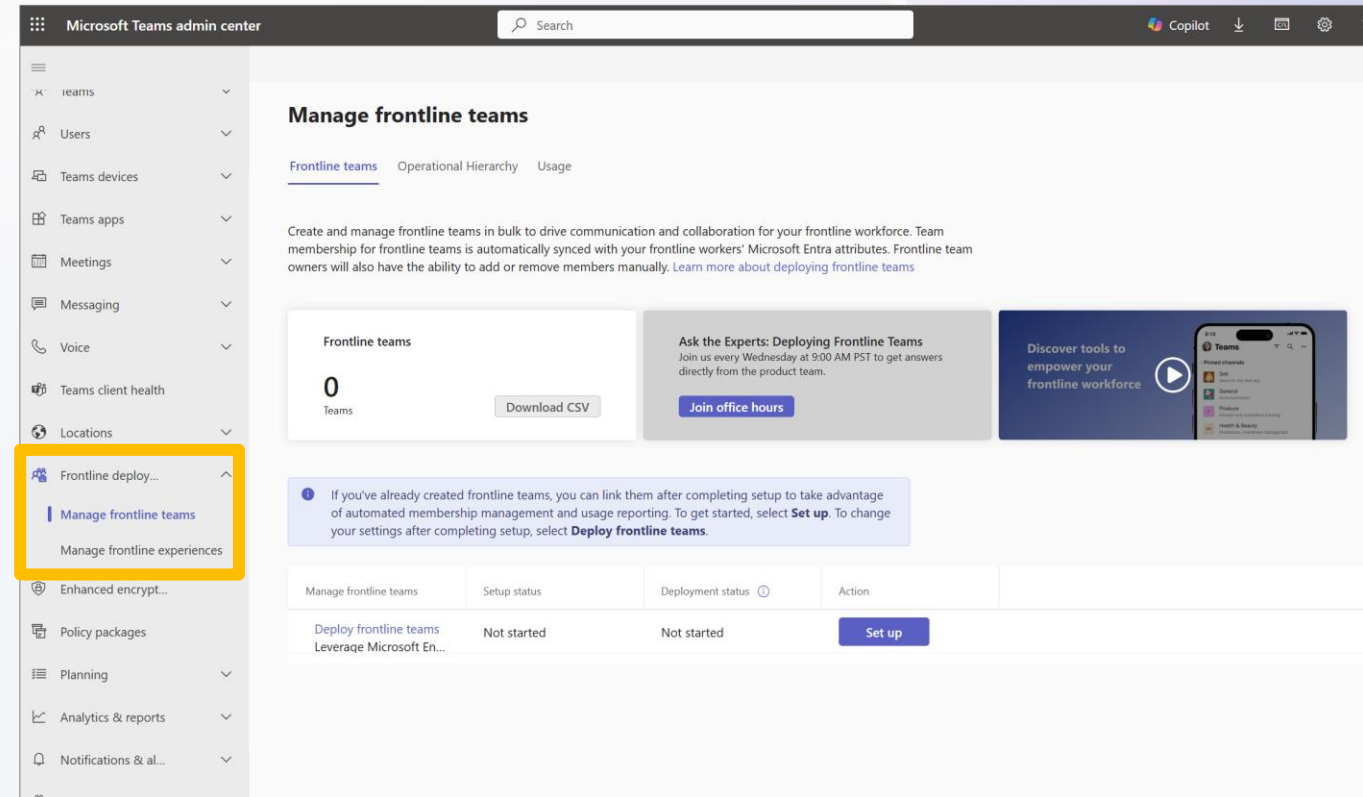

Microsoft Teams: Deploy a frontline worker pilot in the Teams admin center

Admins can now **deploy and manage a frontline worker pilot from the Teams admin center**, allowing configuration and monitoring of Teams features for frontline teams.

Organizations should **identify pilot participants** and **workloads** to enable, ensuring necessary permissions are in place.

For reference only: Managing Frontline workers from the Teams admin center

Teams Mobile: External audio and camera device selection on iPads

Microsoft Teams on iPad now allows users to **mute external audio devices** and **switch between cameras** with **enhanced controls**, improving the meeting experience.

- **Audio control:** Users can mute external audio devices during meetings.
- **Camera selection:** Users can long-press the camera icon to select any available camera before or during meetings.

No admin action is required, but ensure users **update their Teams app** to access these features.

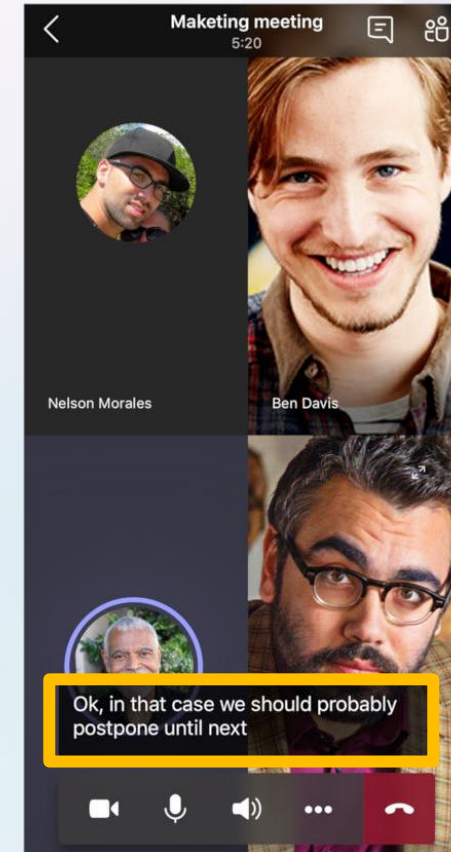

Teams Mobile: Customize captions on mobile

Live captions will be available on mobile devices with **enhanced customization options**, making captions easier to read and follow during meetings.

Personalize your captions by adjusting the font color, caption background color, and caption height.

These enhancements ensure captions remain **accessible and comfortable**, especially under **varying lighting conditions** or when you're on the go.

For reference only: Live captions on mobile

For reference only: [Use live captions in Microsoft Teams meetings](#)

Teams Events: Edit and manage Teams town hall instances in Microsoft Outlook

Organizers and co-organizers of Teams town hall events can now **edit event details directly from their Outlook calendar** for a streamlined management experience.

No action is required, but **inform event organizers** of this new capability for improved awareness and adoption.

Join event

Meeting ID: 263 198 825 708 0
Passcode: og77S7jj

For Organizers: [Manage Event](#)

***For reference only:** Manage events from email invite*

Teams Events: Immersive events in Microsoft Teams is available in public preview

Microsoft Teams is introducing **immersive events using avatars** in customizable 3D environments to enhance engagement during remote and hybrid meetings.

Ensure **organizers** and **attendees** have access to **Teams' public preview features** for participation.

Oasis

Canvas

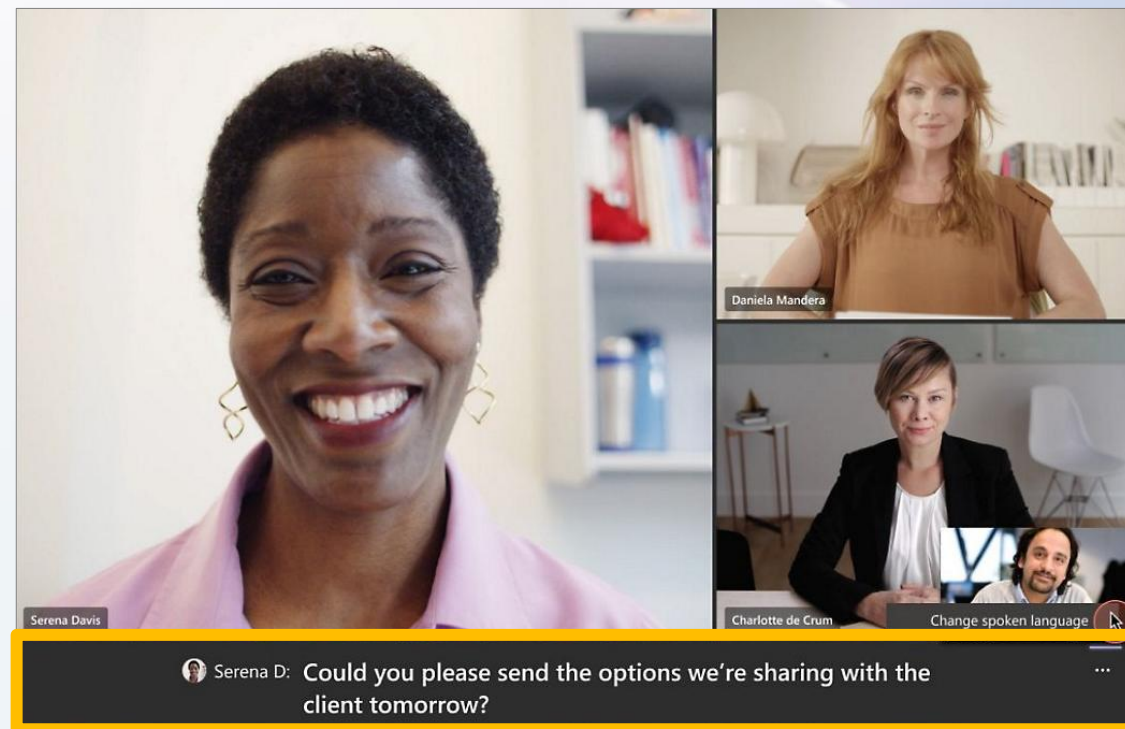

Teams Events: Enhanced privacy and stability for live captions

To improve privacy, when **transcription is off**, **captions will now show only the past five minutes of dialogue** instead of the full meeting.

If **transcription is on**, captions display the **entire conversation**, just like with live transcription.

We're also fixing an issue where changing the caption position could cause data loss - **now, moving captions will not affect the text shown**.

These updates also apply to Real-time Text (RTT), ensuring a consistent and reliable experience.

For reference only: Live captions in a Teams meeting

Teams Events: Raise hands in town halls

Town halls organized by users with **Teams Premium** will allow attendees to **raise their hand** like they would in a standard Teams meeting.

The ability to raise a hand can signal to organizers and presenters, who can then **bring attendees on screen** to **allow** them to **share** their camera and microphone.

***For reference only:** Attendees with their hands raised in a Teams meeting*

Teams Events: Intelligent recap for DoD

Intelligent meeting recap uses AI to provide:

- **Quick summary** of your meeting
- Highlighting **key discussion points**
- Identifying **follow-up actions**
- Offering **quick access to significant points** such as name mentions, when a screen was shared, individualized speaker markers, topics, and chapters

The screenshot displays the 'Product roadmap discussion' meeting recap in Microsoft Teams. The interface is divided into several sections:

- Header:** Shows the meeting title 'Product roadmap discussion', tabs for 'Chat', 'Files', 'Details', and 'Recap', and a 'Close' button.
- Timeline:** A horizontal timeline at the top indicates the meeting duration from 'Jan 21, 2023 10:00 - 11:00' and includes an 'Open in Stream' link.
- Product Roadmap:** A central section titled 'Product roadmap' displays a detailed timeline of the product development process, including phases like 'Market Research and Customer Feedback', 'Phase 1', 'Launch Preparation', 'Development', 'Phase 2 - Testing', and 'Launch'. It also shows a progress bar with markers for 'Month 1' through 'Month 12'.
- Speakers:** A section at the bottom lists the participants: 'Mona Kane', 'Babak Shammass', and 'Danielle Booker', each with a corresponding colored bar indicating their speaking time.
- Content:** A right-hand panel titled 'Content' lists related items: 'Product Roadmap...', 'Marketing budget...', and 'Marketing demo...'.
- Notes and AI-powered notes:** A section titled 'Notes' and 'AI notes' displays AI-generated summaries and tasks, such as 'her team in order to assess how best to deploy the changes.' and 'Danielle explains that they are on track for new product release in December.'.
- Suggested tasks:** A section titled 'Suggested tasks' lists follow-up actions, including 'Danielle will follow up on feature enhancement prioritization' and 'Jon Shammass will double check with Amanda regarding the ETA for the new product.'

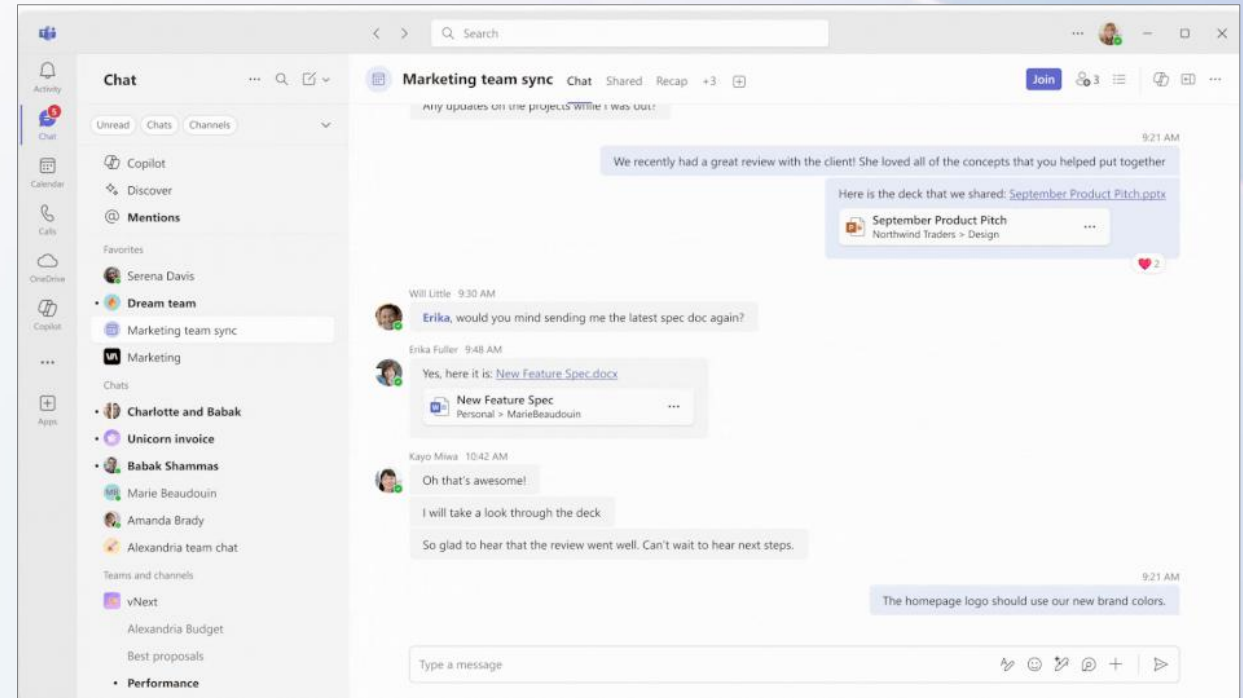

Teams Apps: Emoji reaction workflows in Microsoft Teams

Microsoft Teams introduces the ability to **trigger workflows using emoji reactions** in chats or channels, enhancing automation and collaboration.

- Examples include reacting with 🚨 to create a helpdesk ticket and escalate an issue, or using 🗣️ to send a message to the right channel for visibility.

Ensure the **Workflows app is enabled** and **review DLP policies** to allow the use of the emoji reaction trigger.

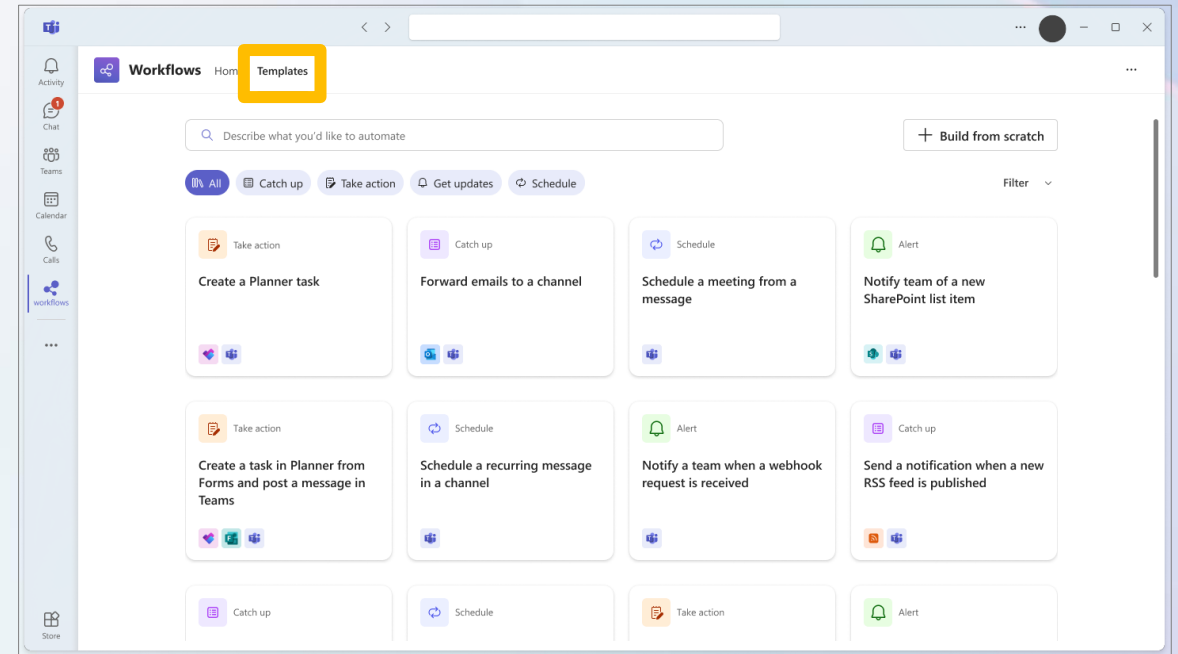

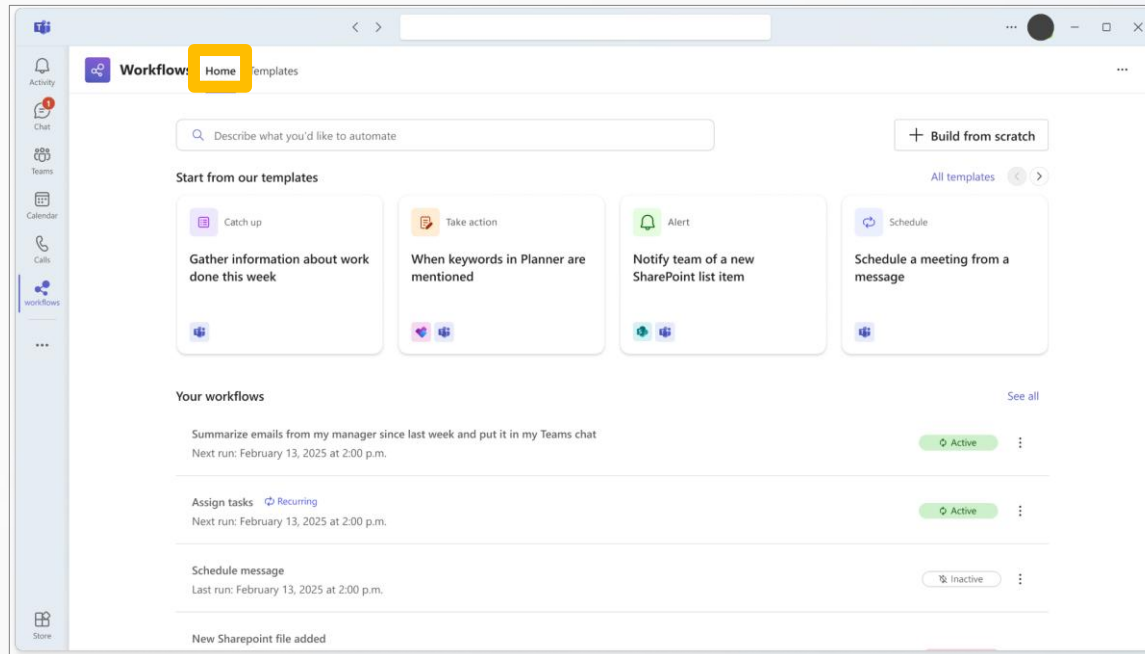

This feature is **on by default** for tenants where the Workflows app is enabled.

Teams Apps: Introducing the new Workflows experience in Microsoft Teams

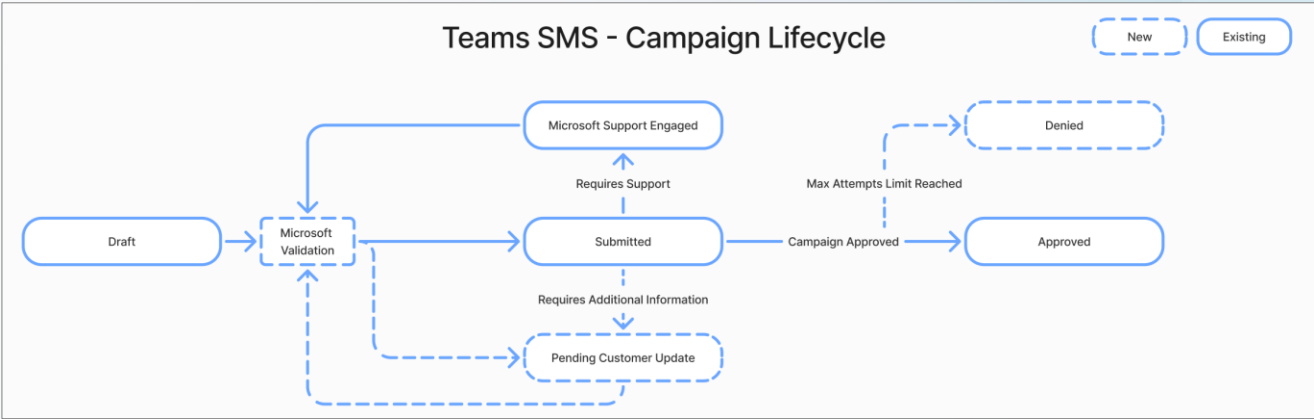

Microsoft Teams is introducing a **redesigned Workflows** experience powered by **Power Automate**. It features a streamlined interface, natural language automation, and a new template library, **improving usability without impacting** existing workflows or compliance.

Teams Phone: Streamlining SMS campaign approvals in the Teams admin center

Microsoft is enhancing the Teams Calling Plans SMS admin experience with **new self-service capabilities, a proactive Microsoft validation layer, and improved campaign status flows** to reduce delays and improve transparency.

Organizations should review rejection reasons and SMS campaign requirements before resubmitting.

Updated campaign flow

Teams Phone: Introducing Express setup for auto attendants and call queues in the Teams admin center

The Teams admin center introduces **Voice Apps Express Setup**, **simplifying** creation of Auto Attendants and Call Queues with **minimal configuration** and **guided flow**. Admins can utilize **Express Setup** by accessing the Voice section in TAC, selecting Auto Attendant or Call Queue, and following the wizard.

Microsoft Teams Premium: SMS support expands to Australia

[MC1113668](#)

[Timeline updated] Microsoft Teams is expanding SMS appointment notifications to include Australian phone numbers for users with a Teams Premium license, enhancing communication capabilities. No admin action is required for this update, but notifying Teams Premium users of the new feature is recommended.

July 2025

Saved messages	496369	[Changed to Rolling out Phase] Quickly get back to important information without scrolling through long conversations. You can save messages, whether it is a post, a reply or chat message, and find them later in the Saved view in your Chat or Teams list. Click on a saved message to open the full conversation in the right pane, where you can review or reply directly.	August 2025
First run experience and prompting users to release previous reservations	MC1106876	[Timeline updated] Microsoft 365 is updating booking notifications for bookable desks to alert users of multiple reservations and introduce a first-run experience for clarity. No admin action is required as the feature will be automatically available once released.	August 2025
New in admin center: Self-Serve Fixes for Porting Rejections requests	MC1119404	[Timeline updated] The Teams admin center now allows self-service for fixing and resubmitting certain porting order rejections, improving efficiency while keeping support options for complex cases. No additional configuration is required to enable this feature.	August 2025
Know Your Customer (KYC) onboarding required for new phone number	MC1117815	[Changed to Rolling out Phase] Microsoft 365 is streamlining Know Your Customer (KYC) requirements for acquiring Teams phone numbers, requiring admins to submit business information for validation. Administrators must complete the KYC onboarding in the Teams admin center before provisioning new telephone numbers.	August 2025
Enhance your Teams experience with new accent colors	MC1115312 497139	[Timeline updated] Microsoft Teams is introducing a new feature allowing users to select accent colors for a personalized interface on Desktop, Mac, and Web platforms. No admin action is required.	September 2025

Microsoft Teams: Chat Notes	498159	A new collaborative space is now available directly from your Teams chat, enabling real-time collaboration, organization of key information, and streamlined communications. Chat notes is available in 1:1 and group chat, and is accessible only to the chat members. Add images, format text, share Loop components, and mention chat members when you require their attention.	September 2025
Weaponizable File Type Protection for Teams Chat and Channels	499892	Microsoft Teams now blocks messages containing weaponizable file types, such as executables, in chats and channels, increasing protection against malware and other file-based attacks.	September 2025
Malicious URL Protection for Teams Chat and Channels	499893	Microsoft Teams can now detect and warn users on malicious URLs sent in Teams chat and channels, increasing protection against malware attacks.	September 2025
Collaborate using Pages in Channels	500634	We are bringing Pages to your Teams Channel experience. Create and collaborate using Pages directly in any of your channels.	September 2025
Simplified device settings for voice and face recognition on Teams Rooms	499615	It's easier for admins to enable the benefits of intelligent audio and video and Copilot for users in Teams Rooms through a new user interface, and admin settings. These new settings, on the device and in the Pro Management portal, simplify configuration and remove the requirement to use PowerShell, offering improved visibility across rooms.	September 2025

Share meeting recap to SharePoint	498494	Meeting organizers and presenters can share meeting recap notes and follow-up tasks directly from Teams to SharePoint as a news post, facilitating the seamless sharing of post meeting follow-up details.	October 2025
Dynamic video tile resizing based on occupancy count from Teams Rooms on Android	500635	The room video tile dynamically adjusts size based on the number of people in the room. When one person is in the room, the tile matches the remote participant's size. With two or more people, the room tile expands to be four times larger. Admins can enable or disable the people count feature.	October 2025

to AOSP Device Management](#)

Microsoft is shifting management of Microsoft Teams Android devices to AOSP, enhancing features and aligning with security standards.

Microsoft 365 Apps

New Outlook for Windows: Quick Guide

Fixes and feature availability

Down from 18 months to 3 months, fixes and features are delivered faster and deployment happens simultaneously across Windows and web.

Consistent behavior

One experience across Windows **reduces support calls, policy management, and training costs.**

Efficient

The new Outlook is designed for efficiency, consuming less device resources while leveraging shared code and common architecture to accelerate innovation, deployment, and bug fixes.

Make the switch

Microsoft 365 Apps: Please update Microsoft 365 Office apps to a version higher than 16.0.18827.20202

Microsoft 365 is **upgrading the backend service for Read Aloud, Transcription, and Dictation features**, affecting users with Office app versions earlier than 16.0.18827.20202.

Users should **update Office clients to avoid losing access to these features**.

Read Aloud, Transcription and Dictation features in Office

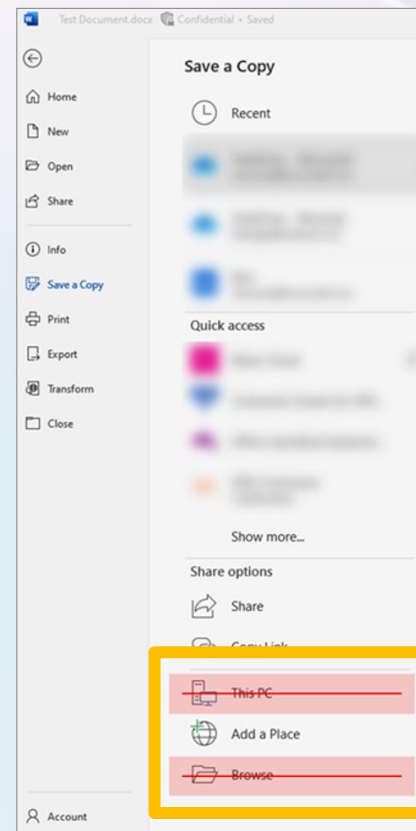

Microsoft 365 Apps: Restrict new file creation in Office desktop apps to Cloud Locations

Microsoft 365 introduces **a policy for IT Administrators to limit file creation in Word, Excel, and PowerPoint to Cloud Locations**, enhancing security and compliance.

If adopting this policy, **prepare by redirecting known folders to OneDrive** for seamless user transition.

Blocked local save locations in Office

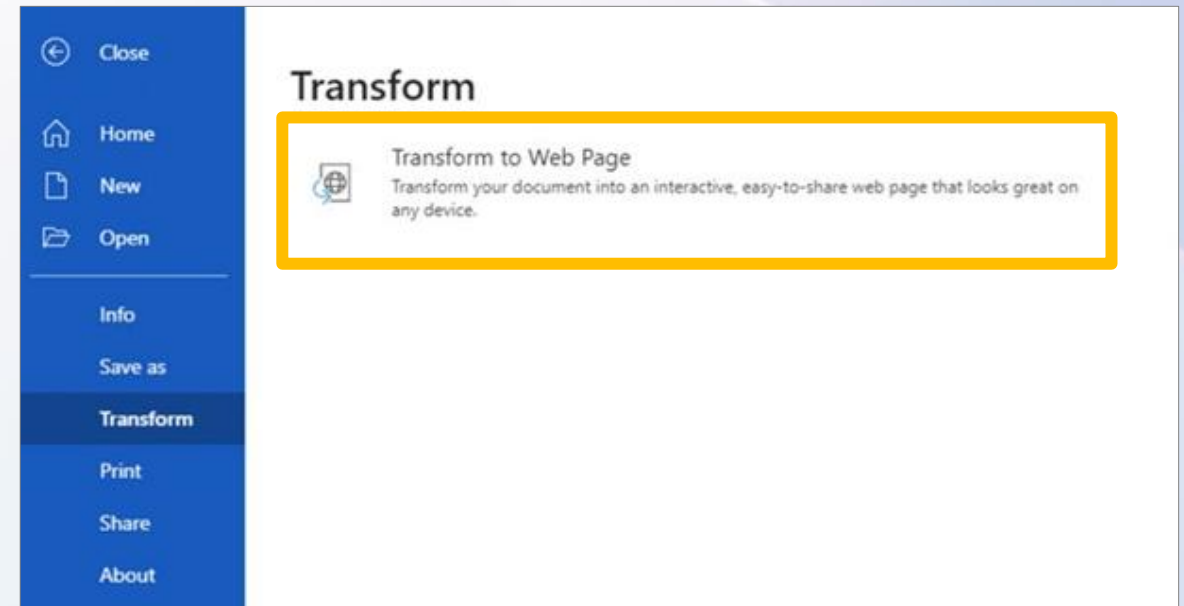

Word for Windows: Transform to Web Page feature retiring

We're **retiring the Transform to Web Page feature** in Microsoft Word.

As an alternative, **we recommend using the Start from a Document flow in Microsoft Sway** to create web-based content from Word documents.

The Transform to Web Page feature which will be retired

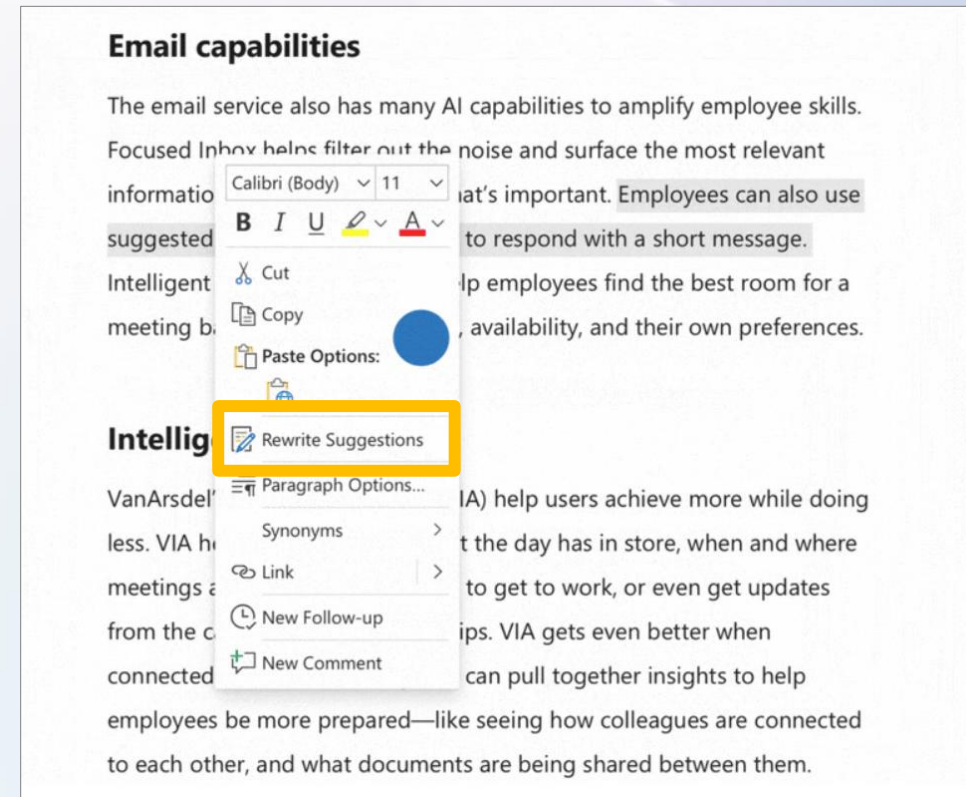

Word for Windows: Sentence-level Rewrite Suggestions deprecation

Microsoft Word is **phasing out the Rewrite Suggestions feature in favor of Copilot**, which offers advanced text refinement capabilities.

No action is required, but **users are encouraged to explore Copilot's Auto-Rewrite feature** for improved writing assistance.

The Rewrite Suggestions feature in Word which will be retired

Excel for Windows: External workbook links to blocked file types will be disabled by default

A new policy will **control the ability to refresh external workbook links to blocked file types**, returning "#BLOCKED" errors for new and preventing refresh of existing links.

Administrators must configure settings to allow such links if needed.

↑

↓

×

File Block includes external link files

Platforms

Windows

Applications

Excel

This setting determines whether Trust Center settings for blocking load of potentially unsecure workbooks applies to those accessed by external links.

If you enable this policy setting, external links to workbooks that are blocked by File Block settings in Trust Center will not refresh. Attempts to create new links or refresh data from blocked workbooks may result in errors.

If you disable this policy setting, attempts to access external links data will not be subject to File Block settings in Trust Center.

New Outlook for Windows: File tab in Ribbon

The **File tab** provides new Outlook users with the ability to **easily discover account info, settings, PSTs, and more** directly from the ribbon.

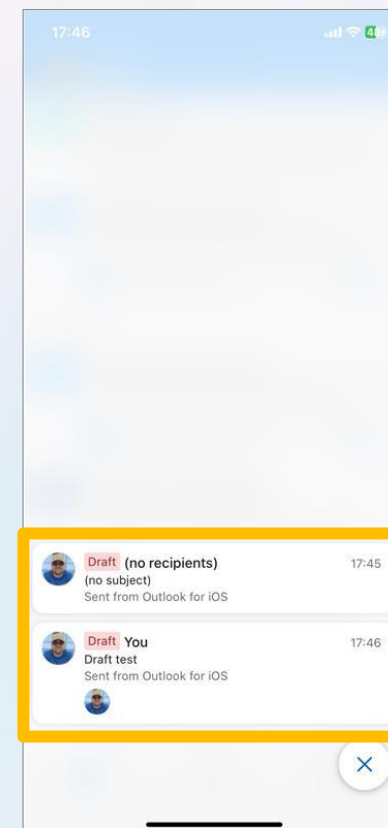

The File tab in the new Outlook for Windows

Outlook for iOS and Android: Draft messages now minimize automatically when closed

Outlook Mobile will now **minimize drafts instead of closing them**, allowing users to easily resume editing and **reducing accidental draft loss**.

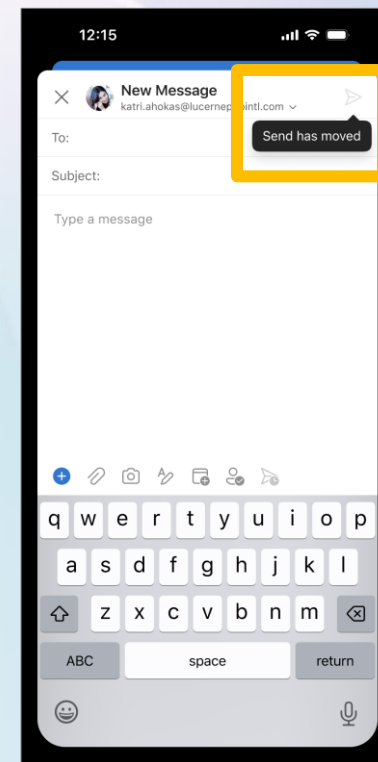

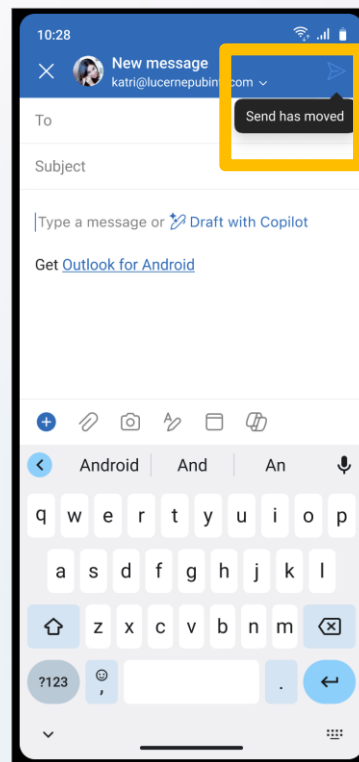

Minimized draft emails in Outlook for iOS

Outlook for iOS and Android: Send button relocated to reduce accidental sends

Outlook mobile is **updating the Send button placement in the compose view** to reduce accidental taps.

Send Button in Outlook for iOS and Android

(Updated) Outlook: Report junk + block or unsubscribe in one same action	MC1112455 495469	Microsoft 365 is enhancing the junk email reporting feature by allowing users to unsubscribe from senders directly if supported, simplifying email management. No admin action is required. Updated August 5, 2025: We have updated the timeline. Thank you for your patience.	August 2025
(Updated) Microsoft Outlook Mobile adds support for DLP policy tips and enforcement	MC1129716 496146	Outlook Mobile for iOS and Android will soon support Data Loss Prevention (DLP) policy tips and enforcement to help prevent accidental data leaks. Organizations should review existing DLP policies to ensure they include mobile clients. Updated August 7, 2025: We have updated the timeline. Thank you for your patience.	July 2025
(Updated) 3rd party citation add-in in Word reference tab	MC1108849	Microsoft Word is adding a new entry point under the References tab to help users discover third-party citation tools alongside the default citation functionality. If your organization uses custom citation tools or has compliance requirements, review available third-party options for policy alignment. Updated July 30, 2025: We have updated the timeline. Thank you for your patience.	July 2025
Updates available for Microsoft 365 Apps for Current Channel	MC1125449 MC1129753	Microsoft 365 Apps updates are now available for the Current Channel. If you manage updates directly, download the latest update for deployment.	August 2025

Save an Event as a Draft on Android	496595	You can save a meeting as a draft on your calendar if you aren't ready to send the meeting invites. When composing an event with at least one attendee added, select dismiss and then select Save as a Draft. The draft event will show on your calendar as [Draft] along with the title of the event.	August 2025
Play a Sound Rule	497836	Users can set up Outlook rules to play a sound or show a desktop alert whenever an email that matches your chosen conditions arrives, whether it's from a specific person, includes certain words, or meets any other rule criteria you define. These features help you stay alerted to the emails that matter most.	October 2025
Global Address List Redesign	498897	The Global Address List, or Address Book, is getting a major visual redesign to make it easier to navigate, show more contact information in the search results list, improve its accessibility, and improve its appearance overall. This window is accessible via the To/Cc/Bcc buttons in the email compose form.	September 2025
Wait on Send for oversharing dialog in New Outlook	498920	New Outlook for Windows will now support Wait on Send for Oversharing_x000D_ This feature allows admins to block sending of emails in case DLP policy evaluation is not completed for labeled or sensitive content.	December 2025
Data Loss Prevention (DLP) Policy Tips & Override for Outlook Mobile	496146	Outlook Mobile now supports Data Loss Prevention (DLP) policy tips, helping users avoid accidental data leaks. When sensitive content is detected, users are alerted with inline tips or pop-ups, based on admin-configured rules. This update aligns DLP behavior across all Outlook clients for consistent compliance enforcement.	July 2025

Customizable Oversharing dialog for DLP in New Outlook	498921	New Outlook for Windows will now support ability to show customizable oversharing dialog for Data Loss Prevention. The support will be to configure custom title, body, business justifications, and dynamic variables/tokens for matched recipients, attachment names, and labels.	December 2025
Send Button update	499900	This feature reduces accidental message sends by moving the send button from the bottom of the compose view, in the compose toolbar to the header of the compose view. By moving the send button to a less crowded location, users can avoid accidental taps, resulting in a more intentional and error-free messaging experience.	September 2025
Browse Conversation Files	496592	This feature makes it easy for users to find and access all files within a conversation thread. Instead of scrolling through each message to locate attachments, users can quickly view and manage all files in one place, accessed from the top of the conversation.	July 2025

OneNote for Android and iOS now features improved margins for easier note-taking and enhanced readability.

[Analyze images with Python in Excel](#)

Excel now supports using Python to analyze images, enabling users to harness powerful image processing capabilities directly within spreadsheets.

[New pen tools and Draw tab customization in Word, Excel, and PowerPoint for Windows](#)

Word, Excel, and PowerPoint now offer customizable pen tools on the Draw tab, allowing users to personalize their inking experiences.

[Paste text only shortcut in OneNote on Windows, for Mac, and for the web](#)

Microsoft 365 introduces a new shortcut for pasting text only in OneNote across Windows, Mac, and web versions, enabling users to seamlessly copy and paste text without its original formatting.

Exchange Online

Exchange Online: Retirement of Search-MailboxAuditLog and New-MailboxAuditLogSearch cmdlets

Microsoft Exchange Online is **retiring the Search-MailboxAuditLog and New-MailboxAuditLogSearch cmdlets**, transitioning to the **Search-UnifiedAuditLog** cmdlet for improved audit log access and compliance.

Organizations need to review dependencies on the legacy cmdlets and transition to the unified audit log for continued access.

[Search-MailboxAuditLog and New-MailboxAuditLogSearch will retire](#)

Microsoft will discontinue native public folder migrations from Exchange Server to Exchange Online and recommends using third-party solutions for future migrations.

[Exchange Server Subscription Edition \(SE\) is now available](#)

Exchange Server Subscription Edition (SE) has been released, offering enhanced features, security, and a subscription-based model for easier updates and maintenance.

[Released: August 2025 Exchange Server Security Updates](#)

Microsoft has released security updates for Exchange Server to address vulnerabilities and improve stability across supported versions.

[Introducing more control over Direct Send in Exchange Online](#)

Microsoft has introduced enhanced controls for direct send configurations in Exchange Online, allowing admins to better manage mail flow settings for improved security and compliance.

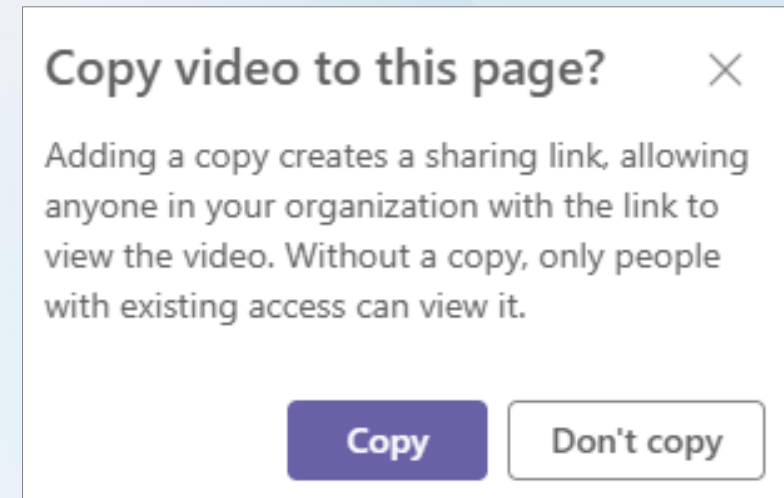

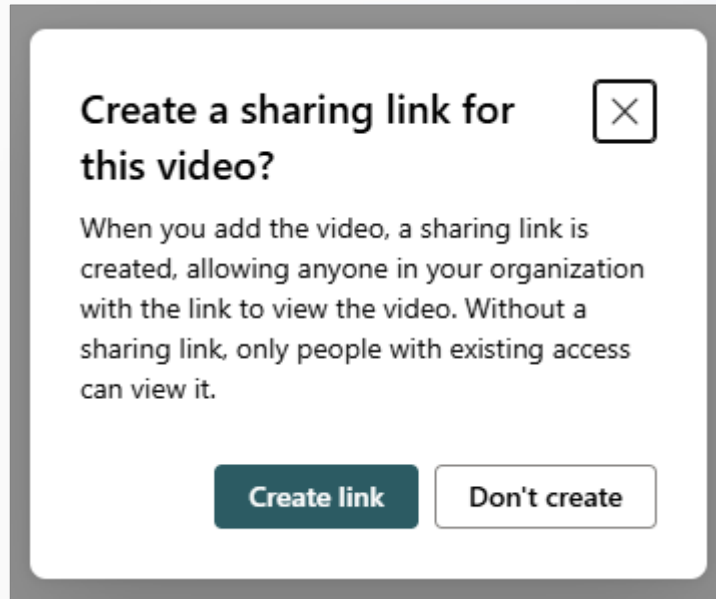

SharePoint Online

SharePoint Online: Updates to SharePoint video sharing

SharePoint is adding **automatic sharing links for videos** to improve video accessibility when pages or news posts are shared. This enhancement ensures that videos remain viewable to users - even if they don't have direct access to the site - by automatically generating secure sharing links for videos stored on the site. Additionally, when users add videos from external sources, they will see **updated dialogs that provide more control and transparency**.

SharePoint Online: Additional document processing rule actions for Microsoft SharePoint libraries

SharePoint is enhancing document processing rules with **new actions, allowing users to copy, move, and set content types based on metadata.**

When a new file is added,

set content type to contoso invoices if name contains

Power Platform: Information about an update to how Dataverse system jobs can be deleted

Dataverse will introduce a new deletion service to **automatically manage completed system jobs**, enhancing record retention compliance and system performance. Review and adjust default retention periods to align with your record retention policy.

Completed system categories:

- **Succeeded:** Jobs that have been completed successfully without errors.
- **Failed:** Jobs that have encountered errors and haven't completed as intended.
- **Cancelled:** Jobs that were stopped before completion, either by user intervention or by system constraints.

Power Platform admin center – Manage – Environments – Settings – Data management – Bulk Deletions

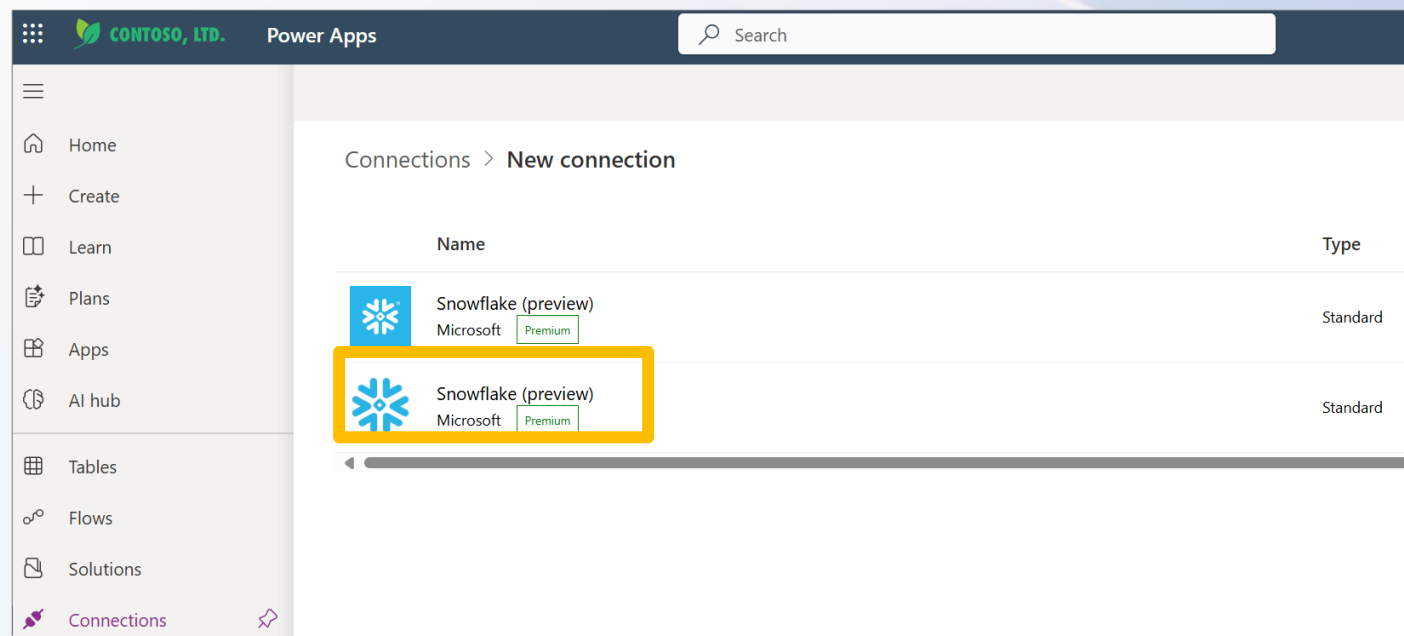

Power Platform: Snowflake (Preview) connector is available

The Snowflake (Preview) connector is now available, **enabling enhanced data processing and analytics** in canvas apps with Snowflake data integration.

This connector is available in:

- Power Apps
- Power Automate
- Copilot Studio
- Logic Apps

Example of where you can find the connector in make.powerapps.com

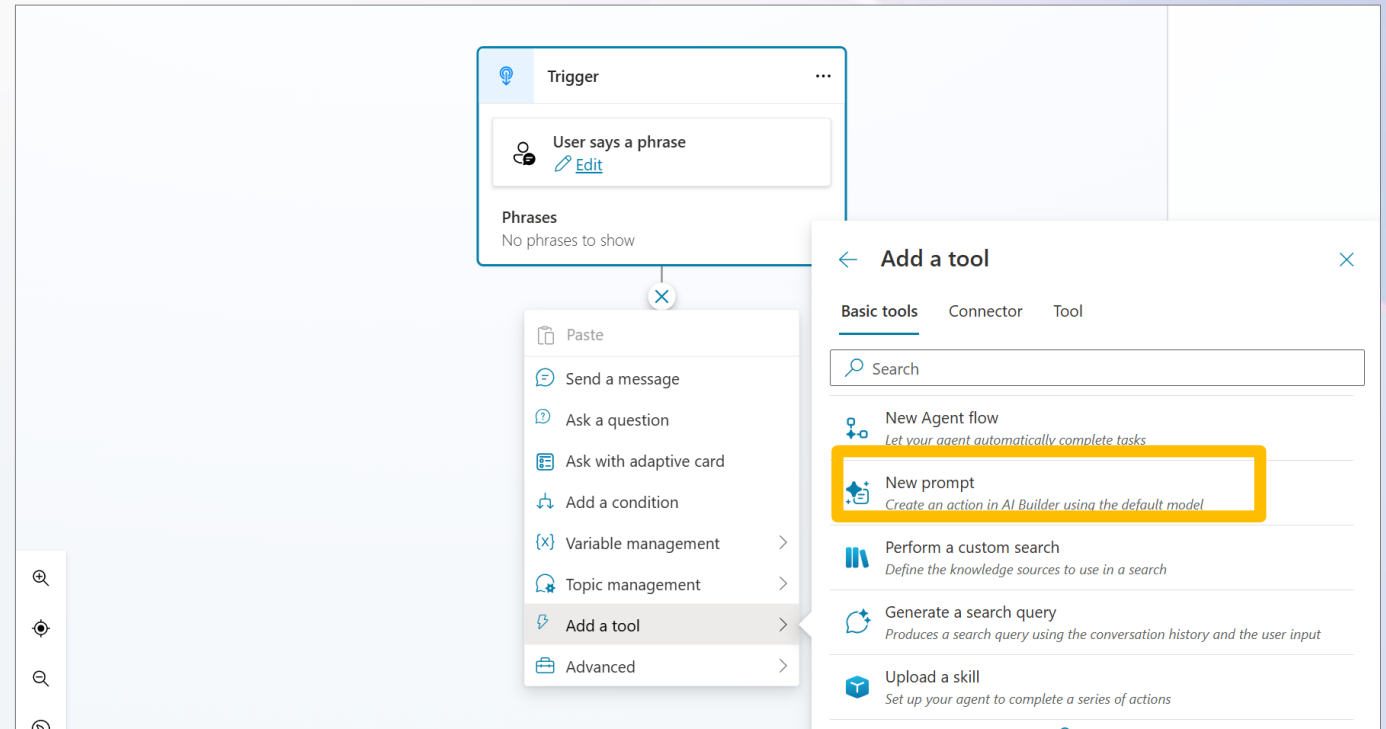

AI Builder: Process documents with Copilot prompts

Microsoft 365 is introducing the ability to **use prompts in Copilot agents to extract and augment information** from various document types in AI Builder.

Supported image and document types:

- .PNG
- .JPG
- JPEG
- .PDF

For reference only: Add a prompt action to a Copilot agent

AI Builder: Review AI generated content with validation station

Microsoft is introducing a **validation station** in AI Builder to review AI prompts, inputs, and responses, allowing feedback to improve accuracy.

This feature covers four aspects:

- **Providing feedback:** Users and makers provide feedback on AI prompt responses when the responses aren't accurate.
- **Getting notifications for reviews:** Makers get notified when new feedback is available.
- **Listing reviews:** Makers review the feedback sent for a given AI prompt.
- **Few-shot learning:** Makers use the feedback they receive or create samples to drive AI prompt responses and increase accuracy.

AI Builder: Enhance automated document processing with validation station

AI Builder will now include a **validation station** to **review, verify, and correct extracted data** from documents, highlighting errors for manual confirmation.

Document Processing Monitoring and Validation Station

Power Pages

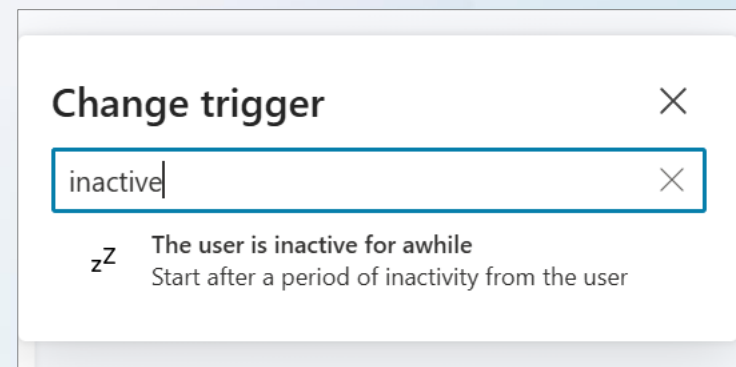

Microsoft Copilot Studio: Inactive agent sessions will now end after 15 minutes of inactivity

Agent sessions will now close after 15 minutes of inactivity instead of 36, enhancing performance and analytics. If your custom agent(s) have inactivity-based actions, update the duration to match the new timeout threshold.

To change the trigger, go to Topics, add a new topic and change the trigger type

For custom agents, choose the inactive trigger setting to have the agent session close after a period of inactivity

Microsoft Copilot Studio: Scoped knowledge in Declarative Agents

Microsoft 365 is **enhancing Declarative Agents with scoped knowledge support** for connectors like Azure DevOps, Confluence, GitHub, Jira, and ServiceNow, improving response relevance and aligning with organizational policies.

This allows agents to deliver more relevant, personalized responses by limiting their knowledge base to defined areas such as:

- **ADO Work Items** – Area Path
- **Confluence** – Space
- **GitHub PRs, Issues, Docs** – Repository
- **Jira** – Project
- **ServiceNow KB** – Knowledge Base
- **ServiceNow Catalog** – Catalog
- **ServiceNow Tickets** – Entity Type

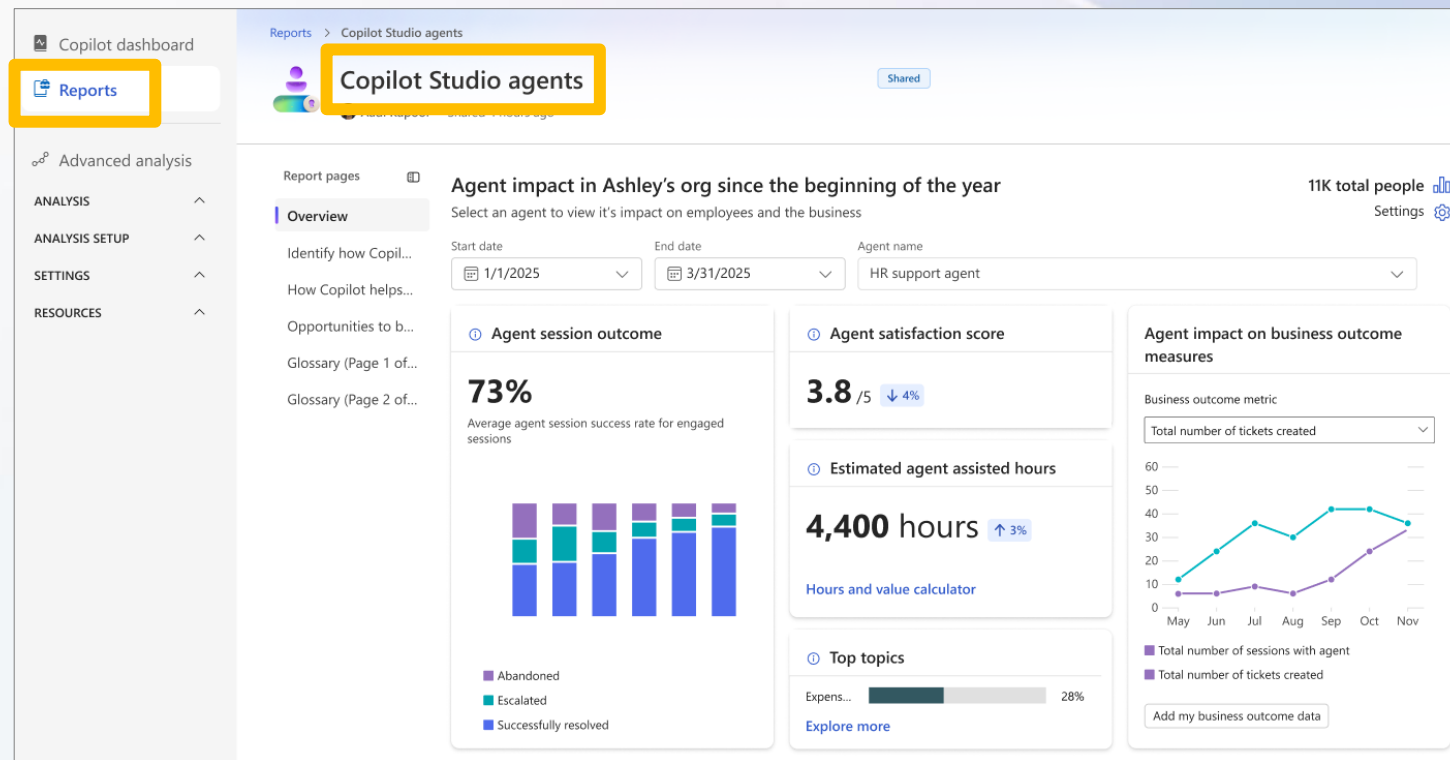

Microsoft Copilot Studio: Analyze business impact of Copilot Studio agents in Viva Insights Advanced Insights

Microsoft 365 is introducing a feature in Viva Insights that **allows Insights Analysts to analyze the business impact of Copilot Studio agents** through aggregated reports.

Key metrics include:

- **Hours saved**
- **Usage analysis**
- **Resolution rate**
- **ROI indicators** like cost reduction and revenue increase

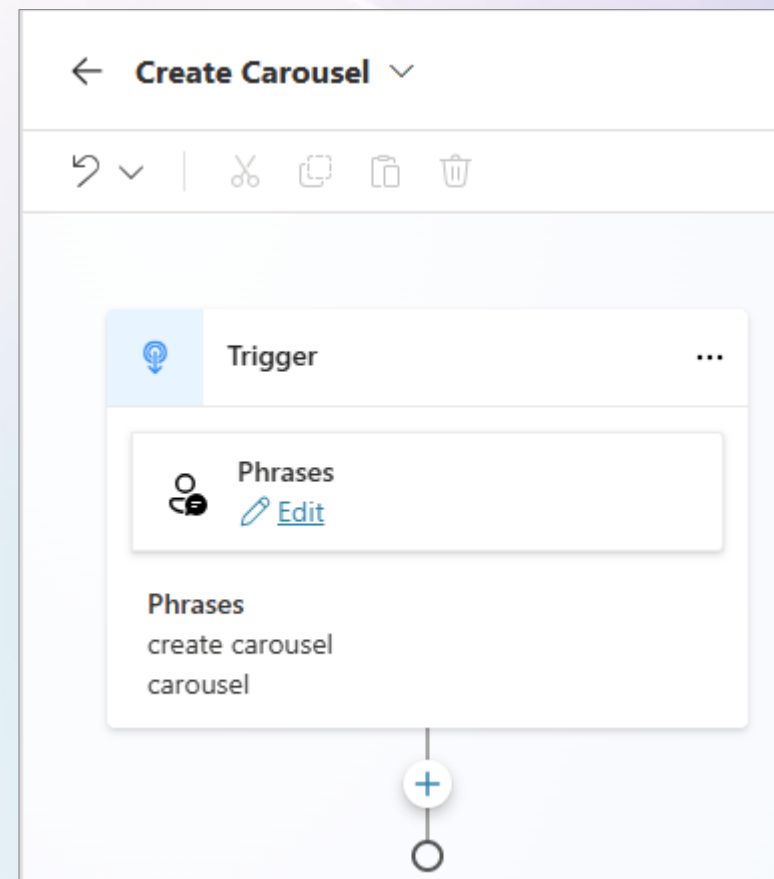

Microsoft Copilot Studio: Upgraded support for Adaptive Cards in Copilot Studio

Copilot Studio now supports the latest version of Adaptive Cards, **providing new features for creating enhanced experiences in Teams and Microsoft 365.**

New features such as:

- Carousels
- Charts
- Advanced layouts

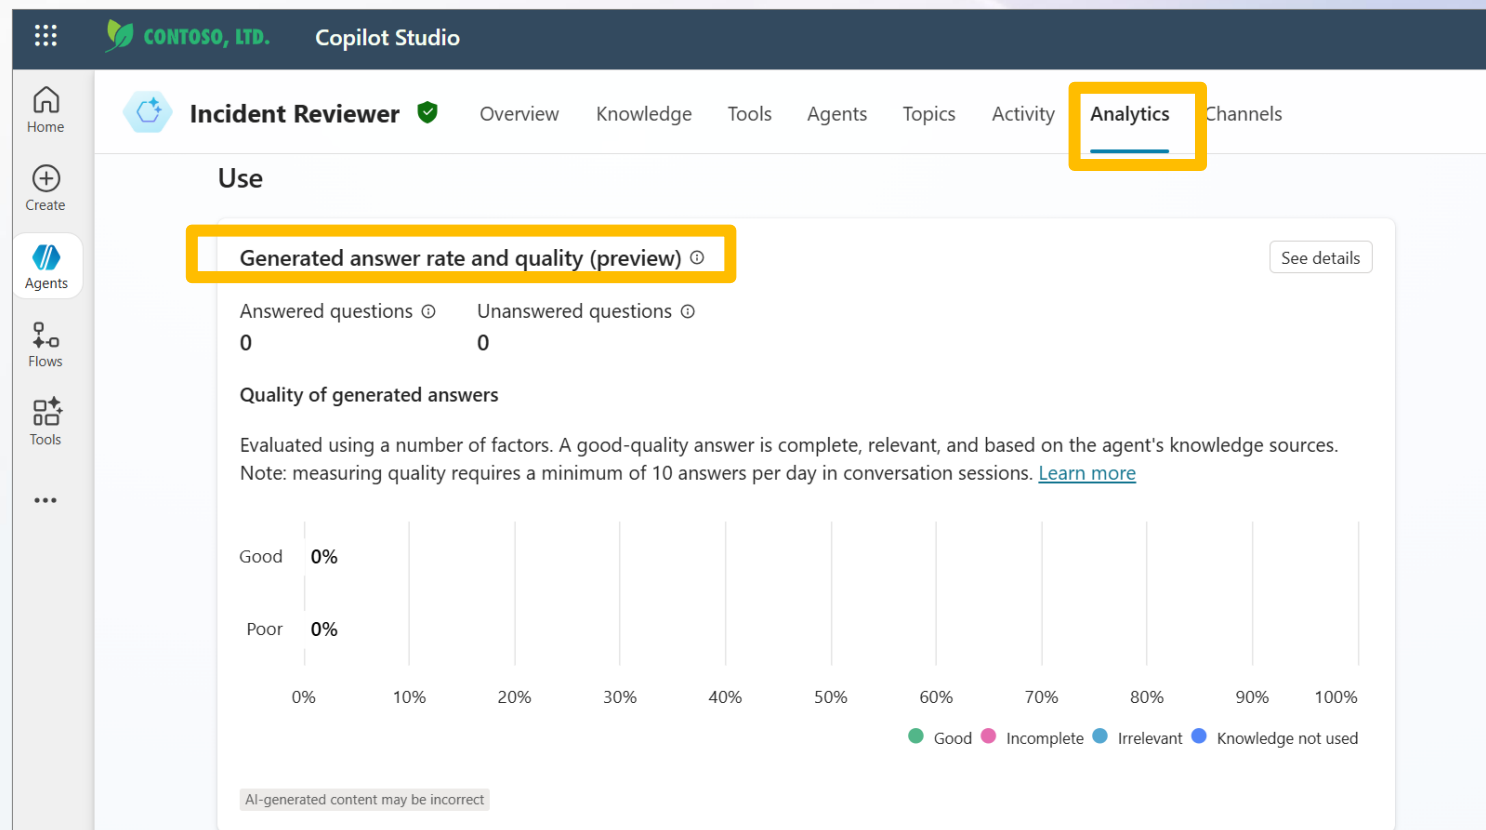

Example of where you can trigger an adaptive card

Microsoft Copilot Studio: Analyze quality of responses that use generative AI

Microsoft Copilot Studio will offer a feature to **analyze the quality of responses** generated by AI, providing insights into response **relevance, completeness, and grounding** with quality scores.

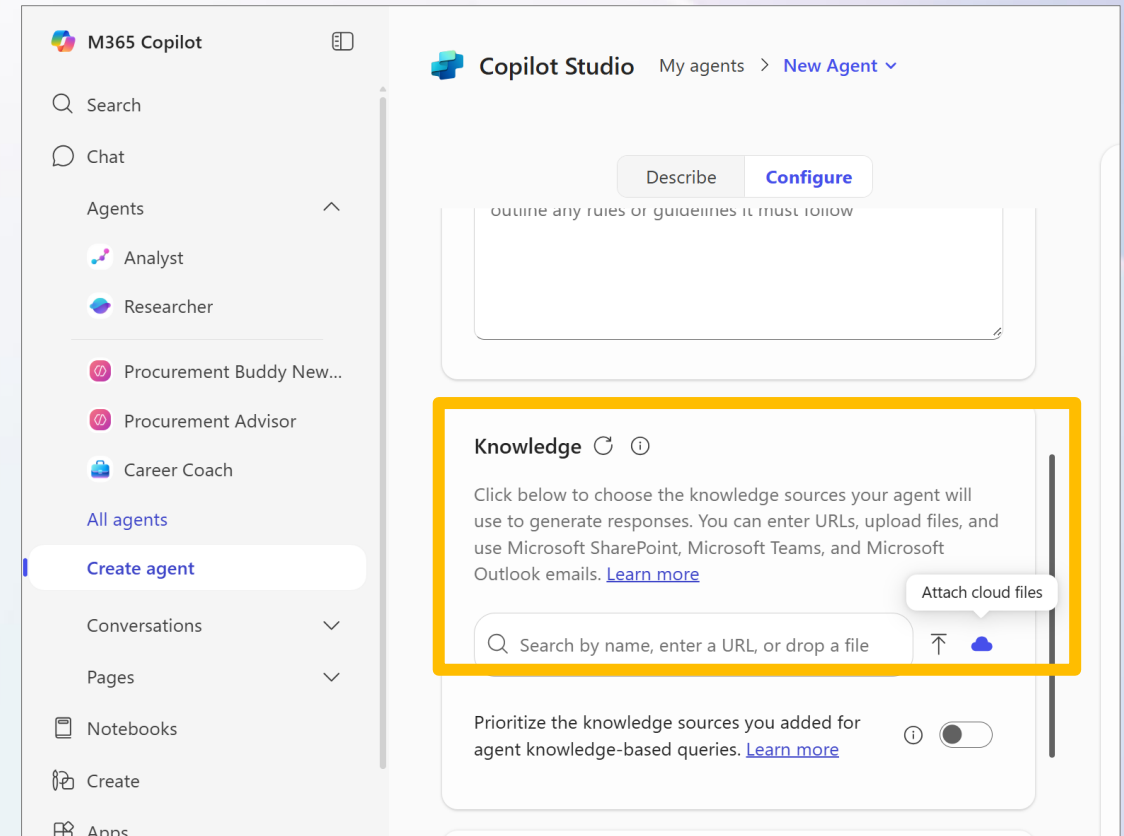

Analytics section within your Copilot Studio agent

Microsoft Copilot Studio: Larger file upload support in Copilot Studio agent builder

Copilot Studio agent builder in Microsoft 365 will support **larger file uploads of up to 512 MB.**

For reference only: Copilot Studio agent builder file upload experience

Power Apps: Generative Pages feature available for preview

Microsoft 365 announced the public preview of Generative Pages, a feature that **uses AI to simplify app design for model-driven apps by generating React code from natural language descriptions.**

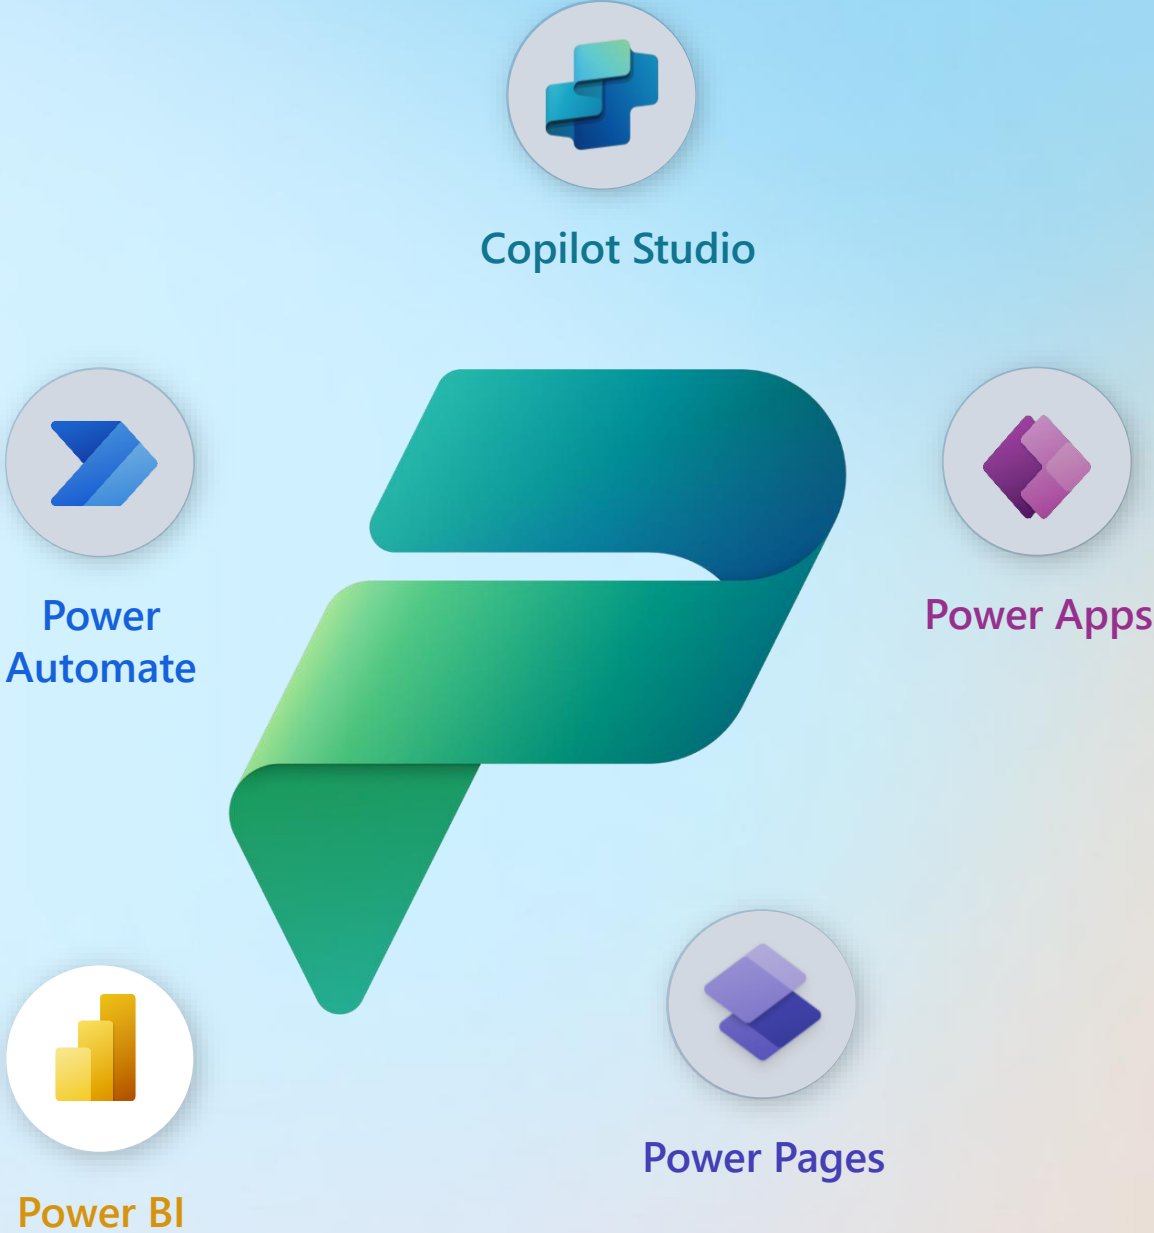

Public Preview in North America.

Will be available in other regions at a later date.

The screenshot shows the 'Describe your page' interface in Power Apps. At the top, there's a title 'Describe your page' with a 'Preview' link. Below it are three buttons: 'Build a gallery page for accounts', 'Build a gallery page for anniversaries', and 'Build a list page for features'. The main area contains a text box with the following description: 'Build a page showing Account records as a gallery of cards using modern look & feel. All cards should have fixed size and tall enough to fit 4 lines of titles. Include name, entityimage on the top and, website, email, phone number. Make the component fill 100% of the space. Make the gallery scrollable. use data from the Account table.' Below the text box, there's a prompt: 'Make each card clickable to open the Account record in a new window.' Underneath, there's a list of data sources: 'Account' (selected), 'Add data' (with a plus icon), 'Attach image' (with an image icon), and 'Add table' (highlighted with a yellow box). To the right of the 'Add data' button, it says '1 of 6 data sources'. At the bottom right of the text box, there's a character count '407 / 50000' and a right arrow. At the bottom of the interface, there's a note: 'This preview feature uses generative AI. [See terms](#)'.

Power BI (Fabric)

Microsoft Fabric: Enforcement of Admin Settings in Fabric Public API and CI/CD

Microsoft Fabric will **enforce admin settings to restrict the creation of items through public APIs and CI/CD methods**, ensuring admin-defined controls are consistently respected.

Admins should review and update creation settings for Fabric items to align with organizational policies.

Microsoft Fabric: Power BI Cognitive Services and Azure Machine Learning features retiring; transition to Fabric AI services

Microsoft is **retiring Cognitive Services and Azure Machine Learning features in Power BI** to focus on AI advancements in Microsoft Fabric. Organizations should **transition to Auto ML in Fabric** for AI needs.

[Use Azure AI services in Fabric](#)

Power Automate

Power Automate: Configure and manage SLA with work queues

Power Automate introduces SLA configuration for work queues, **allowing reporting on items at-risk or in violation to ensure SLA adherence**

You can configure Service Level Agreements (SLAs) for work queues with the following settings:

Type of SLA

- Time to live (TTL)
- Business hours

The screenshot shows the 'New work queue' configuration window in Power Automate. The 'SLA strategy' dropdown is highlighted with a yellow box, indicating the selection of 'None'. Other visible fields include 'Work queue name', 'Description', 'Work queue key', and 'SLA violated after' (set to 1 day). The 'SLA considered at risk after' field is also visible at the bottom.

Work Queues SLA setting configuration

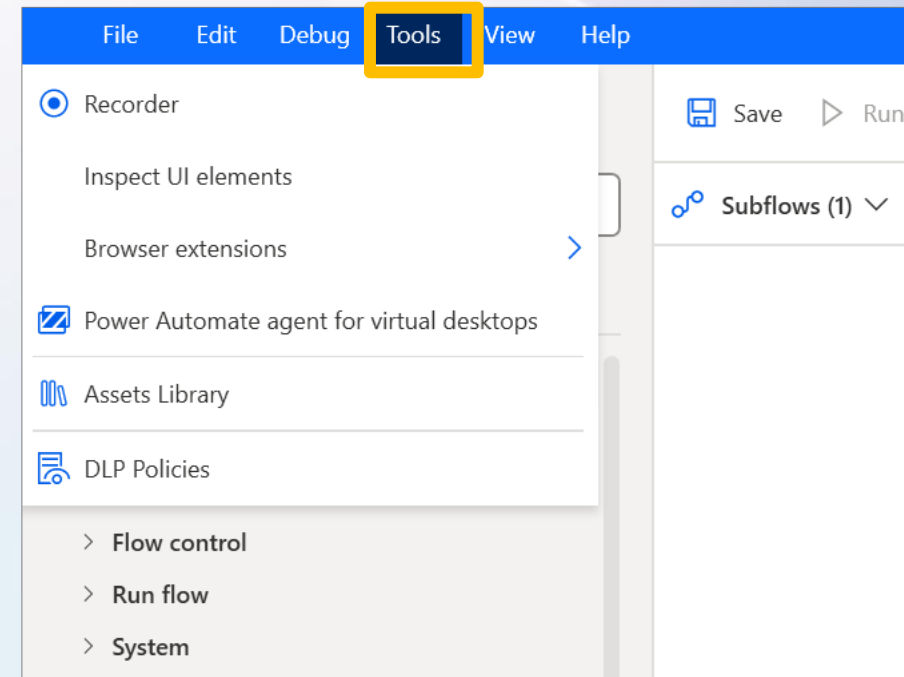

Power Automate: Debug desktop flows using step over and step out

Power Automate now supports debugging desktop flows with "step over" and "step out" options in the designer tool.

- **Step over:** This allows users **to skip sub-flows without entering them** so they can focus on the main logic of the flow.
- **Step out:** This allows users to **quickly exit a sub-flow and return to the parent flow** when reviewing nested logic or skipping known sections.
- This feature is **off** by default. To turn it on, go to the **Tools** menu in the designer and enable it,

For reference only: In the Power Automate desktop flow designers, the new setting will be listed under the "Tools" section

Launched

All timing is for planning purposes and subject to change
